The Higher Learning Commission’s (HLC’s) Board of Trustees adopted this policy on second reading at its meeting on June 30–July 1, 2016.

Background
For several years, HLC has had a separate statement regarding the need for institutions to comply with state law wherever they meet state presence or other related requirements. This policy change incorporates the expectations in that document into HLC’s Assumed Practices. Institutions seeking initial accreditation are evaluated against the Assumed Practices, and accredited institutions may be held accountable to the Assumed Practices if the institution is placed on probation, or if a complaint or other information suggests the institution is not complying with an Assumed Practice.

Implementation
This policy is effective immediately.

Adopted Policy
Wording that was deleted or revised is shown as strikethrough (old wording); new language, whether through addition or revision, is shown in bold (new wording). These revisions have been made to the Assumed Practices on HLC’s policy website at policy.hlcommission.org.

Policy Title: Assumed Practices
Number: CRRT.B.10.020

Foundational to the Criteria and Core Components is a set of practices shared by institutions of higher education in the United States. Unlike Criteria and Core Components, these Assumed
Practices are (1) generally matters to be determined as facts, rather than matters requiring professional judgment and (2) unlikely to vary by institutional mission or context.

A. Integrity: Ethical and Responsible Conduct

1. The institution has a conflict of interest policy that ensures that the governing board and the senior administrative personnel act in the best interest of the institution.

2. The institution has ethics policies for faculty and staff regarding conflict of interest, nepotism, recruitment and admissions, financial aid, privacy of personal information, and contracting.

3. The institution provides its students, administrators, faculty, and staff with policies and procedures informing them of their rights and responsibilities within the institution.

4. The institution provides clear information regarding its procedures for receiving complaints and grievances from students and other constituencies, responds to them in a timely manner, and analyzes them to improve its processes.

5. The institution makes readily available to students and to the general public clear and complete information including:
   a. statements of mission, vision, and values
   b. full descriptions of the requirements for its programs, including all pre-requisite courses
   c. requirements for admission both to the institution and to particular programs or majors
   d. policies on acceptance of transfer credit, including how credit is applied to degree requirements. (Except for courses articulated through transfer policies or institutional agreements, the institution makes no promises to prospective students regarding the acceptance of credit awarded by examination, credit for prior learning, or credit for transfer until an evaluation has been conducted.)
   e. all student costs, including tuition, fees, training, and incidentals; its financial aid policies, practices, and requirements; and its policy on refunds
   f. policies regarding academic good standing, probation, and dismissal; residency or enrollment requirements (if any)
   g. a full list of its instructors and their academic credentials
   h. its relationship with any parent organization (corporation, hospital, or church, or other entity that owns the institution) and any external providers of its instruction.
6. The institution assures that all data it makes public are accurate and complete, including those reporting on student achievement of learning and student persistence, retention, and completion.

7. The institution portrays clearly and accurately to the public its current status with the Higher Learning Commission and with specialized, national, and professional accreditation agencies.
   a. An institution offering programs that require specialized accreditation or recognition by a state licensing board or other entity in order for its students to be certified or to sit for the licensing examination in states where its students reside either has the appropriate accreditation and recognition or discloses publicly and clearly the consequences to the students of the lack thereof. The institution makes clear to students the distinction between regional and specialized or program accreditation and the relationships between licensure and the various types of accreditation.
   b. An institution offering programs eligible for specialized accreditation at multiple locations discloses the accreditation status and recognition of the program by state licensing boards at each location.
   c. An institution that provides a program that prepares students for a licensure, certification, or other qualifying examination publicly discloses its pass rate on that examination, unless such information is not available to the institution.

8. The governing board and its executive committee, if it has one, include some “public” members. Public members have no significant administrative position or any ownership interest in any of the following: the institution itself; a company that does substantial business with the institution; a company or organization with which the institution has a substantial partnership; a parent, ultimate parent, affiliate, or subsidiary corporation; an investment group or firm substantially involved with one of the above organizations. All publicly-elected members or members appointed by publicly-elected individuals or bodies (governors, elected legislative bodies) are public members.¹

9. The governing board has the authority to approve the annual budget and to engage and dismiss the chief executive officer.¹

10. The institution remains in compliance at all times with state laws including laws related to authorization of educational activities and consumer protection wherever it does business and state law applies.
10. The institution documents outsourcing of all services in written agreements, including agreements with parent or affiliated organizations.

11. The institution takes responsibility for the ethical and responsible behavior of its contractual partners in relation to actions taken on its behalf.

1 Institutions operating under federal control and authorized by Congress are exempt from these requirements. These institutions must have a public board that includes representation by individuals who do not have a current or previous employment or other relationship with the federal government or any military entity. This public board has a significant role in setting policy, reviewing the institution’s finances, reviewing and approving major institutional priorities, and overseeing the academic programs of the institution.

B. Teaching and Learning: Quality, Resources, and Support*

1. Programs, Courses, and Credits

d. The institution conforms to commonly accepted minimum program length: 60 semester credits for associate's degrees, 120 semester credits for bachelor’s degrees, and 30 semester credits beyond the bachelor’s for master’s degrees. Any variation from these minima must be explained and justified.

e. The institution maintains structures or practices that ensure the coherence and quality of the programs for which it awards a degree. Typically institutions will require that at minimum 30 of the 120 credits earned for the bachelor's degree and 15 of the 60 credits for the associate’s degree be credits earned at the institution itself, through arrangements with other accredited institutions, or through contractual relationships approved by the Commission. Any variation from the typical minima must be explained and justified.

f. The institution’s policy and practice assure that at least 50% of courses applied to a graduate program are courses designed for graduate work, rather than undergraduate courses credited toward a graduate degree. (Cf. Criterion 3.A.1 and 2.)

* In June 2015, HLC’s Board of Trustees adopted revisions to Assumed Practice B.2. regarding expectation for faculty qualifications. This change will go into effect on September 1, 2017. The revised version is available at http://policy.hlcommission.org/policies/assumed-practices.html.
the credits allocated for the master’s degree – usually 15 of 30 – must be for courses designed for graduate work.)

g. The institution adheres to policies on student academic load per term that reflect reasonable expectations for successful learning and course completion.

h. Courses that carry academic credit toward college-level credentials have content and rigor appropriate to higher education.

i. The institution has a process for ensuring that all courses transferred and applied toward degree requirements demonstrate equivalence with its own courses required for that degree or are of equivalent rigor.

j. The institution has a clear policy on the maximum allowable credit for prior learning as a reasonable proportion of the credits required to complete the student’s program. Credit awarded for prior learning is documented, evaluated, and appropriate for the level of degree awarded. (Note that this requirement does not apply to courses transferred from other institutions.)

k. The institution maintains a minimum requirement for general education for all of its undergraduate programs whether through a traditional practice of distributed curricula (15 semester credits for AAS degrees, 24 for AS or AA degrees, and 30 for bachelor’s degrees) or through integrated, embedded, interdisciplinary, or other accepted models that demonstrate a minimum requirement equivalent to the distributed model. Any variation is explained and justified.

2. Faculty Roles and Qualifications

a. Instructors (excluding for this requirement teaching assistants enrolled in a graduate program and supervised by faculty) possess an academic degree relevant to what they are teaching and at least one level above the level at which they teach, except in programs for terminal degrees or when equivalent experience is established. In terminal degree programs, faculty members possess the same level of degree. When faculty members are employed based on equivalent experience, the institution defines a minimum threshold of experience and an evaluation process that is used in the appointment process.

b. Instructors teaching at the doctoral level have a record of recognized scholarship, creative endeavor, or achievement in practice commensurate with doctoral expectations.

c. Faculty participate substantially in:
1) oversight of the curriculum—its development and implementation, academic substance, currency, and relevance for internal and external constituencies;

2) assurance of consistency in the level and quality of instruction and in the expectations of student performance;

3) establishment of the academic qualifications for instructional personnel;

4) analysis of data and appropriate action on assessment of student learning and program completion.

3. Support Services

a. Financial aid advising clearly and comprehensively reviews students’ eligibility for financial assistance and assists students in a full understanding of their debt and its consequences.

b. The institution maintains timely and accurate transcript and records services.

C. Teaching and Learning: Evaluation and Improvement

1. Instructors (excluding for this requirement teaching assistants enrolled in a graduate program and supervised by faculty) have the authority for the assignment of grades. (This requirement allows for collective responsibility, as when a faculty committee has the authority to override a grade on appeal.)

2. The institution refrains from the transcription of credit from other institutions or providers that it will not apply to its own programs.

3. The institution has formal and current written agreements for managing any internships and clinical placements included in its programs.

4. A predominantly or solely single-purpose institution in fields that require licensure for practice is also accredited by or is actively in the process of applying to a recognized specialized accrediting agency for each field, if such agency exists.

5. Instructors communicate course requirements to students in writing and in a timely manner.

6. Institutional data on assessment of student learning are accurate and address the full range of students who enroll.

7. Institutional data on student retention, persistence, and completion are accurate and address the full range of students who enroll.
D. Resources, Planning, and Institutional Effectiveness

1. The institution is able to meet its current financial obligations.

2. The institution has a prepared budget for the current year and the capacity to compare it with budgets and actual results of previous years.

3. The institution has future financial projections addressing its long-term financial sustainability.

4. The institution maintains effective systems for collecting, analyzing, and using institutional information.

5. The institution undergoes an external audit by a certified public accountant or a public audit agency that reports financial statements on the institution separately from any other related entity or parent corporation. For private institutions the audit is annual; for public institutions it is at least every two years.2

6. The institution’s administrative structure includes a chief executive officer, chief financial officer, and chief academic officer (titles may vary) with appropriate credentials and experience and sufficient focus on the institution to ensure appropriate leadership and oversight. (An institution may outsource its financial functions but must have the capacity to assure the effectiveness of that arrangement.)

2 Institutions under federal control are exempted provided that they have other reliable information to document the institution’s fiscal resources and management.
