EXECUTIVE SUMMARY

DUAL CREDIT IN U.S. HIGHER EDUCATION

A Study of State Policy and Quality Assurance Practices

THE PRIMARY OBJECTIVE OF THIS STUDY is to provide an up-to-date description of dual credit policy in all 50 states. This executive summary describes briefly the purpose, methods and descriptive results of the study, and relates the results to the purported benefits and drawbacks of dual credit courses. Finally, we consider implications of the study findings for assuring the quality of dual credit courses that are offered under the aegis of regionally accredited postsecondary institutions.

High school students have been able to earn college credits through a variety of programs over the last 50 years, but the growth of dual credit formats has expanded significantly since the 1980's. While dual credit takes many forms, this study focused on college-level courses (excluding AP and IB) offered in high schools, taught by a high school teacher or college instructor and taken by high school students.

This study addresses a gap in the literature on the intersection of state dual credit policies and quality assurance. Using a standard, input/process/output framework, we identified the following elements of regional accreditation agencies and National Alliance of Concurrent Enrollment Partnership (NACEP) standards by which to analyze state policy:

Quality Dimensions	Dual Credit State Policy Components
Inputs	Student eligibility, faculty credentials, funding, curriculum standards
Processes	General oversight, faculty orientation and training, institutional review and monitoring, state review and monitoring
Outputs	Learning outcomes, transferability, program and course outcomes

The research team developed an interview questionnaire based on the research questions:

- 1) **Course Provisions:** What types and forms of dual credit courses can or cannot be offered (e.g., subject matter or level)?
- 2) **Student Eligibility:** Who is and is not eligible to enroll in dual credit course offerings?

- 3) **Instructor Eligibility:** What criteria apply to instructors who teach dual credit courses?
- 4) **Other Quality Provisions:** What else is included in state policy that relates to assuring the quality of dual credit course offerings (e.g., review processes, accountability, oversight provisions, etc.)?
- 5) **Funding/Finance:** How does state policy shape who pays for or otherwise funds dual credit offerings (e.g., tuition, financial aid, direct enrollment funding, etc.)?
- 6) **Policy Enforcement:** How are state dual credit policies enforced?

The questionnaire was used to guide the review of state dual credit policies and semi-structured interviews with state officials in 47 of the 50 states in the summer and fall of 2012. A coding scheme was developed based on the questionnaires and applied for the analysis.

||| DESCRIPTIVE RESULTS

Terminology

Although various forms of what we are here labeling “dual credit” have been in existence for decades, the recent significant growth of this activity has led to a flurry of new programs and policy formulations. The lack of standards and conventions among states related to this short history includes inconsistency in basic terms and definitions and the use of multiple terms within states. The three terms that emerged as mostly interchangeable descriptors of the base activity were, in order of popularity: Dual Enrollment (22), Dual Credit (18), and Concurrent Enrollment (15).

Oversight, Scope, And Course Provisions

We found a variety of dual credit oversight arrangements among the states, with the plurality of states reporting that more than one state agency is involved in the oversight role. The majority of states reported that their policies pertain to the public sector and not to private institutions, although 15 states reported a broader scope that included the private sector. Most states also reported a scope including both four-year and two-year institutions, with a few focusing exclusively on the two-year sector.

Similar to existing literature, findings revealed substantial variation in state policy. A slim majority of responding states (26) indicated that

they have some statewide requirements regarding the types of courses that can or cannot be offered among dual credit offerings. Only five states require public colleges to offer dual credit courses but twice as many require high schools to have college course options available to their students and another seven encourage this provision.

Who Can Take Dual Credit And Who Can Teach Dual Credit?

Student eligibility provisions are fairly common in state policies, appearing in some form within 37 of the 47 states in the study (79%). The most popular provisions relate to the high school class level of eligible students. Nearly four of five responding states (37 of 47 or 79%) have some policy provisions regarding instructor eligibility. Most common among the provisions is that colleges and universities use the same standards in selecting instructors for dual credit courses as they do for courses offered on their own campuses. About half of the states that have student eligibility provisions also allow waivers and exceptions. Far fewer states (8) offer waiver or exception provisions for instructor selection provisions.

How Else Is Quality Assured?

Overall, most states are addressing quality concerns in some fashion beyond regulating student eligibility and faculty teaching eligibility. While many states view the accrediting process as their chief quality control measure, the majority of

states have policy provisions for annual or ad hoc accountability reporting. Eight (8) states either require or encourage NACEP accreditation in state policy.

Also somewhat related to ensuring quality, about half of the responding states have policy provisions that encourage or mandate partnerships between K-12 and higher education institutions and systems involved in offering dual credit courses. These partnerships are intended to encourage effective communication, instructor development, and curricular alignment.

To a lesser extent, state policies include a range of other quality assurance mechanisms such as references to course quality and rigor, secondary and postsecondary partnership regulations, outcome monitoring, and classroom visitations.

Who Pays For Or Otherwise Funds Dual Credit?

Funding policy of dual credit is similarly varied. Direct funding for dual credit courses is offered in 24 states. Four of those states and seven additional states have funding provisions for specific programs for targeted populations, targeted types of instruction, or for specific initiatives to improve dual credit instruction. Several states have provisions that make dual credit courses available or free to all students while many others offer discounted rates for tuition, fees and books. Within 20 states, where students are responsible for a portion or all of tuition, course fees, or textbook charges, provisions are made for either waiving those fees for targeted population or providing need-based financial assistance.

Enforcement Of State Policies

There is generally very limited language about enforcement provisions in state policy on dual credit courses. In many instances, state contacts referred to general compliance provisions and related incentives for all state policy. This was especially true for enforcement related to course offering provisions and quality assurance.

However, more specific enforcement provisions were cited by 10 states regarding student eligibility and 9 states regarding instructor eligibility.

||| CONCLUSIONS AND IMPLICATIONS

Terminology And Variation

The results of this study reinforce at least two continuing themes from past research on state policy and practice for dual credit: There is still no consensus or standardization regarding the terminology related to what we have been consistently labeling as “dual credit” courses; and there remains great variation among states along many dimensions of state policy for dual credit activity. The concurrent enrollment and dual credit arena would benefit from further efforts to develop consensus on terminology.

In many ways, our findings are consistent with those of earlier policy reviews regarding the large variation in state policy. We echo earlier conclusions that state policy ranges from non-existent to very detailed and add to that characterization that state policy is just as varied among the growing array of states that have detailed policies as it is between the detailed and the non-existent approaches. We also note a different aspect of variability that was illustrated by comparing results from prior studies to the current one: variability and change over time.

Earlier policy studies concluded that quality was underrepresented within state policy on dual credit activity. The current analysis demonstrates that this is no longer so. Through our discussion with state contacts, we believe that many state agencies have intentionally worked to strengthen policies and practices in this area and others have intentions to do so in the future.

Broadening Access And The Financial Conundrum

Results of the study highlight the conflict between two of the more potent forces impinging on the development and implementation of dual credit activity: the desire to significantly expand access especially to traditionally underrepresented populations; and the financial press that all states currently face during the slow recovery from the “Great Recession.” According to our contacts, well-intentioned attempts to pursue aggressively an access agenda have been seriously undermined by deep state budget cuts.

Emerging research evidence suggests that dual credit has more positive than negative impacts, on average. However, the evidence also reveals that there is variation on impact and some impacts are negative. Further, there is insufficient evidence to support the critical promise for improving postsecondary access and success for underrepresented students relative to more privileged and high-achieving students. Additional rigorous research is needed to contribute to the development of effective policies and practices, especially practice that can be tailored to the diverse array of students across the educational spectrum.

||| STATE POLICY AND THE PERCEIVED BENEFITS AND DRAWBACKS OF DUAL ENROLLMENT

Benefits:

- **Enhancing and Diversifying High School Curricula.** State policy plays a unique role in expanding or enhancing high school curricula by mandating or strongly incentivizing high schools and colleges to provide dual credit, but sufficient funding and resources are required to make this an attainable promise.
- **Increasing Access to Higher Education.** Although the predominant focus continues to be on the academically well-prepared

or at least moderately-prepared students, dual credit has been demonstrated to reach a broader population than do the Advance Placement (AP) or International Baccalaureate (IB) programs. Policy provisions for waivers and exceptions in about one-half of the states further support expanding the base of participation. Given the propensity of dual credit programs to serve moderate to well-prepared students, pursuing the access promise requires additional focus on dual credit programs that are specifically targeted to underrepresented populations.

- **Improving High School and College Relationships.** Dual credit activity can provide a vital communications link between high schools and colleges, especially if suitable attention is applied to developing and monitoring the required engagements. The provision of dual credit requires some degree of collaboration, but in some states, this level of collaboration is reinforced through state policy.
- **Shortening Time to Degree and Lowering the Cost of College.** The key to the relationship between dual credit and time to degree is the level to which dual credit courses prepare students to be successful in subsequent college work. Research related to this premise is mixed: dual credit can lead to better grade performance in college, but doesn't always do so. Ultimately, taking fewer college courses to reduce the cost may be less important financially than shortening the time to degree: student loan debt burden is more substantially impacted by taking longer to complete (and borrowing to cover living expenses) than by tuition costs.

Drawbacks:

- **Not Preparing Students for the Academic Rigor of College.** Among the common concerns of dual credit is the inadequate maintenance of academic rigor and the

concern that dual credit course content is not of collegiate quality and caliber. State policies generally rely on standards set by colleges rather than sweeping standards.

- **Inadequate Instructor Qualifications.** Instructor qualifications are a common feature of state dual credit policies. As with rigor, the issue of faculty credentials is closely related to the standards held by postsecondary institutions and the verification of these standards by regional accreditors. Some states specify a required degree level (typically a Master's degree) as well as subject matter expertise requirements.
- **Not Providing an Authentic College Experience.** Both the students taking and instructors teaching high school-based dual credit courses cannot completely disengage from the high school context that surrounds this experience. These conditions impose significant limitations on obtaining an authentic college course experience in a high school setting. Careful consideration should be given to the extent to which college-based dual credit or concurrent enrollment diminishes possibilities for the more authentic experience of taking a college course on a college campus.
- **Uncertainty of Course Transferability.** Many state policies have adopted language that includes a provision for dual credit transferability whereas others leave matters of transferability to the students, indicating that students themselves are responsible for knowing the transfer policies for the colleges and universities to which they seek admission. This range highlights further *course transferability* as a broader issue than one related just to dual credit.

||| DUAL CREDIT AND REGIONAL POSTSECONDARY ACCREDITATION

IN PHONE INTERVIEWS and other discussions with senior staff from six regional accrediting agencies representing five of the six regions, the level of concern expressed about dual credit courses was modest. However, the specific nature of concerns varied by region and level.

Dual credit courses are offered under the aegis of a postsecondary institution. Therefore, postsecondary institutions have ultimate responsibility for the quality of these offerings and regional accreditation has an interest in this process. Regional accreditation focuses primarily on the academic integrity of postsecondary programs and, more broadly, the institutions that offer these programs. In their current form, dual credit courses are not related to academic programs in a way that place them into consistent focus within regional accreditation review processes. However, consistency in course requirements and the assessment of student learning across instructional locations and teaching modalities, along with the availability of student support systems, are important accreditation concerns with direct linkages to dual credit activity. Additional considerations are explained in the paragraphs that follow.

Mission And Delivery

Dual credit programs provide an opportunity for postsecondary institutions to expand their reach and their market. As such, concern was expressed that institutions approach these opportunities in clear alignment with their missions.

Dual credit was more generally recognized as one of several emerging modes of instructional delivery that is stretching the attention and resources of institutions more thinly. Recent reformulations of accreditation standards have more explicitly accommodated distance/online

learning but this level of explicitness has generally not yet been applied to the dual credit realm.

Partnership Contracts

With regard to contractual arrangement, the interviewees were not particularly concerned that the dual credit realm will introduce particular problems, given that the partner is accredited through parallel processes and generally shares the same educational quality values. However, there was some concern regarding how well state policy requirements align with accreditation standards. Interviewees recognized that postsecondary institutions can be put into a difficult position if they must comply with poorly aligned standards from two authorities.

Faculty Qualifications

This same concern was raised in relation to faculty qualifications. Although specific criteria for faculty selection, professional development and evaluation are not set through accreditation standards, they require that institutions have standards appropriate to their mission and apply these standards consistently. A number of states have in place more prescriptive requirements regarding instructor credentials as well as selection and professional development processes. Regardless of whether these criteria conflict with the appropriateness of the postsecondary institution's standards, they may introduce potential inconsistencies in the application of the standards. Specifically, they may require postsecondary institutions to apply different standards for dual credit courses than they do for other courses.

Accountability

A final concern expressed by the interviewees was related to the growing accountability demands on both accrediting agencies and postsecondary institutions that stretch the boundaries of the traditional focus on core postsecondary academic program integrity issues. These demands may require expanding the scope and purview of accreditation review processes. All of this has the potential to add to the cost and resource requirements of accreditation, which induces additional overhead on institutional operations.

INTRODUCTION

DUAL CREDIT IN U.S. HIGHER EDUCATION

A Study of State Policy and Quality Assurance Practices

FOR OVER 50 YEARS, U.S. high school students have been able to earn college credits through a variety of enrichment programs. The College Board's Advanced Placement (AP) program, established in 1955, and the International Baccalaureate (IB), established in 1968, have provided high achieving students opportunities to qualify for college course credit and placement out of introductory course requirements and into advanced level college classes, based on their performance on standardized end of course assessments. Higher education institutions have also allowed high-performing high school students to enroll in on-campus, college courses and, starting in the early 1970s, some institutions developed formal programs to expand course availability, location choices, and participation levels (Fincher-Ford, 1997). The establishment of these programs marked a notable departure from the exam-based AP and IB programs, with the awarding of college credit depending solely on student grade performance in the course.

Labeled most frequently dual credit, dual enrollment or concurrent enrollment, the growth of such programs expanded notably in the 1980s. Minnesota's 1985 Postsecondary Enrollment Options (PSEO) Act, recognized as one of the first instances of state-level dual credit legislation, allowed 11th and 12th graders who qualified for admission to take college courses at state expense (Kim, 2008). Growth of these programs continued through the 1990s. By the 2000s, interest in opportunities for high school students to obtain college credit became even more acute prompted

by at least three concurrent issues: the increasing importance of a higher education degree for economic security and social welfare; low and seemingly intractable degree completion rates; and the rising costs to students for attending college and the attendant growth of college loan debt. Interest has also grown substantially in expanding the participation base in these programs beyond the academically gifted students for which such opportunities were originally developed, toward increasing access among populations that are traditionally under-represented

¹ We examine similarities and differences between these definitions but use the term 'dual credit' for consistency throughout the report, unless an alternative term is directly quoted in a policy title, policy language or the literature.

“We selected as a core focus of this study the form of dual credit wherein college-level courses are offered in high schools...”

within higher education institutions and especially under-represented among college degree recipients.

The availability of and student participation in dual credit courses has grown even more substantially in recent years. Based on surveys of public high schools commissioned by the National Center for Education Statistics (Thomas et al., 2013; Waits, et al., 2005,) between 2002-03 and 2010-11:

- Dual credit enrollments increased by 75% from an estimated 1.16 million to 2.04 million;
- The percentage of public high schools offering dual credit courses increased from 71 to 82; and
- High schools continue to be the predominant location for dual credit courses, accounting for 77 percent of dual credit enrollments in 2010-11, up from 74 percent in 2002-03.

State educational agencies at both the postsecondary and K-12 levels have developed substantial programs often connected to state legislation that seeks to promote growth and control quality and costs. Research regarding the efficacy of these programs is beginning to expand and to include more rigorous methods. The developing body of evidence shows mixed results but generally seems to indicate that the courses do more good than harm but that there is

also great variation in rigor and impact. There are many competing ideas regarding the benefits and drawbacks of dual credit courses as well as about how best to ensure that existing and new programs deliver maximum benefits and incur minimum liabilities.

As one of six regional institutional accreditors in the United States, the Higher Learning Commission (HLC) of the North Central Association of Colleges and Schools initiated this study to explore the current status of state policies and practices related to dual credit courses. Similar interests among the other regional agencies and additional support from the Lumina Foundation led to an expansion in scope of this study to the national level.

To conduct the study, a team of three research interns were recruited from within the HLC region and a professor of educational leadership and policy studies who specializes in higher education institutional and program performance assessment was selected to lead the team through the process. The team developed a questionnaire protocol to interview and collect information from appropriate contacts in all states. Interviews were conducted with senior staff members from the regional accrediting associations to help frame the study and determine priority interests.

||| STUDY OBJECTIVES

THE PRIMARY OBJECTIVE of this study is to provide an up-to-date description of dual credit policy in all 50 states and to consider the implications for assuring the quality of dual credit courses that are offered under the aegis of regionally accredited postsecondary institutions. Toward this end, the research team identified a set of research questions intended to unpack state policy related to the quality of dual credit courses. Specifically, these questions investigated how state policy shapes:

- 1) what types and forms of dual credit courses are offered;

- 2) who is eligible to enroll;
- 3) who can teach;
- 4) how the quality of instruction and its impact on student success are monitored;
- 5) who pays for or otherwise finances the activity; and
- 6) how policies and practices are enforced.

||| SCOPE OF INTEREST

THE PANOPLY OF TERMS used to describe what we are here referring to as *dual credit courses* masks significant variations in forms the activity takes. These activities can be physically based on college campuses, within high schools, at community centers, or through online delivery. Uniformly these courses offer college-level credit (although the transferability of that credit is an issue), but the concurrent provision of credit toward a high school diploma is not universal. Moreover, high school students enrolled in these courses may, in some instances, pursue only high school credit. By virtue of offering college-level credit, the instructors who teach these courses are, by definition, “college-level instructors.” However, many but certainly not all of them are also high school teachers.

We selected as a core focus of this study the form of dual credit wherein college-level courses are offered in high schools, taught by a high school teacher or college instructor and taken by high school students. Aware that state policies often cover a wider range of dual credit activities and that states vary greatly in the prevalence of this particular form relative to others, we described this scope to those we interviewed as the model for our inquiry but not the exclusive focus. That is, we wanted to ensure that we obtained information about the policies and practices that cover this type of activity, knowing that policies might also cover forms that range from highly similar (e.g., a college instructor coming to the

high school to teach the course) to fairly dissimilar (high school students attending courses at area colleges in classrooms that include both secondary and postsecondary students). Because the regional accrediting agencies were particularly interested in college-level courses on high school campuses, we focused on policies relevant to the high school delivery location, regardless of whether they applied to other settings, and excluded state policies relevant only to the college delivery location.

BACKGROUND AND CONTEXT

||| DEFINITIONS, FORMS, AND PREVALENCE

AS A RELATIVELY RECENT ADDITION to the spectrum of educational practices, approaches and terminology to describe high school student enrollment in college-level courses vary greatly. The lack of standardized language imbues a level of confusion as different terms are often used to describe similar activities and similar terms to describe very different activities.

Definition

States define dual credit differently and use different terms based on local context and the specific features of dual credit, which also vary considerably across the states (Clark, 2001; Farrell & Seifert, 2007; Golann & Hughes, 2008; Hoffman & Robins, 2005; Hoffman, 2005; Hugo, 2001; Karp et al., 2005; Michelau, 2001). Within the relatively small but growing literature on the topic, definitions vary according to the credit awarding status and physical (or virtual) location of courses (e.g., Andrews, 2001; Burns & Lewis, 2000; Hunt & Carrol, 2006; Kim, Barnett, & Bragg, 2003; Kleiner, Lewis, & Greene, 2005; Michelau, 2001; Mokher & McLendon, 2009, Torres, Zerquera, & Park, 2011). Among these different definitions, one consistent element is that the course is college-level and at least some of the enrolled students are concurrently pursuing a high school diploma. As noted, the current study focuses on high-school located courses for which students receive college credit and often high school credit as well. The identification and definition of terminology was included in the study interview and so will be discussed further in the results section of this report.

Forms

As reflected in various definitions, dual credit programs and courses are offered in various forms (Kleiner et al., 2005). For instance, instructional location can vary, and dual credit can be offered at high school campus, the college campus, a community center, or online. Dual credit faculty can vary, and courses can be taught by a high school instructor, a college instructor, or both. There is also variation in the subject disciplines with a common distinction between an academic and career/technical focus. Remedial or developmental courses are often explicitly excluded from the domain of dual credit coursework since those are generally not considered to be college-level courses. Student eligibility requirements vary widely, including criteria related to high school GPA, standardized test scores, college placement test scores, high school class rank, or other course pre-requisites.

Bailey and Karp (2003) created a typology for credit-based transition programs, of which college-level courses were a feature of most programs. Specifically, they identified three categories: a) singleton programs, referring to stand-alone college-level courses; b) comprehensive programs, that subsume most of a student's academic experience (such as "Early College" and "Middle College" programs); and c) enhanced comprehensive programs, referring to the programs that offer students college coursework coupled with guidance and support to ensure student success in postsecondary education.

Allen (2010) offered a set of characteristics for defining dual credit activity and distinguishing it from other forms of college credit seeking options for high school students:

- a) dual enrollment students earn college credit by successfully completing a college

- course, rather than by passing an exam as with AP;
- b) courses may be taught during the school day, evenings, weekends, on or off campus, as a regular college course, or specially adapted to the high school's objectives;
- c) students are typically admitted as non-degree students to the postsecondary institution offering the dual enrollment course; and
- d) because these courses are the same as those offered on college campuses—usually the same syllabi and textbooks—high schools and colleges do not need to engage in a process of matching competencies, such as that done for some Tech Prep and other articulation agreements (p, 1).

Prevalence

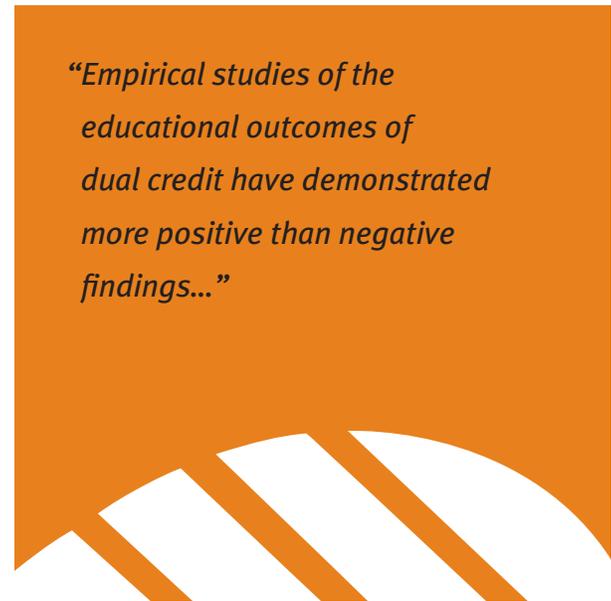

We did not include within this study the collection and analysis of data regarding the prevalence and relative frequency of high-school based college courses relative to other forms of dual credit. As part of their Fast Response Survey System, The U.S. Department of Education's National Center for Education Statistics (NCES) recently released the first set of results of a follow-up study on dual credit activity for the 2010-11 academic year (Thomas, Marken, Gray, & Lewis, 2013). As noted above, the new data indicated a 75 growth in dual credit enrollment from the levels reported in their earlier studies reflecting 2002-03 (Kliener, Lewis, & Greene, 2005; Waits, Setzer, & Lewis, 2005).

In their study of credit-based transition programs, Bailey and Karp (2003) observed that dual credit experienced the most growth among the various programs they reviewed. In a separate national study of academic pathways that span secondary and postsecondary education, Bragg,

Kim, and Barnett (2006) found that dual credit was the most prevalent among the nine academic pathways they studied. These studies all demonstrate that dual credit courses offered at high schools is the most prevalent form of access to college-level courses available to high school students.

||| PROMISES AND PITFALLS

THE LITERATURE ON DUAL CREDIT discusses both purported benefits and prospective drawbacks of dual credit courses (Andrews, 2000, 2004; Bailey & Karp, 2003; Boswell, 2001; Burns & Lewis, 2000; Clark, 2001; Hoffman, 2005; Hunt & Carrol, 2006; Kim, 2008; Santiago, 2011). These characterizations are critical for the current study because they describe the conditions and outcomes that developers of policy and practice aspire to create, as well as the concerns and problems that they seek to avoid. These objectives (producing promises and avoiding pitfalls) provide the lens through which we will subsequently analyze current policy and practice in relation to quality assurance concerns.

“Empirical studies of the educational outcomes of dual credit have demonstrated more positive than negative findings...”

Promises

The primary objectives of dual credit courses are:

- Introduce more diverse and challenging courses into the high school curriculum;
- Broaden academic opportunities and course options for students in high school especially in the last year (that is, decrease opportunities for “senioritis”);
- Expose students to vocationally-oriented courses specifically and focus on students’ obtaining technical and vocational skills not offered by the high school;
- Enhance student success while in high school;
- Facilitate the transition from high school into postsecondary education (social and psychological aspects) and prepare students for the academic rigors of college;
- Increase college aspirations;
- Expand higher education access to underrepresented groups of students;
- Shorten students’ time to an associate’s or baccalaureate degree;
- Lower the cost of college education; and
- Promote relationships between high school teachers and college instructors to foster curricular alignment.

Empirical studies of the educational outcomes of dual credit have demonstrated more positive than negative findings, including: improved high school grades and completion rates; increased college-going rates; improved transitions to college (academic, social and psychological preparation); higher college enrollment, grades, and persistence rates; and lower costs (Adelman, 2006; An, 2009; Andrews, 2004; Eimers & Mullen, 2003; Farrell & Seifert, 2007; Golann & Hughes, 2008; Karp et al., 2007; Karp & Hughes, 2008; Kim & Bragg, 2008; Lerner & Brand, 2006; McCauley, 2007; Smith, 2007; State Board for Community and Technical Colleges, 2008).

Studies have also demonstrated that dual credit is available to a broader range of students compared to AP, which targets academically

gifted student and therefore provide more benefits to under-represented groups, especially males and low-income students (An, 2009; Golann & Hughes, 2008; Karp et al., 2007, Hoffman et al., 2009.).

Included within these studies is the common critique that many do not sufficiently control for selection effects. That is, although dual credit courses offer broader access when compared to AP and IB courses, they still attract a generally more well-prepared population of students than among those who do not enroll in any postsecondary enrollment options while in high school. Indeed, selection criteria for dual credit courses often preclude traditionally under-represented students from doing so. Some recent studies that have employed the most rigorous controls to date continue to find positive effects but the overall effects are somewhat mitigated and results sometimes mixed. For example, in a study of a vocationally oriented “Concurrent Course Initiative” in California, Hughes et al. (2012) reported that, although overall effects of dual credit were generally positive, there was great variation among programs. From this variation, they discerned several conditions that promote positive outcomes, including: strong connections and integration between high schools and postsecondary institutions; embedding dual enrollment within career-focused learning communities; and making the class an “authentic college experience” (e.g., on a college campus, taught by college instructors, and mixing high school and college students). Another rigorous study employing multilevel modeling to control for selection effects among students attending any Indiana University campus (ranging from the traditional to the urban and commuter campuses), Plucker et al. (2011) found that better-prepared students received no benefit from dual credit participation (i.e., they do well no matter what), but less well-prepared students among those who take dual credit courses, benefit with increased credit

accrual and higher persistence rates, but appear to suffer some negative grade consequences.

Pitfalls

Despite the documented benefits of dual credit courses, concerns are frequently cited by scholars and practitioners. For example, some have indicated that dual credit courses fail to maintain the academic rigor of their equivalent courses taught on college campuses (Andrews, 2000; Boswell, 2001; Windham, 1997). In particular, it has been noted and, to some extent demonstrated that dual credit courses offered on high school campuses by high school instructors (the primary focus of this study) do not offer the level of rigor and, more importantly, the environmental authenticity of those same courses offered on college campuses (Clark, 2001). Differences in the level of teacher certification required for secondary and postsecondary instructors have also been indicated as a possible obstacle to securing qualified instructors for those courses (Andrews, 2000; Boswell, 2001; Golann & Hughes, 2008; Hugo, 2001; Windham, 1997).

Others have raised concerns about the transferability of credits earned, particularly for dual credit courses offered by community colleges. While accepted for credit at community colleges, these courses may not be accepted for credit should students transfer to a four-year institution (Boswell, 2001). Another concern is that college admission officers often give preference to other programs such as AP or IB and sometimes doubt that the quality of high school courses and college courses are equivalent (Clark, 2001; Hunt & Carroll, 2006).

Collaboration between the secondary and postsecondary contributors (e.g., formal structures that link secondary and postsecondary institution) and whether dual credit actually reduces costs or time to degree have been cited as additional concerns. Researchers in particular, have questioned whether the existing research has been sufficiently rigorous regarding the impact of dual

credit courses on subsequent student academic success. Other issues appearing in the literature include: assessment and evaluation of dual credit programs and courses, the impact of selection criteria on reaching students who could benefit most (e.g., high need students), funding sources and practices, consistency of policies, processes for awarding credits, and marketing to students and parents (Farrell & Seifert, 2007; Golann & Hughes, 2008; Hoffman et al., 2009; Kim et al., 2003; Kim, 2008; Torres et al., 2012).

||| PRIOR POLICY REVIEWS

SEVERAL NATIONAL STUDIES have reviewed state dual credit policies (Bragg et al., 2006; Education Commission of the States, 2008; Karp et al., 2004, 2005; Western Interstate Commission for Higher Education, 2006). Among other things, these studies illustrate the variation in dual credit policies, both in terms of approach and substance. Karp et al. (2005) analyzed dual enrollment policies in all 50 states and found 40 states with dual enrollment legislative or regulatory policies. Their analysis revealed variation along the following 10 policy features: prescriptiveness (mandatory or voluntary), approach to oversight (financial reporting, policy compliance, or quality control), target population, admission requirements—student age, admission requirements—academics, location, student mix, instructor, course content, tuition, and funding. In their 2004 report, Karp et al. (2004) noted that state policy “ranges from non-existent to very detailed,” and that policies related to student admission and finance were most prevalent while program structure was the least regulated (p. 30). Among the explanations they offer for policy variation is differences in policy goals that target academically advanced students and those that target a wider range of students. Related to quality, the authors also recommended that policies seek ways to “ensure the rigor of dual enrollment quality”

(p. 32). They noted that policy mechanisms such as faculty professional development and regulating course offerings are uncommon in state policy.

The Western Interstate Commission on Higher Education state policy study (WICHE, 2006) reported dual enrollment in state statute or board policy in 42 states. The study focused on six dimensions of dual enrollment: program eligibility, application of course credit, carrying the cost burden, information sharing and counseling, institutional accountability, and incentives for success. Program eligibility was found to be the most common policy dimension with 30 states having some minimum eligibility requirement and four state policies recommended eligibility requirements or required local agreements that articulate these requirements. Also related to quality is what WICHE describes as the institutional accountability dimension of state policy. They identified ten states as having institutional accountability mechanisms in state policy and provided examples of these mechanisms that range from annual reports to the legislature (Arizona), to joint accountability responsibilities for at risk students (Nebraska), to inclusion of dual credit metrics in school performance reports (Utah).

Two salient themes that emerge from these studies and others are that there is large variation in state policy and that ‘quality’ is an underrepresented and understudied characteristic of state policy. A thorough review of dual credit quality is found in a more recent report from the National Alliance of Concurrent Enrollment Partnerships (NACEP), a national voluntary accreditation organization for dual credit programs and courses. In the report, Lowe (2010) described efforts underway in six states to oversee dual credit programs and align practice with quality standards. Lowe observed seven strategies for overseeing dual enrollment programs in these states including: program approval, periodic program reviews, student outcome analysis, regular collegial meetings, course approvals, review of district/college MOUs, and annual reporting. Each

“Researchers in particular, have questioned whether the existing research has been sufficiently rigorous...”

of the seven states implemented at least two of these strategies, and annual reporting was the most common practice observed in five of the six states. Despite this study and the state policy studies, the literature has yet to provide an empirical analysis of dual credit state policies from a quality perspective.

||| ASSESSING QUALITY

THIS STUDY ADDRESSES A GAP in the literature on the intersection of state dual credit policies and quality assurance. Toward this end, we provide an organizing framework to conceptualize and operationalize quality in the context of dual credit. We derive this framework from the literature on performance indicators in the U.S. and European context. Specifically, Borden & Bottrill (1994) describe an Input-Output-Process model to establish a balanced approach to quality assessment, arguing that outcomes and objectives must be assessed in relation to the inputs upon which and the processes by which programs operate. Relatedly, Westerheijden (2007) contends that educational quality is measured in two ways: “through fixed procedures, often quantitative, associated with performance indicators, or through the intrinsically subjective process of peer review” (p. 80). He suggests that many

educational quality assessment schemes use performance indicators that include inputs, processes, throughputs, and outputs.

Based on this framework, we examined the accreditation standards of all six regional

accreditation agencies and NACEP standards and identified the key input, process, and output elements by which to assess state policy. These elements are as follows:

Quality Dimensions	Dual Credit State Policy Components
Inputs	Student eligibility, faculty credentials, funding, curriculum standards
Processes	General oversight, faculty orientation and training, institutional review and monitoring, state review and monitoring
Outputs	Learning outcomes, transferability, program and course outcomes

METHODOLOGY

THE RESEARCH TEAM developed an interview questionnaire (Appendix 1) based on the project research questions:

- **Course Provisions:** What types and forms of dual credit courses can or cannot be offered (e.g., subject matter or level)?
- **Student Eligibility:** Who is and is not eligible to enroll in dual credit course offerings?
- **Instructor Eligibility:** What criteria apply to instructors who teach dual credit courses?
- **Other Quality Provisions:** What else is included in state policy that relates to assuring the quality of dual credit course offerings (e.g., review processes, accountability, oversight provisions, etc.)?
- **Funding/Finance:** How does state policy shape who pays for or otherwise funds dual credit offerings (e.g., tuition, financial aid, direct enrollment funding, etc.)?
- **Policy Enforcement:** How are state dual credit policies enforced?

A preamble to the questionnaire included a discussion of definitional issues, especially related to the use of the term “dual credit” within the study to capture primarily college-level courses offered in high schools to high school-level students. Provisions were made to accommodate policies that pertain specifically to these types of courses even if the policies also applied to other modes of delivery through which high school level students can attempt college-level courses (e.g., by distance learning or on a college campus). However, policies applicable only to high school students who participate in college-level courses on a college campus were not considered in this study. State documents were reviewed to identify official terms and their definitions and the contacts were asked to verify the terms in common

use in their state for this and related types of course offerings.

The preamble to the questionnaire also provided a definition of state policy: “written policy such as state legislation, state board or agency guidelines or procedures, or other state-mandated written policies.” Institutional-level practice or policy was specifically mentioned as not being within this domain. We also limited our inclusion of state policies to policies specific to dual credit. In other words, many if not most states have policies that apply to all college-level activities, but our focus was on policies that were written in the context of dual credit. Further, it is relevant to note that this study focused on written policy and not the realization of written policy or policy implementation. In other words, we only studied what policies say and not how policies are enacted (although we did ask about how policies are enforced).

A list of state contacts was developed in spring 2012, consisting primarily of the CEO and chief academic officer at state agencies that were known to or could possibly play an oversight role in relation to dual credit courses. These included higher education boards and commissions, sector agencies (e.g., statewide university, state college, and community college agencies), K-12 education departments, and workforce education agencies. An initial solicitation message from the HLC President to the CEOs of each agency, informed them of the study and asked them to identify one or more primary contacts who would be subsequently contacted, first by email and then by phone to review the interview questions.

As the list of state contacts was being established and initial contacts made, the research team identified and analyzed publicly available documents containing state policies, consumer

information, procedural guides and other relevant information. These documents were identified through web site and library searches as well as through networking with individuals and organizations that have collected such documents. Based on these documents, the researchers completed as many of the questionnaire items as possible. The pre-filled questionnaires were emailed to the state contacts for their review and served as the point of departure for the phone interviews with state contacts.

Successful contacts were established and responses received from 48 of the 50 states, with Rhode Island and Utah being the only two non-respondents. Among the responding states, Pennsylvania was in a period of transition. A fairly comprehensive set of policies related to a program established by a former governor had been recently defunded under a new administration and therefore was no longer in effect. For this reason, responses for Pennsylvania were not included in the analysis and the analysis is based on 47 completed questionnaires.

Between spring 2012 and early fall 2012, researchers conducted 1- to 2-hour phone calls with state contacts to thoroughly review the questionnaire responses, identify and integrate additional state policies, and complete the questionnaire. In addition to obtaining a response on each item, the researchers identified segments of state policy through the document analysis and solicited comments from contacts to further qualify and describe pertinent policy. All information acquired from the questionnaire and subsequent contacts is compiled into the detailed state response reports that are included in Appendix 3.

Most items on the questionnaire were closed-ended questions with “yes/no” binary response and accompanied by an open-ended field for comments and policy language. For many questions, we anticipated that a binary coding scheme would be inadequate and state contacts noted that the policy situation in their state did not conform well to a simple “yes/no” response.

For the majority of questionnaire items, a response coding scheme was developed to more effectively capture the broad sense of state policies and respondents’ explanations. The responses were coded as follows:

- 0 = No mention is made in state policy
- 1 = State policy includes mention of the subject but does not require, encourage or recommend criteria or processes of any particular kind
- 2 = State policy has provisions that **encourage (incentivize) or recommend** criteria or processes that **apply to all** dual credit offerings at least within a sector (e.g., community colleges)
- 3 = State policy has provisions that **require** criteria or processes that **apply to all** dual credit offerings at least within a sector
- 4 = State policy has provisions that **encourage or recommend local criteria** or processes be developed and implemented
- 5 = State policy has provisions that **require local criteria** or processes be developed and implemented at least within a sector
- 9 = Not applicable

Several items required unique response categories. For example, sections on students, faculty, quality assurance, and funding/finance in the questionnaire ended with a question about enforcement provisions, for which the responses were coded as: 0 = no enforcement in place; 1 = there are general enforcement provisions that pertain to most policies; and 3 = there are specific enforcement provisions for these particular policies. A few items required response categories to reflect that a policy could allow or prohibit an activity (e.g., allowing or prohibiting students taking dual credit courses for only high school or college credit but not both). Further details of the coding of responses are provided in the results section.

To establish consistency in coding, several meetings were held and email messages shared

“...this study focused on written policy and not the realization of written policy or policy implementation.”

among members of the research team to discuss specific cases that were questionable. In addition, the coded responses were assembled into a report template that was sent to state contacts for their review and verification. The resulting responses were therefore developed through an iterative process involving initial responses, deliberation among the research team, and review of the re-coded responses by the state contacts.

In addition to the formal and lengthy interviews and interactions conducted with the state agency contacts, the leader of the research team had less structured discussions with representatives of the regional accrediting agencies who represent the target audience for this project. These discussions were used to help shape the core interviews, frame the analysis, and identify areas of concern for discussing the results of this study and their implications for accrediting agency deliberation. As such, the findings from these discussions are not formally analyzed but referred to more generally throughout the final discussion.

||| ANALYSIS OF RESPONSES

THE ANALYSIS BEGINS WITH A BRIEF SECTION on the terms and definitions currently in use in state policies and procedures for what we are referring to in this report as dual credit

courses. The remainder of the analysis focuses on the coded responses to the interview questions.

Based on initial item frequency analysis the default response categories were further collapsed into four reporting categories that reflect an overall level of prescriptiveness: a) statewide requirement; b) local requirement; c) encouragement (either statewide or local); and d) all other responses (no mention, non-specific mention, or not applicable). One can conceptualize this scale as a continuum with ‘statewide requirement’ at the highly prescriptive end of the spectrum and ‘all other responses’ at the non-prescriptive end of the spectrum.

Responses based on other formats were mapped to this general ordinal representation from the highest to lowest levels of prescriptiveness and used to compute item frequencies. In the results section that follows, the item frequencies are first reviewed in relation to the primary research questions. We complement the item frequencies with multiple examples from state policies that illustrate the variation in state dual credit policies. The states are then arrayed graphically for each segment of items (course offerings; student eligibility; instructor eligibility; other quality provisions; and funding/finance) in terms of the “high to low prescriptiveness” scale.

Report appendices include: 1) a copy of the interview questionnaire; 2) brief policy summaries for each state; 3) detailed state response reports; 4) a composite listing of all collected web links related to dual credit policy and procedures, consumer information, implementation guidelines, and other related information; and 5) An annotated bibliography, which includes all sources cited in this report as well as other pertinent publications and resources of potential interest to those who wish to delve further into this topic.

RESULTS

Although various forms of what we are here labeling *dual credit* have been in existence for decades, the recent significant growth of this activity has led to a flurry of new programs and policy formulations. The lack of standards and conventions among states related to this short history includes inconsistency in basic terms and definitions. While assembling background documents and state policy examples, we uncovered several core terms that were in use as well as a variety of program labels, some of which had common themes. Through the document analysis and interviews we identified nearly 100 terms, some of which were intended as descriptions of the core activity (college-level courses in which high school students could enroll) and others were selected to label or describe a program or initiative.

Table 1 lists the terms for the core activity as well as names for related programs and initiatives that were found in state policy and procedure. The three terms that emerged as mostly interchangeable descriptors of the base activity were, in order of popularity: *Dual Enrollment*, *Dual Credit*, and *Concurrent Enrollment*. We analyzed these three terms looking for similarities and differences based on published definitions or definitions provided by state contacts. Sometimes, careful distinctions were intended most often with the term *dual credit* reserved for instances when a student receives both high school- and college-level credit from a single course. The terms *concurrent enrollment* and *dual enrollment* were also used for situations in which high school and college credit are awarded, but they were also used more generally to refer to students being simultaneously enrolled in courses at the high school and college levels, with dual enrollment slightly more likely to be used when the student

Table 1. Terms and Program Names in State Policy

Term	Frequency
Dual Enrollment	22
Dual Credit	18

only received college credit. Examining other characteristics of term usage, like location of the course, the type of instructor, and other course characteristics, revealed no other consistent distinctions among these three most common labels.

The term *credit* appeared in only two other terms used to refer to a variety of ways in which high school students can earn college credit, that is, *Accelerated Credit* and *Transcribed Credit*. It also appeared in one program name, *College Credit in High School*. *Enrollment* appeared as part of several terms, such as *Joint Enrollment* and *Cross Enrollment*, as well as in program names, like, *Early Enrollment Courses*. Because of the national *Early Colleges* initiative (of which we found four state program-named initiatives), the term *early* is also used in several other combinations, such as: *Career Early Admission*; *Early Admission*; *Early Enrollment Courses*; *Early Entry*; and *Early Start*.²

As expected, program names tend to be unique as the developers seek to “brand” their efforts in distinguishing ways. Only two such program names appeared in more than one instance: *Postsecondary Enrollment Options*, and *Running Start*. Program names sometimes relate to broad initiatives, like the two just mentioned, and at other times to narrower types of offerings or to a financial assistance program, like the *Dual Hope Grant Program*. Still others are branded with the state’s name or postal abbreviation, such as *Maine Aspirations* and *IDEAL-NM*.

||| ITEM FREQUENCIES

General Oversight And Scope

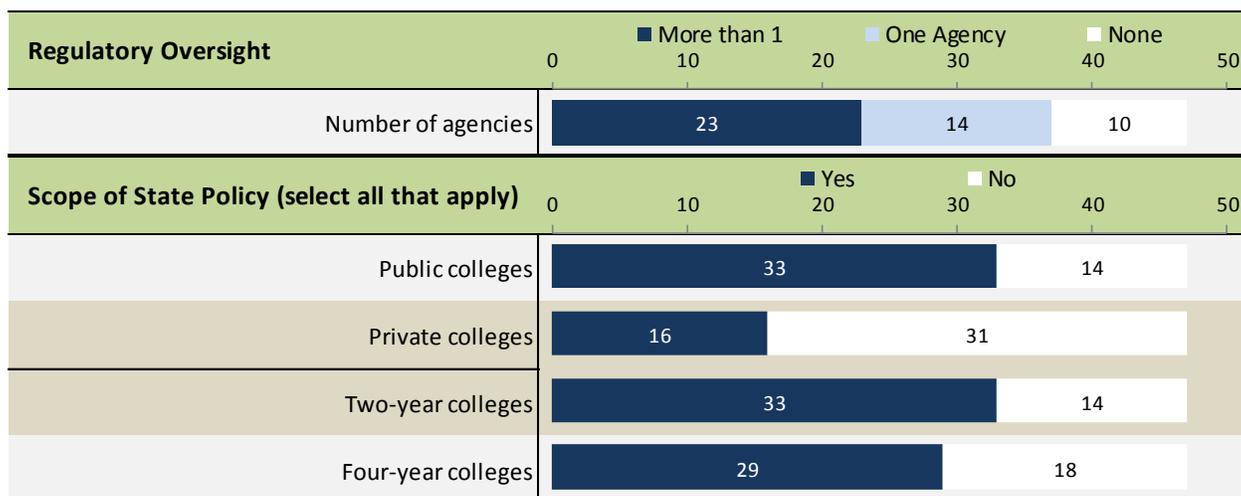

The first few questionnaire items related to the general oversight and scope of dual credit policy. The first panel of Display 1 reveals the variety of dual credit oversight arrangements among the states, with the plurality of states reporting that more than one agency is involved in the oversight role. In many cases, oversight bridges K-12 and higher education agencies. However, in states with multiple higher education agencies, such as with California’s three-tiered system, oversight is often shared and sometimes segmented, as in Connecticut, where separate policies pertain to the Community College, State College, and University sectors.

No oversight agency was reported in 10 states, including one in which the Board of Regents, although being constitutionally recognized as determining state policy for higher education institutions in the state, claimed that their fairly extensive dual credit policies that pertain to all public universities should not be represented as state policies.

The majority of states reported that their policies pertain to the public sector and not to private institutions, although 16 states reported a broader scope that included the private sector. Most states also report a scope including both four-year and two-year institutions, with a few focusing exclusively on the two-year sector.

² In many states, Early and Middle College High Schools are unique programs. This analysis does not consider or explore the relationship between state policies and Early and Middle College High Schools.

Display 1. Regulatory Oversight and Scope of State Policy

Course Provisions

A majority of responding states (27) indicated that they have some statewide requirements regarding the types of courses that can or cannot be offered among dual credit offerings (Display 2). One additional state, Louisiana, included a “local requirement” specifically stating that, “Both the secondary and postsecondary institutions shall jointly determine the appropriate level of course content.” Six other states provide some recommendations but fall short of promulgating a statewide requirement. Some general provisions were fairly elaborate, like in Michigan, which allows, “any course...that is not a hobby craft or recreational course; and that is in a subject area other than physical education, theology, divinity, or religious education.” North Carolina state policy provides that the courses should provide, “academic transition pathways for qualified junior and senior high school students that lead to a career technical education certificate or diploma.” Alternatively, Indiana has a ‘priority course’ list which gives preference to dual credit courses that fulfill core high school graduation requirements for honors or technical diplomas.

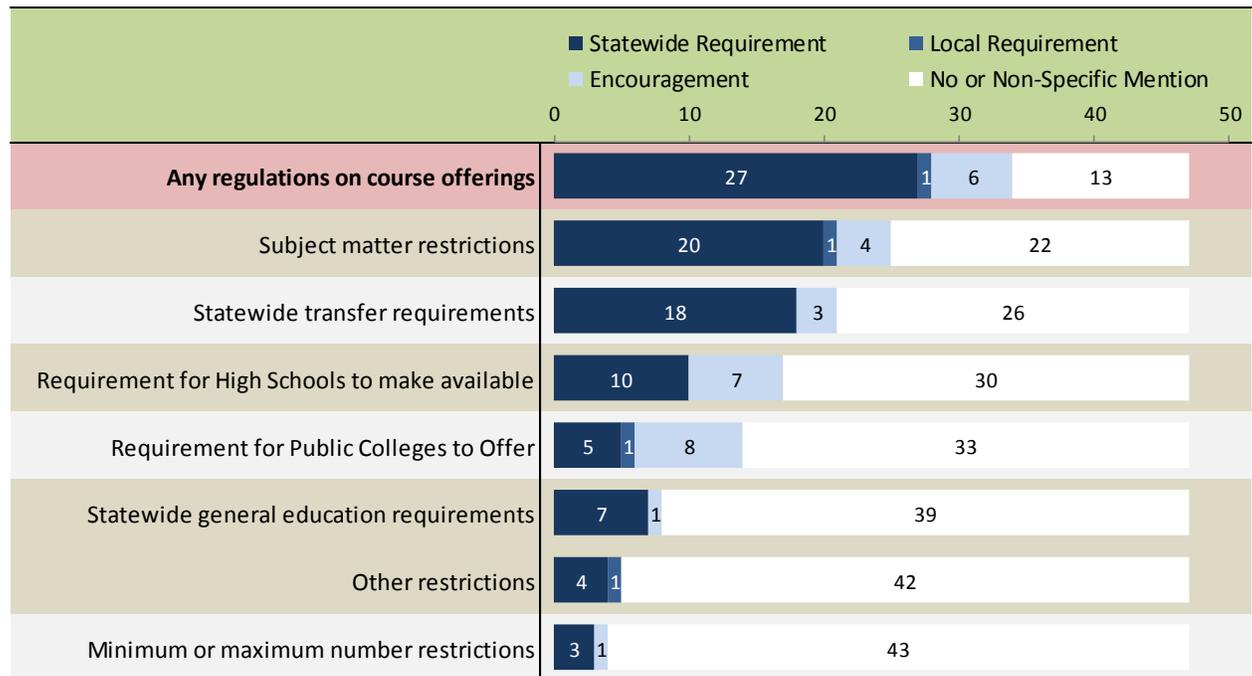

The most common type of course provisions relate to subject matter. For example, many states, such as Massachusetts and Georgia, explicitly

prohibit remedial or developmental courses. Similarly, Oklahoma requires that students participating in concurrent enrollment may not enroll in remedial or developmental courses. As a more general example that further connects to funding, Kansas policy provides: “Remedial/developmental course work or course work that does not apply to a Regents’ approved degree program at the postsecondary partner institution in a [concurrent enrollment partnership] agreement is not considered appropriate for college-level credit or eligible for financial reimbursement.” A number of states specifically tie requirements to statewide transfer articulation initiatives, or where applicable, statewide general education initiatives. South Carolina limits the subject matter of dual credit offerings to “general education courses offered through South Carolina’s two- and four-year public institutions of higher education and technical education courses offered by the technical colleges and in a very few instances, by four-year public institutions.” Similarly, Arkansas requires, “the course must be listed in the Arkansas Course Transfer System of the Department of Higher Education.” In Indiana, courses must either be part of the statewide core transfer library, or part of articulation agreements between public universities

that “draw from liberal arts and the technical, professional, and occupational fields.” Other types of explicitly prohibited subjects include physical

education courses (e.g., California, Michigan) and “non-sectarian” courses (e.g., Iowa, Idaho, Michigan).

Display 2. Policy Provisions Related to Course Offerings

Only five states require public colleges to offer dual credit courses but twice as many require high schools to have college course options available to their students and another seven encourage this provision. In Florida, for example, “each district school superintendent and Florida College System institution president shall develop a comprehensive dual enrollment articulation agreement for the respective school district and Florida College System institution.” Similarly, New Mexico requires every school district to offer a program of courses for dual credit, in cooperation with an institution of higher education, and a program of distance learning courses. Moreover, New Mexico high school students must earn at least one credit as an: honors, advanced placement, dual credit, or distance learning course during their high school years in order to graduate. The Indiana requirement in this area

applies to both dual credit and AP courses: “Each high school must provide at least two (2) of each of the following course offerings to high school students who qualify to enroll in the courses: (1) Dual credit; (2) Advanced placement.”

Who Can Take These Courses

Student eligibility provisions (Display 3) are fairly common in state policies, appearing in some form within 37 of the 47 states in the study (79%). The most popular provisions relate to the high school class level of eligible students. Most typically, enrollment is restricted to students in the junior or senior year (e.g., Kentucky, Texas, Virginia, Washington, and West Virginia), but some states allow for younger students (e.g., as early as 9th grade in Tennessee).

Fewer states, but still a majority, have exam or course pre-requisite provisions within state

policy, and these are often cast in terms of local practices. Montana requires the use of standardized exam scores for placement of students in mathematics and composition courses. In Mississippi, “each university and community or junior college participating in a dual enrollment program shall determine course prerequisites. Course prerequisites shall be the same for dual enrolled students as for regularly enrolled students at that university or community or junior college.” Vermont Community Colleges have a unique, Intro to College Studies course that students must complete before being eligible to enroll in college-level courses. Less common, but not infrequent, are eligibility provisions related to minimum or maximum credits, like Kansas, which limits students to earning no more than 24 college-level credits. At the other end of the spectrum, Mississippi’s policy requires, “a qualified dually enrolled high school student must be allowed to earn an unlimited number of college or university credits for dual credit.”

Fewer than half the states that have student eligibility restrictions include high school grade-point average (GPA) thresholds among those restrictions. Tennessee requires at least a 3.20 GPA (on a 4.00 scale) for academic courses and Florida has a 3.00 GPA threshold for participation but also requires, a “minimum score on a common placement test adopted by the State Board of Education.” Other states have more elaborate configurations, as in South Dakota, where the Board of Regents’ policies require that high school students seeking participation in dual credit courses offered by public universities must, “(1) meet undergraduate admissions requirements (ACT or coursework); (2) if a high school senior, rank in the upper one-half of their class or score at or above the 50th percentile on a nationally standardized, norm-referenced test, such as the ACT or SAT; or (3) if a high school junior, rank in the upper one-third of their class or score at or above the 70th percentile on a nationally standardized, norm-referenced test, such as the ACT

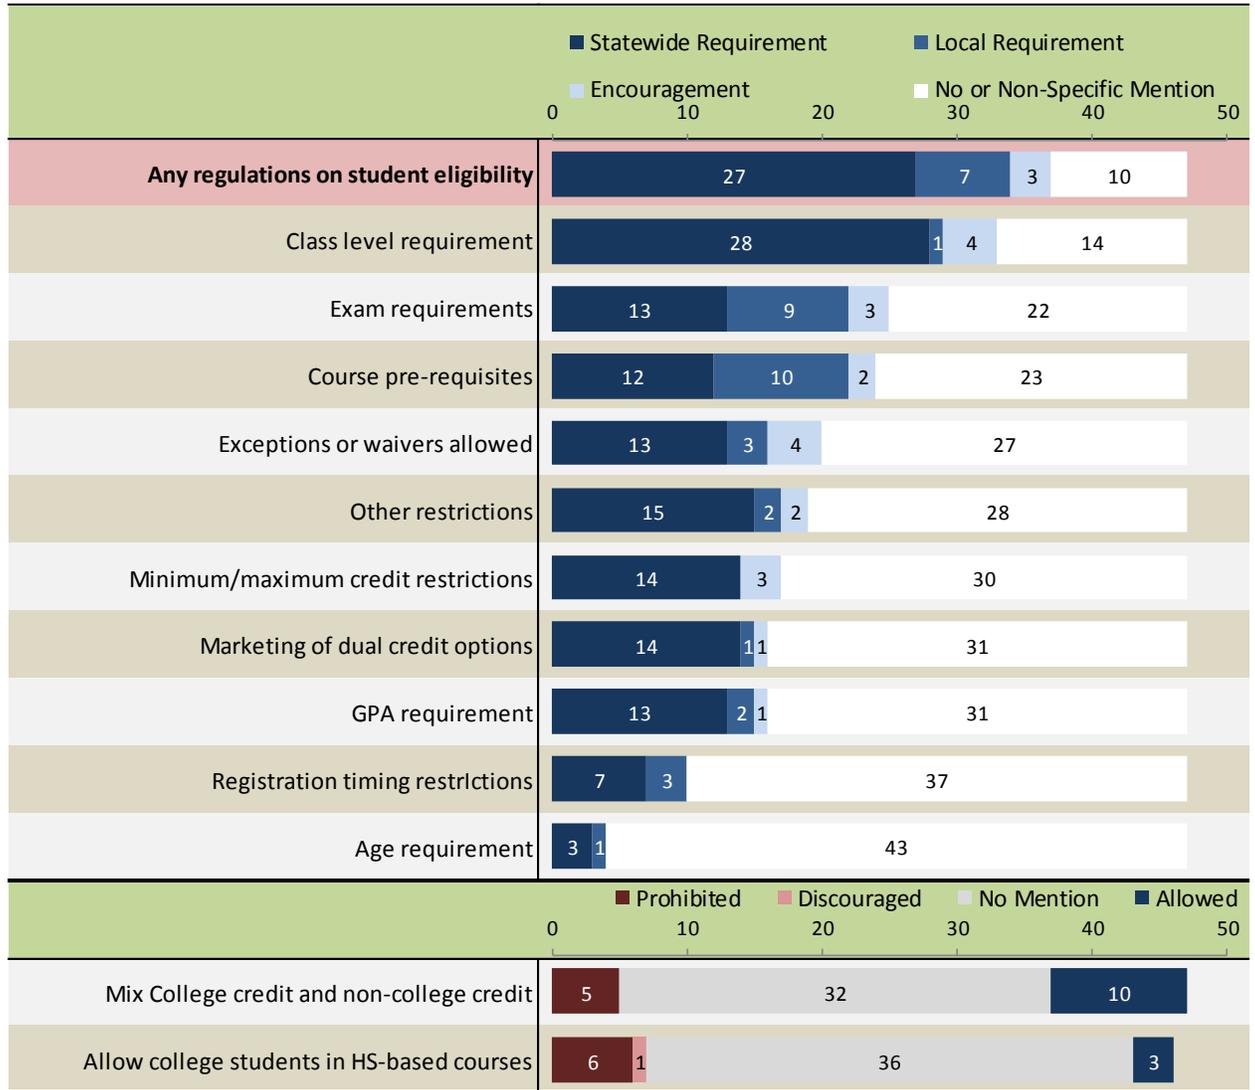

or SAT.” Less elaborately, in Montana: “students must have completed the required high school classes at that grade level and be on track for high school graduation within a four-year construct.” Even less common but not insubstantial, are provisions related to the timing of enrollment, such as in New Hampshire, where “students cannot retroactively enroll in a college course.” Least common among the dimensions considered here are age restrictions, although a few states have these provisions. For example, in Oklahoma, students must be at least 16 years of age or older if receiving high-school-level instruction at home or from an unaccredited high school, whereas students in Hawaii must be younger than 21.

About half of the states that have student eligibility provisions also allow waivers and exceptions. For example, Kentucky policy states, “Exceptions may be considered for other students if recommended by the school faculty and approved by the Chief Academic Officer at the public postsecondary institution.” Waivers and exceptions are often combined in policy with statements of requirements, such as in Nebraska, which recommends (but does not require) “dual credit courses for only juniors or seniors with at least a B average, having an ACT composite score of at least 20 (or equivalent score from another valid assessment), ranking in the upper half of their class or be formally identified as high ability or gifted or demonstrate through some alternative means the capacity for academic success in the desired course(s), or be waived in special circumstances by the appropriate secondary and postsecondary officials.” As another example, in Texas, students below junior class standing may enroll only if allowed by the terms of a memorandum of understanding, and in such cases, they must demonstrate “outstanding academic performance and capability” and must be approved for enrollment by the chief academic officer of the college and the principal of the high school. As another way of providing local control, Colorado policy allows students without a high school diploma to

take college-level courses if they achieve “a minimum score on a placement assessment that is administered by an institution of higher

education, which minimum score is determined by the institution.”

Display 3. Policy Provisions Related to Student Eligibility

Relatively few states include provisions that address whether dual credit classes can include students not taking the class for college credit. Among those that have such provisions, twice as many allow this type of mixing (n=10) compared to those states that forbid it (n=5). States that allow such mixing generally do so to accommodate courses that can serve as both AP and dual credit. For example, Connecticut policy states,

“high schools may offer Advanced Placement (AP) courses and UConn ECE courses concurrently, provided that courses adhere to the UConn curriculum. Course content that is part of the UConn curriculum must be covered regardless of whether it is a topic covered on the AP exam.” Similarly, Arkansas allows, “The merging of concurrent enrollment and AP.” As an example of a prohibition, in Florida, “dual enrollment

courses taught on a high school campus may not be combined with any non-college credit high school course.”

Only a handful of states specifically disallow college-age or other adult students in dual credit courses, including Hawaii which requires that the student be under the age of 21 as of September 1 of the school year in which the course is taken. However, some states have more general provisions that prevent older students from taking courses within a high school building during regular high school hours. Three states have provisions that specifically allow such mixing as exemplified in Iowa where dual credit courses are, “open to all registered community college students, not just high school students.” To accommodate high school sites that are not open to college students, Iowa provides that college students can be restricted if other sections of the course are available to them on the college campus.

A number of states have provisions in their policies to ensure that dual credit opportunities are marketed to potential students. For example, participating school districts in Washington must provide general information about the college in the high school program to all students in grades ten, eleven, and twelve and to the parents and guardians of those students. In Alabama, the policy states that high schools and colleges must agree “to provide a mechanism for communicating the educational and economic benefits as well as the requirements for participation and enrollment procedures to parents and students.” A similar policy in Delaware simply states that “all students shall be provided information regarding dual enrollment and the awarding of dual credit opportunities.” In Ohio, “Each school district and each chartered nonpublic high school shall provide information about the dual enrollment programs offered by the district or school to all students enrolled in grades eight through eleven.”

Who Can Teach These Courses

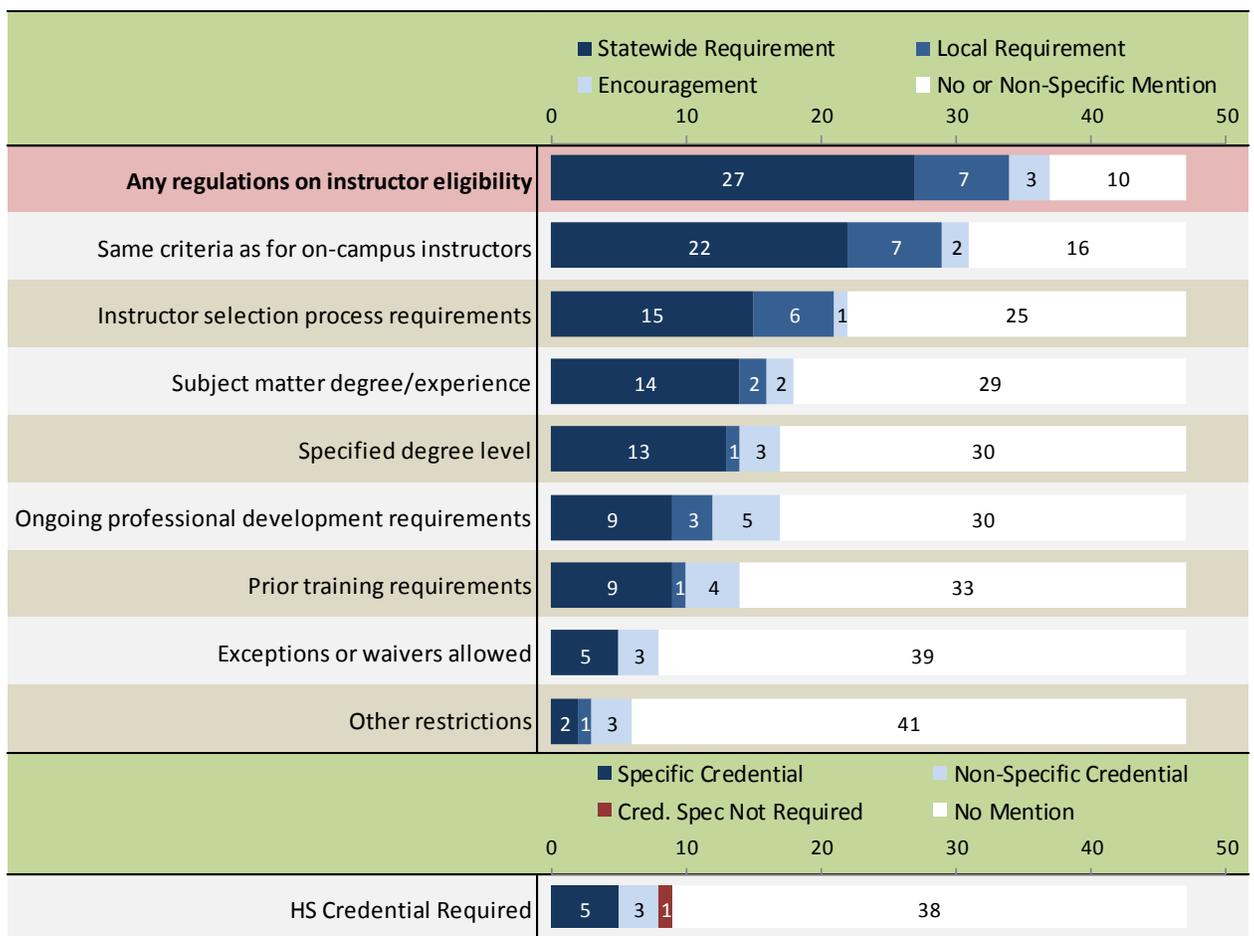

Nearly four of five responding states (79%) have some policy provisions regarding instructor eligibility as shown in Display 4. The most common of these provisions is that colleges and universities use the same standards in selecting instructors for dual credit courses as they do for courses offered on their own campuses. Maryland’s policy provides a typical instance of this, providing that dual credit course instructors, “shall meet the same requirements for appointment as regular faculty at the collegiate institution granting the credit.” Indeed, this is a general provision of most institution’s accreditation standards and sometimes this connection is explicit in state policy as noted in Missouri policy which states that instructor selection, “shall meet the requirements ... as stipulated for accreditation by the Higher Learning Commission.” It is difficult to distinguish between a statewide and a local requirement in this aspect of policy because the requirement generally stipulates that the institution set its own standards. However, we distinguish here between provisions stated entirely in terms of local control as compared to those that recognize that there is an authority beyond the campus that requires these standards.

Slightly less than one-half of the responding states also have policy provisions regarding the instructor selection process. For example, Indiana policy states, “the secondary school and academic unit on the postsecondary campus shall work together to identify instructors of dual credit courses based on criteria established by the postsecondary institution. The postsecondary campus shall approve the individuals who will teach the dual credit courses in the secondary school, but the school corporation shall be responsible for hiring and compensating this personnel...High school instructors providing dual credit courses are approved by the respective college/university departments and meet academic department requirements for teaching the college/university course.” Kentucky further relates their policy to

the requirements of the regional accreditor, the Southern Association of Colleges and Schools (SACS): “The dual credit courses must be taught by postsecondary faculty or secondary school teachers who are approved by the postsecondary institution as having appropriate credentials established by the SACS-COC Guidelines for Faculty Credentials and university policy.”

Despite linking dual credit instructor selection to college criteria for selecting on-campus course instructors, some states include in their policy specific provisions regarding instructor subject matter expertise and degree level. For example, Arkansas requires a master’s degree, “that includes at least eighteen (18) hours of completed course work in the subject area of the endorsed concurrent enrollment course.”

Display 4. Policy Provisions Related to Instructor Eligibility

Slightly less frequently, but still among one-third of responding states, policy provisions pertain to prior training and ongoing professional development. In Arizona, “The chief executive officer of each community college district shall establish an advisory committee of full-time faculty who teach in the disciplines offered at the community college district to assist in the selection, orientation, ongoing professional development and evaluation of faculty teaching college courses in conjunction with the high schools.” Missouri policy specifies that, “new dual credit instructors will participate in orientation activities provided by the college and/or academic department...[and]...continuing dual credit instructors must participate in both the professional development and evaluation activities as those expected of adjunct faculty on the college campus.” Similarly, Montana requires that, “the college will provide annual discipline-specific professional development activities and ongoing collegial interaction.” Idaho goes so far as to specify the topics for interaction: “Instructors teaching dual credit courses are part of a continuing collegial interaction, through professional development, such as seminars, site visits, and ongoing communication with the postsecondary institutions’ faculty and dual credit administration. This interaction addresses issues such as course content, course delivery, assessment, evaluation, and professional development in the field of study.” This level of specification of topics is the exception rather than the rule.

Whereas almost one-half of states include policy provisions for offering waivers or exceptions to student eligibility, far fewer states offer waiver or exception provisions for instructor selection provisions: only five states have explicit waiver or exception provisions with another three including local options to do so. In Connecticut, “Instructors may be granted a one- or two-year provisional certification if they have clearly demonstrated their ability to be certified and are missing only a small component of the credentials required

“...other instructors are chosen from among college faculty and so issues can arise regarding whether they have an appropriate credential to teach at the high school level.”

for certification.” Nebraska allows but does not require waivers by stating, “the preceding faculty guidelines may be waived in special circumstances by the appropriate secondary and postsecondary officials.” Missouri allows for local waivers but stipulates a limit on their extent: “...institutions are permitted to use professional judgment in allowing faculty that do not meet all requirements for higher education instruction to teach dual credit courses provided that ninety percent of any institution’s dual credit faculty meet the standard faculty eligibility requirements set forth above.”

Although many dual credit courses offered in high school settings are taught by high school instructors who are trained or otherwise vetted regarding their eligibility to teach a college level course, other instructors are chosen from among college faculty and so issues can arise regarding whether they have an appropriate credential to teach at the high school level. Six states include provisions that require and another three provide encouragement for ensuring the instructors have appropriate high school credentials. Only one, Colorado, has a specific provision enabling college instructors without high school teaching credentials to teach a dual credit course. Another, Alabama, addresses this issue in policy by stating, “College faculty credentials shall be provided to the local school board of education as needed to meet credential standards of accrediting agencies.”

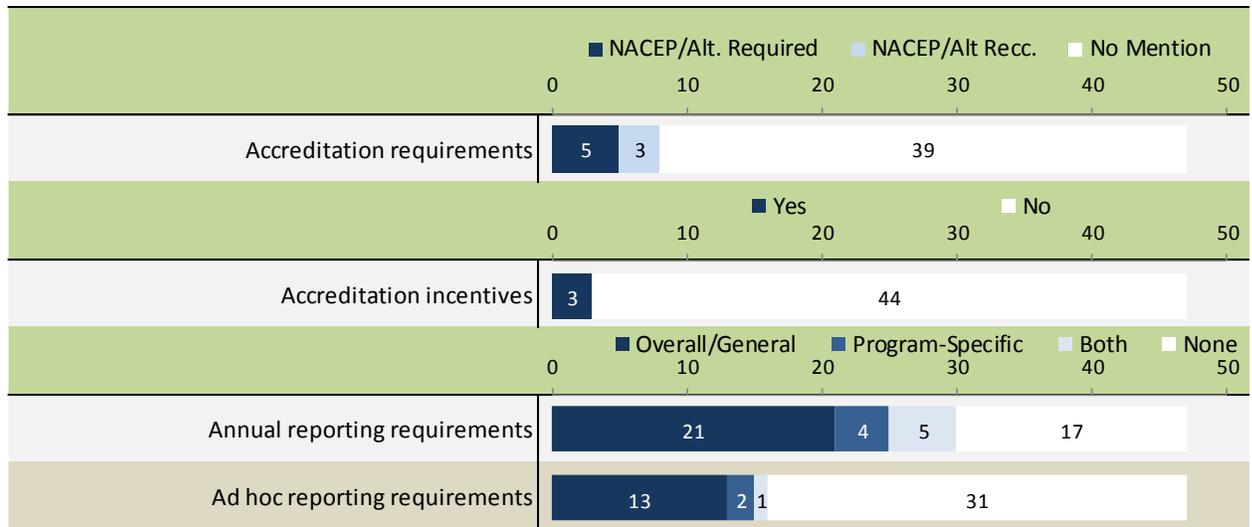

How Else Is Quality Assured

As shown in Display 5, only five states (Arkansas, Indiana, Montana, Oregon, and South Dakota and Tennessee) have made NACEP accreditation or a state-provided alternative a requirement for offering dual credit courses, with four other states (Iowa, Minnesota and Missouri) encouraging this type of quality assurance process. Additionally, several states (e.g., Illinois, Utah, Idaho, and Kentucky) encourage NACEP accreditation or the use of similar quality provisions in their guidelines and communications but not formally in state policy.

The majority of states more commonly have policy provisions for annual or ad hoc accountability reporting, such as North Carolina’s joint program accountability plan between the Community College System and the Department

of Public Instruction, which includes six specific outcomes measures. Louisiana provides an example of a reporting provision that focuses on participation: “Postsecondary institutions shall annually report to the Board of Regents dual enrollment courses offered, where offered, the numbers of students enrolled in each, and the course credit awarded in each.” Kentucky has a policy provision that requires the Kentucky Council on Postsecondary Education to create an ‘accountability index’ for dual credit participants that includes student enrollment and success measures. Colorado has a similar policy provision that requires the Department of Education and Department of Higher Education to prepare an annual report with measures of dual credit enrollment and success and submit the report to the House and Senate Education committees.

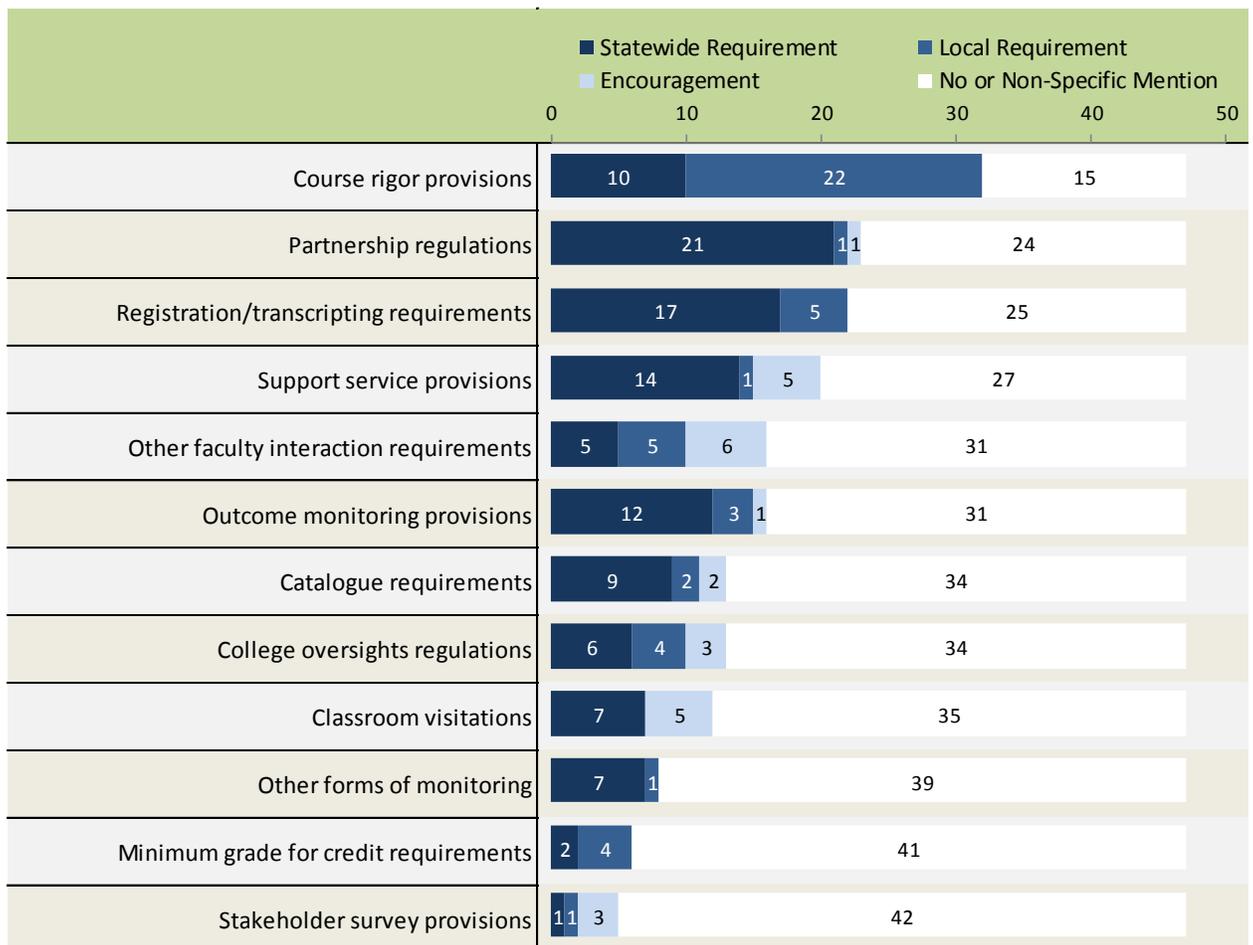

Display 5. Policy Provisions Related to Accreditation and Annual Accountability Reporting

To explore policy related to quality assurance further, many of the common processes of NACEP and other forms of accreditation were specifically addressed in the questionnaire. Display 6 summarizes the responses to these items, showing that the most common language pertains to course rigor, and this is usually stated in terms of the criteria for rigor that colleges and universities employ as part of their own standards (22 states) and less so through statewide prescriptions (10 states). Course rigor is typically addressed in terms

of college campus standards. For example, Illinois policy requires, “The course outlines utilized for these courses shall be the same as for courses offered on campus and at other off-campus sites and shall contain the content articulated with colleges and universities in the State. Course prerequisites, descriptions, outlines, requirements, learning outcomes and methods of evaluating students shall be the same as for on-campus offerings.”

Display 6. Other Policy Provisions Related to Quality Assurance

As with the instructor eligibility criteria, the distinction between statewide and local criteria for course rigor is nuanced as exemplified in Georgia’s approach, which we characterize as statewide criteria by virtue of the role of State Boards in the process. In Georgia, the department, the Board of Regents of the University System of Georgia, and the Board of Technical and Adult Education shall jointly: “Establish policies to ensure that dual credit courses reflect college-level work in order for such courses to yield dual credit, which shall include: ...Establishing the same content standards, requirements for faculty, course syllabi, and end-of-course exams for dual credit academic and career, technical, and agricultural education courses, whether taught to high school or college students.”

About half of the responding states also have provisions within their state policy regarding the partnerships between K-12 and higher education institutions and systems involved in offering dual credit courses. For example, Mississippi policy requires, “Dual credit memorandum of understandings must be established between each postsecondary institution and the school district implementing a dual credit program.” Arizona requires intergovernmental agreements, “based on a uniform format that has been cooperatively developed by the community college districts in this state.” They further stipulate that these contracts include financial provisions (including the amount of funding the community college receives from the state and the proportion distributed to the school district); tuition and financial aid policies; accountability provisions; service responsibilities; and the type and quality of instruction that will be provided. Similarly, Kansas policy requires cooperative agreements between the school districts and postsecondary institutions that seek to sponsor and offer dual credit courses, with provisions related to: awarding credit (college only or both college and high school) tuition requirements; purpose and benefits; individual and joint responsibilities;

and guidelines for curriculum, student eligibility, faculty selection, assessment, professional development and quality assurance. The Kansas policy also stipulates, “arrangements will include collaborative faculty development programming such as pedagogy, instructional design, course management, instructional delivery skill improvement, curricular reform initiatives, qualified admissions considerations (if applicable), and student success assessment strategies.”

Many states also include policy provisions regarding course registration and transcripting. Montana policy includes, “advising materials must state that as a college course, the dual enrollment course becomes part of the permanent college transcript that must be provided by the student to any college he or she eventually attends. Similarly, Idaho policy stipulates, “postsecondary courses administered through a dual credit program are recorded on students’ official academic record of the postsecondary institution.” As an example of a more process-oriented provision, New Hampshire policy includes, “To register for college credit, students must complete a registration form, have it signed by a parent or guardian, and submit it with payment by the specified deadline.”

Support service provisions are the next most common, being required by 14 states, as in Montana policy, which states, “Counseling and advising of prospective students by appropriate college officials, high school counselors, teachers, and parents will be an integral part of all dual enrollment programs.” Similarly, North Carolina policy encourages high schools to, “emphasize parental involvement and provide consistent counseling, advising, and parent conferencing so that parents and students can make responsible decisions regarding course taking and can track the students’ academic progress and success.” Alabama requires such provisions in partnership agreements, including: “Methods for addressing student related issues such as: admissions, procedures, advisement, monitoring and evaluation,

privacy rights, ADA issues, and verification of student attendance.”

Faculty interaction is often linked with college oversight responsibilities as in the Montana guideline: “College faculty in the discipline and/or the appropriate academic administrator will verify through site visits and other measures that the curriculum of concurrent enrollment courses reflects the pedagogical, theoretical and philosophical orientation of the sponsoring college.” Iowa offers a more basic statement noting that dual credit course instructors should, “collaborate, as appropriate, with other secondary or postsecondary faculty of the institution that employs the teacher regarding the subject area.” Kentucky employs postsecondary regional accreditation criteria in their policy, stating, “SACS-COC standards require that postsecondary institutions regularly evaluate the effectiveness of each faculty member regardless of contractual or tenured status. Dual credit teachers and faculty will be evaluated in a manner consistent with this evaluation process.”

An explicit statement of outcome monitoring is found in Colorado policy. Using a joint data collection system between the high schools and postsecondary institutions, the policy requires the State Board to, “track dual credit students to provide data regarding the impact of dual credit programs in relation to college entrance, retention, matriculation from high school and college, impact on college entrance tests, etc. A study is conducted every 5 years on dual credit graduates who are freshmen and sophomores in a college or university.”

Who Pays For Or Otherwise Funds These Courses

Direct funding for dual credit courses is offered in 24 states (including 4 that have both direct and program-specific funding) with another 7 having funding provisions for only specific programs for targeted populations, targeted types of instruction, or for specific initiatives to improve dual

credit instruction (Display 7). As an example of the latter, Wisconsin funds grants to individual technical colleges to assist with the professional development sessions that are set up to assure quality in transcribed credit. As an example of the former, Georgia’s policy states that “It is up to the local system to identify whether Move on When Ready, Accel, or Dual Hope Grant is the appropriate funding source for a student’s dual enrollment credit coursework,” although there are some state funding guidelines that facilitate the local decision. Oregon postsecondary institutions are eligible for state reimbursement for students enrolled in dual credit courses through the states enrollment-based funding formulae. However, depending on the pricing policies of the postsecondary partner, students may be assessed an application fee and they pay either nothing or deeply discounted tuition per credit hour. Wyoming has an interesting funding and allocation provision, wherein, the school district pays the postsecondary institution tuition for all concurrent enrollments based on the final class roster issued on or about midterm of the semester. After the college receives the money, it pays back to the school district an identical amount for space, supplies, instruction, and other related costs.

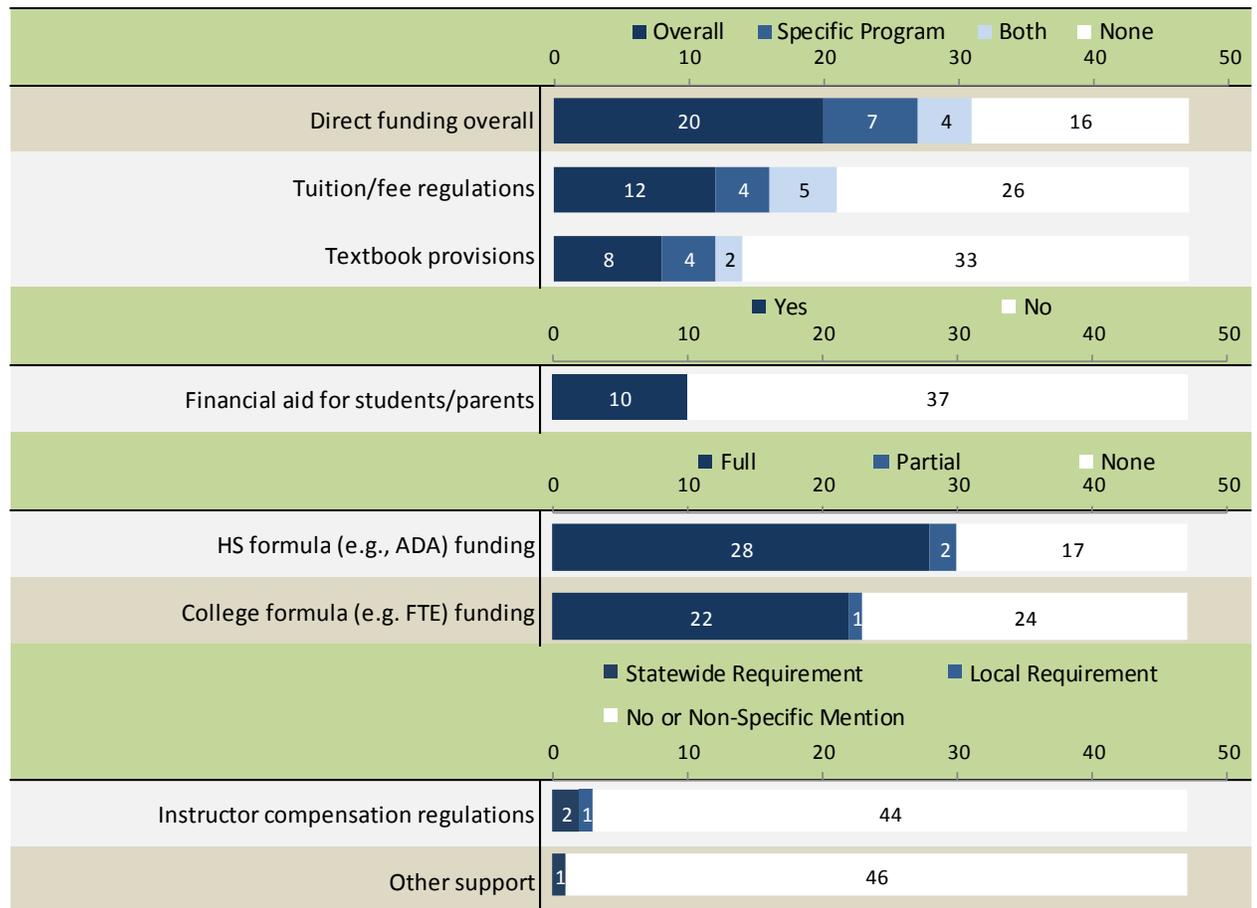

Several states have provisions that make dual credit courses available or free to all students. The Commonwealth Dual Enrollment Program (CDEP) in Massachusetts is an example of such a program where there is no income or need criterion for participation, but student participation “is at the discretion of the participating institution of higher education, subject to capacity constraints and state appropriation.” In addition, institutions can charge a “nominal admission fee” (which may be waived). Similarly, Florida decrees in its policy that, “any student enrolled as a dual enrollment student is exempt from the payment of registration, tuition, and laboratory fees.” Other states specifically regulate allowable tuition charges. Indiana code gives the Commission for Higher Education authority to set the cost charged to

students by public colleges and universities, which the Commission set at \$25 per credit for the 2011-13 biennium. Other state policy regulations related to allowable charges include New Hampshire, which specifies that, “the cost for a... course offered through Running Start is \$150, excluding the cost of textbooks and other instructional materials, where appropriate.”

There are several other ways in which state policy sets requirements or recommendations with regard to tuition and fee regulations. For example, Kentucky specifically prohibits school districts from having to pay college tuition for concurrent enrollment students attending on college campuses or for the transportation of students to or from any eligible postsecondary institution. Instead, it requires that, “each concurrent enrollment pupil shall be responsible for payment of tuition for enrollment at an eligible postsecondary education institution and for payment of the costs of books

and equipment and any other costs of enrollment.” However, Kentucky policy defers to the postsecondary institution in partnership with the high school “the development of a process to determine student eligibility for financial assistance.” Arizona defers decisions about tuition and funding reimbursement to the partnership agreements between postsecondary institutions and school districts. In Wisconsin, students pay between one-half and full resident undergraduate tuition for university courses. If the student pays full tuition, school districts may have an agreement to receive a portion of the tuition paid to offset costs they have incurred in providing instruction for these courses or to reduce the tuition paid by the students. Otherwise, institutions may reimburse the local school districts the lesser of the actual costs or 50 percent of the tuition collected.

Display 7. Policy Provisions Related to Funding

“Several states have provisions that make dual credit courses available or free to all students.”

As with tuition charges, state policy provisions related to text book fees run the full spectrum from prohibiting to requiring charges to students. Iowa specifically prohibits such charges in its policy: “An eligible postsecondary institution that enrolls an eligible student under PSEO shall not charge the student for tuition, textbooks, materials, or fees directly related to the course in which the student is enrolled except that the student may be required to purchase equipment that becomes the property of the student. For the purposes of this requirement, equipment shall not include textbooks.” At the other end of the spectrum, Alabama policy requires: “Payment of the current rate of tuition and fees per credit hour, textbooks and materials will be the responsibility of the student unless other resources are available.”

In most states where students are responsible for a portion or all of tuition, course fees, or textbook charges, provisions are made for either waiving those fees for targeted population or providing need-based financial assistance. Connecticut, for example, provides an example of a typical waiver: “A fee waiver is available for all students who qualify for the Federal Subsidized Free/Reduced Lunch Program, contingent upon receipt of appropriate verification from the school district.” Indiana also has this waiver and, in addition, authorizes the offering postsecondary institution to grant need-based aid under other

conditions: “Upon demonstration of financial need, an eligible institution may grant financial assistance to a student accepted for admission to the eligible institution.” In Tennessee, students (or their families) are responsible for costs (tuition and fees). However, students can receive \$300 per dual enrollment course for up to four courses in their junior and senior years of high school; however, this assistance does not cover the full expense tied to tuition, books and any lab fees.

As with most aspects of dual credit policy, states vary widely with regard to whether colleges or high school are eligible for state enrollment funding for students in dual credit courses. This variation is exacerbated by the variety of state approaches to enrollment funding at the secondary and postsecondary levels. Following standards for previous studies on dual credit policy, we attempted to categorize state policy based on Average Daily Attendance (ADA) and Full-Time Equivalent (FTE), but many state funding formulas do not approach funding based on student enrollment or headcount or have very nuanced funding formulas whose investigation was beyond the scope of this study; those states are included in the ‘None’ category. Typical of states that provide high schools with average daily attendance funding, Missouri dual credit policy stipulates that, “the pupil’s resident district shall continue to count the pupil in the average daily attendance of such resident district for any time the student is attending a postsecondary course. Any pupil enrolled in a community college under a postsecondary course option shall be considered a resident student for the purposes of calculating state aid to the community college.” Similarly, in Colorado, “the qualified student shall be included in the funded pupil count of his or her school district or, in the case of a student enrolled in an institute charter school, of the school’s accounting district.” Iowa combines its enrollment funding with a prohibition on tuition charges to the student: “School districts that participate in district-to-Community College sharing

agreements or concurrent enrollment programs that meet the requirements of Iowa Code section 257.11(3) are eligible to receive supplementary weighted funding under that provision. Regardless of whether a district receives supplementary weighted funding, the district shall not charge tuition of any of its students who participate in a concurrent enrollment course.”

Postsecondary enrollment funding provisions are slightly less common than high school funding provisions. In Iowa, concurrent enrollment also counts in the college funding formula but enrollment funding is not consistently included in postsecondary allocations. Colorado policy permits higher education institutions to include qualified dual credit students in determining the number of full-time equivalent students enrolled at the institution for funding formula purposes. Alternatively, Florida policy allows colleges to collect a proportion of funding, “Students in dual enrollment courses may also be calculated as the proportion shares of full-time equivalent enrollments they generate for a Florida College System institution or university conducting the dual enrollment instruction.”

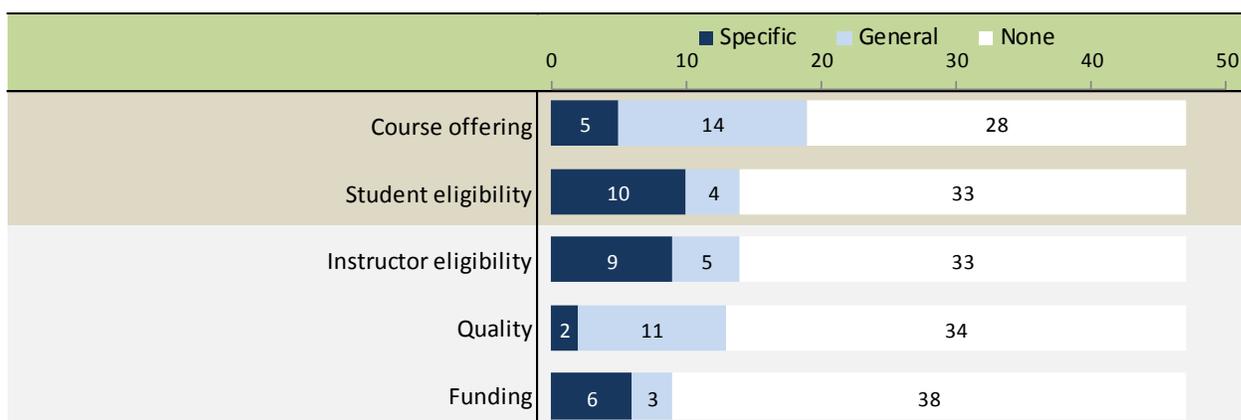

Instructor compensation regulations are rare in state policy, being specifically included in only three states (Alabama, North Dakota and Virginia). Alabama’s related policy statement stipulates that, “the college shall be responsible for the compensation of faculty, in accordance with State Board of Education and college policy. Faculty may not receive dual compensation for instructional time.” North Dakota’s and Virginia’s policies provide more flexibility, recommending an arrangement but allowing alternative processes to be developed collaboratively by the high school and postsecondary institution. The one “other” instance of funding support identified in the lowest bar of Display 7 relates to a New Hampshire program that provides a “three-credit course voucher,” which covers the cost of tuition only, for each section of a college course taught through their *Running Start* program.

Enforcement Of State Policies

There is generally very limited language about enforcement provisions in state policy on dual credit courses (Display 8). In many instances, state contacts referred to general compliance provisions and related incentives for all state policy. This was especially true for enforcement related to course offering provisions and quality assurance. However, more specific enforcement provisions were cited by ten states regarding student eligibility and nine states regarding instructor eligibility. Related to the former, Arizona policy allows waivers for students to participate up to a certain proportion of the total students enrolled (25%), and state policy requires “all exceptions and the justification for the exceptions shall be reported annually to the joint legislative budget committee on or before October 1.” Related to the latter, Indiana’s state policy leaves enforcement to the postsecondary institution and suggests colleges and universities should have procedures that “address high school instructor non-compliance with college/university’s expectations for courses offered through the dual credit program (for example, non-participation in training and/or activities).”

In some states, there are auditing or accountability processes related to sector-specific agencies. For example, the Commonwealth of Virginia does not regulate who can take dual credit courses. However, colleges within the Virginia Community College System are subject to the requirements and policies of the State Board for Community Colleges and are subject to their internal audit process. Other states also employ auditing as a mechanism for enforcement. For example, in Texas the dual credit program was subject an audit by the State Auditor’s Office and passed through the process successfully in 2010.

Display 8. Enforcement of Policy Provisions

||| FURTHER ISSUES AND CONCERNS

THREE FINAL QUESTIONS asked respondents to offer comments on: other policy issues that were not addressed in the survey, recent or anticipated changes to dual credit policies in their state, and other issues or concerns that our line of questioning posed to them.

Cross-Cutting Themes

The issue raised most frequently in response to all of these final questions related to funding or, more precisely, the general lack of funding to support state policy implementation and enforcement. Respondents frequently mentioned that funding promised in state policy did not materialize, which served to restrict rather than to expand dual credit participation. The lack of reimbursement for dual credit enrollments created an additional burden on both secondary and postsecondary institutions, many of whom were facing cutbacks and, in some cases, rescissions. Funding issues were further exacerbated by state interest in, and in some cases prescriptive policies for, keeping student costs low.

Another cross-cutting theme of the closing comments related to the difficulties in ensuring adherence to college standards by virtue of fundamental differences in the high school and

college learning environments and limited interaction between instructional staff and faculty. Even though state policy was being met regarding having such interactions, the amount of time that can be invested in those interactions, and the large number of sites at which these courses are offered, preclude a level of interaction that can mitigate the influence of the daily interactions of staff within the high school environment. In short, it is difficult for a high school instructor to create a college-like environment within a high school class given the overwhelming context in which this work is embedded. More practically, the limited amount of communications make it difficult for high school-based instructors to keep up with changes to the curriculum implemented in the college courses that they teach at the high school.

Other Policy Issues

Respondents noted that, since our survey focused primarily on high school-based dual credit activity, it did not address the issues they face regarding other accelerated options or other modes of delivery (e.g., campus-based, online, and home-based educational programs). Respondents also noted that, although state dual credit policies set the rules and regulations under which they operate, there are other state educational policies, as well as district and institutional policies that influence practice. In addition, many system and

district offices create guideline and have oversight committees and advisory groups that shape practice more directly.

Recent Changes In State Policy

When asked about recent changes in state policy, we received even more comments about funding issues and, more specifically budget cuts that have led to program reductions and cancellations as well as to increases in student financial obligations in some states.

Despite the budgetary constraints, many states are actively exploring ways to expand access to dual credit. For instance, states created more dual credit options for career and technical education, increased the number of dual credit courses available in high schools, provided pathways to the general education certificate and associates degree concurrent with high school graduation, and required or recommended all students to have the opportunity to earn postsecondary credits. Among the recent changes made to improve the quality of dual credit, respondents cited creating working groups to review practice, clarifying or modifying the definition or standards of qualified faculty, providing an incentive fund for dual credit, requiring or recommending NACEP accreditation or compliance to state standards, and limiting enrollment to only those registered for college credit.

Pressing Issues

When asked about the most pressing issues, respondents repeated the funding issue but also frequently mentioned access and quality. Funding remained the top issue with questions about how to determine cost, who should pay, how to address budget shortfalls and, more generally, how to deal with reduced state support for colleges. Concerns were once again raised regarding the increasing reliance on tuition which threatened another priority issue: access.

Several respondents noted that their state is trying to increase access to dual credit and assure

transferability. Some concern was expressed for the inequity in access to college campus-based opportunities for dual credit, which is generally viewed as a more authentic experience that can enhance the benefits. The need for better marketing and communication with students and parents was cited as a critical component of expanding access. More generally, the combination of limited resources and high demand was cited as threatening the quality. As one respondent offered, dual credit classes are not very effective because “they are not part of a well-thought out and informed plan or process.”

The quality of dual credit remains a pressing issue. Respondents indicated that their states were trying to figure out how to manage and ensure the quality of dual credit. Faculty credentials and capabilities were often cited as a critical quality issue. Respondents generally acknowledged the importance of qualifications and professional development for dual credit instructors. Respondents raised concerns about the variations in faculty qualifications, which often differ by programs and offering institutions. For example, some school districts allow high school teachers with less than required credentials to teach dual credit classes. This is in part because the states do not have a mechanism for preventing this practice, which is viewed as an issue for the accrediting body.

Student eligibility for dual credit was also frequently mentioned. States indicated that a number of students with credit earned through dual credit are unprepared for college-level work. They said that postsecondary institutions should engage more with their high school colleague in ensuring that dual credit courses offered on a high school campus are equivalent to regular college courses. Respondents also mentioned that the mixing in the same course of students who are and are not receiving college credit, that is, the mixing of students who do and do not meet requirements, needs to be reexamined.

Finally, several respondents expressed concerned about the inconsistency in dual credit

practices within a state. Those expressing this concern believe that consistency and alignment of policies and practices across dual credit programs and between secondary and postsecondary institutions is important to establishing and maintaining quality. One state has initiated work on alignment of policies and practices between grades 11-12 and postsecondary education to facilitate fully prepared high school students' movement into college coursework and to address remedial education prior to postsecondary education. Several respondents also cited the importance of using common language and definitions and to build a degree of central consistency for the benefit of the students who take dual credit courses.

||| COMPOSITE POLICY CONFIGURATIONS

TO PROVIDE A SENSE of the extent of similarities and differences among states in the dual credit policy configurations, the remaining charts in this section (Displays 9-12) array the states within each segment of policy related to our primary research questions from high to low according to the overall extent of their policies (that is, the number of different components they address and degree of prescriptiveness). The columns of each chart represent the individual questions we posed regarding an aspect of policy in each segment and the color of the cell represents a state's response to that question in the same way in which the bars are color coded in Displays 1 through 7.

For example, Oklahoma is at the top of Display 9, the *Course Offering* chart, because it has dual credit policy provisions regarding seven of the eight component questions six of which involve statewide criteria (the darkest shade). Further down the chart, Mississippi (MS) has substantive policy that includes a statewide requirement in two areas (general restrictions and statewide transfer requirements), a local

requirement with regard to one area (subject matter restrictions), and a recommendation/encouragement in one area (whether high school should offer dual credit courses). For the ranking, statewide requirement (darkest shade) was weighted as a 3, a local requirement (medium shade) a 2, and local or statewide recommendations or encouragement (lightest shade) a 1.

Display 10, the student eligibility chart, also includes some dark and light red shaded cells for the two items for which state policy could either allow or disallow the activity. The disallow condition is represented by red (either as dark red for a prohibition or light red for discouragement), and the allow condition by blue (dark blue only).

Table 2, which follows the composite charts, displays the rank of each state within each policy segment (where a lower number indicates a high rank), and provides a composite rank, that was derived from the average of the segment rankings. The state which ranks first in this table, Missouri, appears in the top 10 states on all composite measures. The next two states, Oklahoma and Connecticut, have high ranks in four segments but a middle rank (in the 20s) in the other segment.

These rankings do not reflect judgments on policies or practices. They reveal only the extent to which the states have policy statements regarding the various elements included in this study and the level of prescriptiveness of these policies. We provided many examples in the previous discussion of how two policies labeled as a "statewide requirement" may be very different in terms of content and comprehensiveness. These charts are intended to characterize the landscape of dual credit policy in a way that allows the reader to consider which state policies might be worth examining in greater detail. The appendices to this report provide some of that detail as well as links to other documents with additional detail.

These rankings do not reflect judgments on policies or practices. They reveal only the extent to which the states have policy statements regarding the various elements included in this study and the level of prescriptiveness of these policies.

DISCUSSION AND IMPLICATIONS

IN THIS SECTION WE EXAMINE THE RESULTS of this study through three sets of lenses. First, we review our findings in relation to the existing literature, focusing on what has changed, what remains the same, and what gaps still need to be filled. Second, we consider how state policy in its current form relates to the prospects for attaining the promises and avoiding the pitfalls of dual credit that we described earlier. Finally, we view these findings through the lens of regional postsecondary accreditation, examining the ways in which current accreditation standards and processes align with quality assurance for dual credit activity.

||| WHAT HAS CHANGED – WHAT REMAINS THE SAME

THE RESULTS OF THIS STUDY reinforce two continuing themes from past research on state policy and practice for dual credit: There is still no consensus or standardization regarding the terminology related to what we have consistently labeled as dual credit courses; and there remains great variation among states along many dimensions of state policy for dual credit activity.

Toward Standardized Terminology

State policy makers and educational oversight agencies will continually seek to brand their initiatives with distinguishing program names. This is not a particular problem. It appears that there are three common generic terms for describing the college-level courses that are intended for high school-level students: *dual credit*, *dual enrollment*, and *concurrent enrollment*. Although

dual enrollment was the most frequent form we encountered, the other two terms are useful for distinguishing between the broader phenomenon of high school students who are simultaneously enrolled in college-level courses and a more specific subset of that phenomenon: courses through which a high school-level student can simultaneously earn both high school and college credit. We intentionally used the term, *dual credit* in this study to focus on this latter, more specific phenomenon. Indeed, we were more specifically focused on a subset of dual credit courses: those taught in high schools, which perhaps should be precisely termed, “high school-based dual credit courses.” State agency contacts were not necessarily as focused on this particular type of concurrent enrollment, depending on the types most prevalent in their state, and findings reveal the continuing variation in forms of delivery throughout the states.

In recent years, there has been an increased emphasis across the educational spectrum for standard terminology as exemplified through such initiatives as the Common Core Standards and the Common Education Data Standards. The concurrent enrollment and dual credit arena would benefit from further efforts to develop consensus on terminology. This would be particularly useful for framing research and evaluation studies so that results can be more readily compared and interpreted which, in turn, contributes more substantially to the identification of effective practices.

Variation In State Policy

In many ways, the current findings are consistent with those of earlier policy reviews (e.g., Karp et al., 2004; WICHE, 2006) regarding the large

variation in state policy. We echo Karp et al.'s conclusion that state policy "ranges from non-existent to very detailed." We would add to that characterization that state policy is just as varied among the growing array of states that have detailed policies as it is between the detailed and the non-existent approaches. We also note a different aspect of variability that was illustrated by comparing results from prior studies to the current one: variability and change over time. One example of this change unfolded over the course of the study, wherein the very comprehensive policies developed under Pennsylvania Governor Rendell were completely dismantled under his successor Governor Corbett. However, we also see instances of states that were characterized in the earlier studies as having modest policies that now appear to have more comprehensive ones, such as Indiana, Iowa, and Kentucky. The response frequencies and examples reported in the results section illustrate this diversity, but a full appreciation can be gained only by examining the detailed state response summaries in Appendix 3 and the policy documents listed in Appendix 4.

Policy variation has its benefits. It represents a venue for creativity and innovation, experimentation and enriched learning, and for accommodating local history, culture and values. However, variation and change over time can have negative consequences. They contribute to the generally confused and non-standard terminology and, perhaps more importantly, make it difficult to examine systematically the effectiveness of various approaches and to determine what works best for which target populations. It is likely this confusion is experienced by state and federal policymakers as well as by students and parents.

Increasing The Focus On Quality Assurance

Earlier policy studies concluded that quality was underrepresented within state policy on dual credit activity. The current analysis demonstrates that this is no longer so. Our conclusion may be due in part to our intentional search for evidence

“Earlier policy studies concluded that quality was underrepresented within state policy on dual credit activity.”

of quality assurance and the general objectives of this study. However, through our discussion with state contacts, we believe that many state agencies have intentionally worked to strengthen policies and practices in this area. The growing visibility and influence of NACEP further underscore this conclusion. Although relatively few institutions have completed the NACEP accreditation process (83 as of April 2012), membership in the organization has grown substantially (250 postsecondary institution members), attendance at NACEP meetings has flourished and a number of states have very explicitly embraced the NACEP model as a standard for quality assurance. Even in cases where NACEP is not specifically mentioned, several states have adopted or at least modeled a number of the NACEP criteria and processes within their quality formulations. However, a number of states and institutions have chosen not to embed accreditation standards in state policy or pursue NACEP accreditation, signifying alternative mechanisms for quality assurance from the perspectives of policymakers and practitioners.

Among the seven strategies for quality oversight described by Lowe (2010), we found that accountability reporting was still the most prevalent form included within state policy. Moreover, many of these accountability reports focus primarily on inputs, including participation

levels and characteristics, subject matter coverage, geographic distribution, etc. Several states have increased their focus on outcome monitoring, as exemplified by Colorado's investment in a joint data system for tracking dual credit participants into their college studies. The more process-oriented aspects of quality assurance, such as program and process review, approval and evaluation, are manifest largely through reliance on local institutional standards and practices that are reinforced through regional and specialized accreditation requirements.

Broadening Access And The Financial Conundrum

The formal survey questions and our general discussions with state contacts highlight the conflict between two of the more potent forces impinging on the development and implementation of dual credit activity: the desire to significantly expand access especially to traditionally underrepresented populations; and the financial press that all states currently face during the slow recovery from the "Great Recession." According to our contacts, well intentioned attempts to pursue aggressively an access agenda have been seriously undermined by deep state budget cuts. To survive, a number of programs have curtailed free access and others have raised tuition and fee charges to make up for lost revenues. The extent to which this has influenced or will influence dual credit access is not readily apparent. However, the intersections of dual credit financial policies and dual credit access are reoccurring themes in the literature and will likely persist as salient policy issues while state financial situations progress toward stabilization. Not all states have succumbed to these pressures as evident in Indiana, where tuition for dual credit courses was capped at \$25 per credit hour for all public institutions, and the statewide community college retains free tuition for its dual credit courses. But several states have fared less well and, as previously noted, a very comprehensive program in Pennsylvania was completely defunded.

Demonstrating Program Impacts

For both accountability and improvement purposes, many states are hoping to obtain evidence regarding the impact of dual credit on student educational attainment. Unfortunately, accountability reporting does not provide a sufficient basis for doing so. The research on dual credit programs to date has been dominated by descriptive studies. Studies that apply more rigorous controls to remove selection effects and other daunting confounds are increasing in number and beginning to inform effective practice. Enough evidence has been gathered to suggest that dual credit has more positive than negative impacts, on average. However, the evidence also reveals that there is variation on impact and some impacts are negative. Further, there is insufficient evidence to support the critical promise for improving postsecondary access and success for underrepresented students relative to more privileged and high-achieving students. Additional rigorous research is needed to contribute to the development of effective policies and practices, especially practice that can be tailored to the diverse array of students across the educational spectrum.

||| THE ROLE OF STATE POLICY IN MAXIMIZING PROMISES AND MINIMIZING PITFALLS

AS WE HAVE NOTED, state policy now plays a larger role in the context of dual credit quality. This role is likely to increase as our respondents noted that quality assurance is among the most pressing issues moving forward. In her book, *Policy Paradox: The Art of Political Decision Making*, Deborah Stone (2002) argues that policy making is "the struggle over ideas" and that there are multiple understandings of these ideas (p. 11). Our review of dual credit policies support Stone's

argument and the tensions of these ideas are manifest in the promises and pitfalls of dual credit that we described in the introduction. In this section, we examine how state policy relates to attaining some of most common promises and avoiding some common pitfalls.

Promises

Enhance and Diversify High School Curricula. Dual credit is claimed to play a unique role in diversifying high school curricula and improving course options for students, particularly in rural areas or small high schools. For most states, providing dual credit opportunities is optional for both high schools and postsecondary institutions. However, ten states require and seven encourage high schools to offer dual credit courses, and six require and eight encourage colleges to offer dual credit. Unfortunately, mandates and encouragement can be tenuous when funding is scarce or unavailable. Thus, state policy can and does play a unique role in expanding or enhancing high school curricula by mandating or strongly incentivizing high schools and colleges to provide dual credit, but sufficient funding and resources are required to make this an attainable promise.

Increase Access to Higher Education. Some literature suggests that dual credit participation can elevate students' college aspirations, especially students who are historically underrepresented in higher education such as low-income, first generation students, and students of color. Based on our analysis of state policy, we found that more than any other area, policies had the most to say about who accesses dual credit (80% of responding states had some requirements). In most cases, state policy defined access in terms of high school grade level; academic proficiency (GPA and standardized test scores); and course pre-requisites. In several of these cases, state policy restricted access to students who had to meet minimum academic criteria set at the state level or academic criteria of the postsecondary

institutions. Beyond setting minimum academic criteria for students, ten states have policies that provide financial assistance or subsidies to low-income students to enhance access. There are a growing number of examples of programs and initiatives that focus on expanding access, most of which have a vocational focus or career orientation, like California's Concurrent Course Initiative (Hughes et al., 2012) or Early and Middle College High Schools that intentionally enroll underrepresented student populations. Although the predominant focus continues to be on the academically well-prepared or at least moderately-prepared, dual credit has been demonstrated to reach a broader population than do the AP or IB programs. Policy provisions for waivers and exceptions in about one-half of the states further support expanding the base of participation. Given the propensity of dual credit programs to serve moderate to well-prepared students, pursuing the access promise requires additional focus on dual credit programs that are specifically targeted to underrepresented populations.

Improve High School and College Relationships. There is a body of literature that also suggests dual credit is a mechanism that, in addition to benefiting students, provides a vital communications link between high schools and colleges. This relationship is critical for improving the alignment of secondary and postsecondary educational curricula. By definition the provision of dual credit requires some degree of collaboration, but in some states, this level of collaboration is reinforced through state policy. We observed this in the form of required articulation agreements, as exemplified by the comprehensive specifications in Arizona and Kansas. We also observed this in state policies that require high school and college faculty to interact on a regular basis, share syllabi, participate in evaluative activities, and engage in shared professional development experiences, among other things.

“Ultimately, taking fewer college courses to reduce the cost may be less important financially than shortening the time to degree.”

Given time and resource constraints, as well as cultural differences, it is difficult to develop and sustain effective communications between secondary and postsecondary teachers and staff. Dual credit activity can play a critical role in overcoming these constraints and differences, especially if suitable attention is applied to developing and monitoring the required engagements.

Shorten Time to Degree and Lower the Cost of College. The relationship between dual credit participation and time to and cost for a college degree has not been convincingly established, although there is some evidence that, on average, students who take dual credit courses in high school accrue college credits more rapidly. The key to the relationship between dual credit and time to degree is the level to which dual credit courses prepare students to be successful in subsequent college work. Research related to this premise is mixed: dual credit can lead to better grade performance in college, but it doesn't always do so. We also know little about the psycho-social mechanisms that operate in dual credit that might help prepare students be successful in college level courses and persist in college. Moreover, with regard to cost, it is not clear whether college students take advantage of previously completed dual credit courses by taking fewer courses in college or whether they simply

take different courses in college. Among well-prepared students and through the history of AP courses, the latter effect, taking different courses, is more frequently found. Ultimately, taking fewer college courses to reduce the cost may be less important financially than shortening the time to degree: student loan debt burden is more substantially impacted by taking longer to complete (and borrowing to cover living expenses) than by tuition costs.

Despite these lingering empirical questions, we found that many state policies require high school students to pay tuition for dual credit courses, leave this decision to local high schools and college partnerships, or simply state nothing about who pays for dual credit. These characteristics of state dual credit policies challenge the premise that college-level courses in high school can contribute to a meaningful or measurable reduction in the cost of college for students.

Pitfalls

Prepare Students for the Academic Rigor of College. Among the common concerns of dual credit is the inadequate maintenance of academic rigor and the concern that dual credit course content is not of collegiate quality and caliber. Among the policies we analyzed in this study, reference to dual credit 'rigor' or 'course quality' was a common feature. In many cases, policies include statements that required dual credit courses to have similar content, learning outcomes, and syllabi as corresponding courses taught on the college campus as illustrated in the examples we used in the results section. Thus it is encouraging that state policy is addressing this common concern.

Ensure Adequate Instructor Qualifications. Another common concern about dual credit that relates closely to the rigor issue is the qualifications of dual credit course instructors. Instructor qualifications are indeed a common feature of state dual credit policies. As with rigor, the issue of faculty credentials is closely related to

the standards to which postsecondary institutions are held through regional accreditation and most state policies rely on these standards. However, some states, such as Arkansas, Kansas and Oregon, specify a required degree level (typically a Master's degree) as well as subject matter expertise requirements.

Provide an Authentic College Experience. Another frequent concern, closely coupled to the previous two, is that dual credit courses on high school campuses do not provide an authentic college experience. Without a doubt, the rigor of the course content and instructor qualifications contribute to the college-like experience of dual credit courses. While this concern is arguably challenging to measure, one might argue that a college-like experience goes beyond the course content and faculty qualifications to include such things as faculty philosophical and pedagogical dispositions, access to experiences and services available to any other college student, interaction of students with college-level students and, perhaps most importantly, interaction of course instructors with other college instructors. A number of state policies require regular interaction and professional development among high school and college faculty. Some state policies are very explicit about this. For example, Idaho's policy states that, "Postsecondary courses administered through a dual credit program reflect the pedagogical, theoretical and philosophical orientation of the sponsoring faculty and/or academic department at the postsecondary institution." This language is similar to the accreditation standards for NACEP and so would be a requirement for states that have adopted the NACEP accreditation framework. Despite these provisions, the level and extent of interaction, engagement, and development cannot fully overcome the intense levels of communication and enculturation that high school teachers experience in their educational settings. Similarly, students taking college level courses in a high school

building cannot completely disengage from the high school context that surrounds this experience. These conditions impose significant limitations on obtaining an authentic college course experience in a high school setting. High school-based dual credit courses will always have this disadvantage. Because of this, state policy-makers need to consider carefully the extent to which college-based dual credit or concurrent enrollment can be supported and to ensure that expansion of high school-based opportunities does not diminish possibilities for the more authentic experience of taking a college course on a college campus.

Ensure Course Transferability. Also among the common concerns associated with dual credit is the extent to which dual credit courses are transferrable beyond the institution that offers the credit. We found that many state policies have adopted language that includes a provision for credit transferability. Among all dimensions and questions asked in our survey, the question about transferability was the question with the most non-specific references—meaning that policy mentioned it but there was not a requirement associated with it. An example of this is Florida in which the policy states that, "The Department of Education, in conjunction with the Board of Governors, shall develop, coordinate, and maintain a statewide course numbering system for postsecondary and dual enrollment education in school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions that will improve program planning, increase communication among all delivery systems, and facilitate student acceleration and the transfer of students and credits between public school districts, public postsecondary educational institutions, and participating nonpublic educational institutions." On the other hand, some policies require that dual credit courses be part of a state transfer system, as is the case in Arkansas, Indiana and Kentucky. At

the other end of this spectrum are state policies which put the burden for transfer on students. For example, Alabama’s policy states that, “Students are responsible for knowing policies relative to dual enrollment/dual credit of colleges/universities to which they plan to transfer credit.” Course transferability is a broader issue than just as related to dual credit.

||| DUAL CREDIT AND REGIONAL POSTSECONDARY ACCREDITATION

IN THIS FINAL SECTION, we consider the implications of our findings with regard to the regional accreditation.

In phone interviews and other discussions with senior staff from the six regional accrediting agencies, representing five of the six regions,³ the level of concern expressed about the challenges often associated with dual credit was modest, although the specific nature of the concerns varied by region and level. For example, staff from the one agency that focuses exclusively on community and junior colleges (ACCJC) had a unique interest in the impact of dual credit programs on a specific component of the accreditation standards: mission integrity. Dual credit programs provide an opportunity for postsecondary institutions to expand their reach and their market. As such, concern was expressed that institutions approach these opportunities in clear alignment with their missions. Especially during a time of fiscal constraint (which has been particularly acute within the dominant state in the ACCJC domain, California), when programs and services for the

core college student population are being significantly cut back, opportunities for additional revenues or state funding sources can divert attention from mission critical objectives.

Although the mission integrity dimension was not specifically mentioned by staff from the other agencies, dual credit was more generally recognized as one of several emerging modes of instructional delivery that is stretching the attention and resources of institutions more thinly. Dual credit was thus generally viewed within the same realm as online/distance learning (and there is some overlap between the two), as a mode of delivery that needs to be attended to through the accreditation review process. Recent reformulations of accreditation standards have more explicitly accommodated distance/online learning, but this level of explicitness has generally not yet been applied to the dual credit realm.

With regard to dual credit as a contractual arrangement, the interviewees were not particularly concerned that the dual credit realm will introduce particular problems, given that the partner is accredited through parallel processes and generally shares the same educational quality values. However, there was some concern regarding how well state policy requirements align with accreditation standards. Interviewees recognized that postsecondary institutions can be put into a difficult position if they must comply with poorly aligned standards from two authorities.

This same concern was raised in relation to faculty qualifications. Although specific criteria for faculty selection, professional development, and evaluation are not set through accreditation standards, the standards require that institutions have standards appropriate to their mission and that they apply these standards consistently. Peer-review teams judge the appropriateness of the standards and examine the practices for consistency of application. State policy requirements for dual credit often rely, explicitly or implicitly, on regional accreditation standards for faculty qualifications. However, a number of states have

³ Phone interviews were conducted with staff from the agencies covering Northeastern (NEASC), Middle States (MSCHE), Southern, (SACS) and both the senior and junior college agencies of the Western (WASC/ACCJC) regions. Staff from the North Central region (HLC) provided input and feedback throughout the project.

in place more prescriptive requirements regarding instructor credentials as well as selection and professional development processes.

A final concern expressed by the interviewees was related to the growing accountability demands on both accrediting agencies and postsecondary institutions that stretch the boundaries of the traditional focus on core postsecondary academic program integrity issues. These demands may require expanding the scope and purview of accreditation review processes, including more substantial annual reporting requirements as well as more intensive site visit protocols. All of this may add to the cost and resource requirements of accreditation, which induces additional overhead on institutional operations.

||| FINAL NOTES

DUAL CREDIT POLICIES AND PRACTICES are evolving at a rapid pace. Even within the time frame of this study, several states enacted or were in the process of enacting new rules and regulations. The information provided in this report is a snapshot at a point in time and some of the policies will be outdated when the report is released.

The research team worked diligently to develop consistent coding practices and represent faithfully the information provided by state contacts. We asked state contacts to review our interpretations at several stages as we adjusted coding categories to better accommodate their responses. Despite their busy schedules, the contacts were responsive and, in many cases, very constructively engaged in providing us feedback. We are very grateful for their time, attention, and patience.

About the Authors

VICTOR M. H. BORDEN is professor of higher education and policy studies at Indiana University Bloomington and senior advisor to Indiana University's executive vice president for University Regional Affairs, Planning and Policy. Dr. Borden's general area of scholarship is the assessment of higher education institutional and program performance. He is a past president of the Association for Institutional Research.

JASON L. TAYLOR is a Ph.D. Candidate and Research Assistant at the Office of Community College Research and Leadership (OCCRL) at the University of Illinois at Urbana-Champaign. His broad research interests are at the intersection of local, state, and national higher education policies and educational and social inequalities. Jason is currently the Graduate Student Board Member for the Council for the Study of Community Colleges.

EUNKYOUNG PARK is a Ph.D. Candidate in the higher education and student affairs program, with a minor in inquiry, at Indiana University Bloomington. She is a research analyst at the Institute for Higher Education Policy (IHEP) in Washington, DC. Eunkyoun's research interests include higher education access and success, data, quantitative research methods, community colleges, financial aid, and equity.

DAVID J. SEILER is a history instructor at Lake Land College, Mattoon IL, and a Ph.D. Candidate at Indiana State University in the educational administration program with a specialization in higher education leadership.

Dual Credit in U.S. Higher Education

Questionnaire

Dual Credit State Policy & Quality Assurance Template

State Name:

Primary State Policy Links	
Policy Number or Name	Website Link

This study primarily focuses on **college-level courses**, offered under the aegis of a postsecondary institution that are **taught in high schools** by either high school teachers or college (full- or part-time) faculty, **where students receive college credit and credit toward their high school diploma** upon successfully completing the course. We are interested in state policies that pertain to these “high-school located, dual credit courses,” even if they also pertain more broadly to college-level courses taken by high school students at other locations (at a college or online) or to courses that do not count toward the high school diploma.

We understand that terminology varies from state to state regarding what we are referring to as dual credit, but may also be referred to as dual enrollment, concurrent enrollment or otherwise. We will use the term dual credit throughout this questionnaire to refer to these “high-school located, dual credit courses” and will work with each state to better understand the local terminology and distinctions that are made for this and related phenomenon (e.g., college classes offered to high school students on college campuses or through distance learning).

State Policy: We follow the work of Karp et al. (2005) and define policy as written policy such as state legislation, state board or agency guidelines or procedures, or other state-mandated written policies. We do not consider unofficial procedures or institutional practice state policy. In an effort to describe and document state policy, we have collected state policies (statutes, guidelines, procedures, etc.) that pertain to our focus, high-school located dual credit courses.

Regulatory Oversight

1. Does the state grant statutory or regulatory oversight to one or more specific state agencies?

YES NO

If YES, which organizations?

--

Definitions

2. What term(s) are commonly used in your state to identify and distinguish among various forms of high school student enrollment in college-level courses (e.g., dual credit, dual enrollment, concurrent enrollment, etc.)? How are these terms officially defined?

Form	Definition

3. What term (if any) is used to describe the high school-located dual credit courses that are the primary focus of our study?

--

Who Can or Must Provide Dual Credit Courses?

4. Does state policy require colleges to offer dual credit courses?

YES NO

If YES, what are the provisions or stipulations (e.g., mandatory, voluntary, local decision, etc.)?

--

Other Comments	
-------------------	--

5. Does state policy dictate what types of colleges can or cannot offer or provide dual credit courses?

YES NO

- a. If YES, which of the following types of institutions **CAN** offer or provide dual credit (select all that apply)?

PUBLIC PRIVATE TWO YEAR FOUR YEAR

b. If YES, do state policies on dual credit courses generally apply to all institutions, only public institutions, or does it vary by policy?

PUBLIC ONLY BOTH PUBLIC AND PRIVATE VARIES BY POLICY

Other Comments	
----------------	--

6. Does state policy require high schools to have dual credit opportunities available for its students?

YES NO

a. If YES, what are the provisions or stipulations (e.g., mandatory, voluntary, local decision, etc.)?

--

Other Comments	
----------------	--

7. Does state policy place restrictions on the types of courses that colleges can or cannot offer or provide?

YES NO

a. If YES, are there any subject restrictions?

YES NO

If YES, what are the restrictions?

--

Other Comments	
----------------	--

b. Is there a minimum or maximum number of courses that colleges can offer or provide?

YES NO

If YES, specify the minimum or maximum numbers?

--

Other Comments	
----------------	--

- c. Does state policy require dual credit courses to connect to statewide transfer articulation (if a state has such an agreement)?

YES NO Not applicable (no statewide transfer articulation program)

If YES, specify the requirements or restrictions?

--

Other Comments	
----------------	--

- d. Does state policy require dual credit courses to connect to a statewide general education program (If such a program exists)?

YES NO Not applicable (no statewide gened program)

If YES, what are the requirements or restrictions?

--

Other Comments	
----------------	--

- e. What other restrictions are included as provisions of state policy regarding what dual credit courses can or cannot be offered?

--

Other Comments	
----------------	--

8. How does the state enforce policies regarding **who can or must provide** dual credit courses?

--

Who Can Take Dual Credit Courses?

9. Does state policy regulate how students or parents learn about dual credit opportunities?

YES NO

If YES, specify regulations (e.g., information sharing, counseling, notification of opportunities, recruitment processes, application processes, etc.)

--

10. Does state policy regulate which students can participate in dual credit?

YES NO | **If NO, Skip to Next Section**

a. Does state policy mandate a minimum grade level?

YES NO If YES, specify:

b. Does state policy mandate a minimum age requirement

YES NO If YES, specify:

c. Does state policy mandate a minimum GPA requirement

YES NO If YES, specify:

Other Comments on a. to c.	
-------------------------------	--

d. Does state policy mandate certain standardized exam scores?

YES NO

If YES, what exams and what are the requirements or restrictions?

--

Other Comments	
----------------	--

e. Does state policy mandate or require course pre-requisites?

YES NO

If YES, what are they?

--

Other Comments	
----------------	--

- f. Does state policy regulate the minimum or maximum number of courses or credits a student can take?

YES NO

If YES, what are they?

Course minima or maxima:

Credit minima or maxima:

Other Comments	
----------------	--

- g. Does state policy dictate whether dual credit classes can or cannot be mixed where some students are enrolled for college credit and others are enrolled only for high school credit?

YES NO

If YES, what is the requirement or restriction (e.g., is there a particular ratio or percent) ?

--

Other Comments	
----------------	--

- h. Does state policy dictate whether or not college students can enroll in dual credit classes in the high school?

YES NO

If YES, what is the requirement or restriction?

--

Other Comments	
----------------	--

- i. Does state policy articulate when students must sign up to take the course for dual credit? YES. NO.

YES NO

If YES, what is the requirement or restriction?

--

Other Comments	
----------------	--

j. Does state policy mandate any other eligibility requirements (or ineligibility requirements)?

YES NO

If YES, what are they?

--

Other Comments	
----------------	--

k. Does state policy allow for exceptions or waivers for any of the eligibility requirements?

YES NO

If YES, what are they?

--

Other Comments	
----------------	--

11. How does the state enforce policies regarding who can **take** dual credit courses?

--

Who Can Teach Dual Credit Courses?

12. Does state policy have requirements or restrictions on who can teach dual credit courses?

YES NO | **If NO, Skip to Next Section**

Other Comments	
----------------	--

- a. Does state policy specify that those teaching high-school located dual credit courses must have the same credentials those teaching at the offering college?

YES NO

- b. Does state policy specify a specific degree-level requirement for dual credit faculty?

YES NO If YES, specify:

- c. Does state policy require dual credit faculty to have an appropriate high school teaching credential?

YES NO If YES, specify:

- d. Does state policy require that dual credit faculty have a degree or minimum coursework in the subject area that they teach?

YES NO If YES, specify:

Other Comments on a. to d.	<input type="text"/>
-------------------------------	----------------------

- e. Does state policy include procedures for faculty selection and approval?

YES NO

If YES, what are they?

Other Comments	<input type="text"/>
----------------	----------------------

- f. Does state policy mandate or require training **prior** to faculty teaching dual credit courses?

YES NO

If YES, what is mandated or required?

Other Comments	<input type="text"/>
----------------	----------------------

- g. Does state policy mandate training or professional development for **active** dual credit faculty?

YES NO

If YES, what is mandated or required?

--

Other Comments	
----------------	--

h. Does state policy include other requirements necessary for dual credit faculty to maintain teaching eligibility?

YES NO

If YES, what is required?

--

i. Does state policy allow for exceptions or waivers for any of the requirements or restrictions for dual credit faculty?

YES NO

If YES, what are the conditions of the exceptions or waivers?

--

Other Comments	
----------------	--

13. How does the state enforce policies regarding who can **teach** dual credit courses?

--

Quality Assurance

14. Does state policy require any form of accreditation such as that offered by the National Alliance of Concurrent Enrollment Partnerships (NACEP)?

YES NO

If YES, what are the requirements?

--

Other Comments	
-------------------	--

15. Does state policy provide incentives for accreditation?

YES NO

If YES, what are the incentives?

--

Other Comments	
-------------------	--

16. Does state policy require annual (or other regular) reports on dual credit activities?

YES NO

If YES, specify who reports, what is reported, how often, and to whom it is reported?

--

Other Comments	
-------------------	--

17. Aside from state-policy required reporting, is there any ad hoc or recurring reporting on dual credit for the legislature?

YES NO

If YES, what is reported, by whom, how often, and to whom?

--

Other Comments	
-------------------	--

***CAN WE RECEIVE COPIES OF THESE REPORTS?**

18. Does state policy require students to obtain a minimum grade to receive college credit for the course?

YES NO

If YES, what is the grade requirement?

--

Other Comments	
-------------------	--

19. Does state policy regulate dual credit course quality or rigor? In other words, does state policy explicitly reference course designs, outcomes, assessments, learning outcomes, course expectations, or other dimensions related to course quality or rigor?

YES NO

If YES, specify requirements (e.g., course designs, outcomes, or assessments?)

--

Other Comments	
-------------------	--

20. Does state policy regulate the student registration processes?

YES NO

If YES, specify requirements (e.g., course transcription, articulation, or student rights and responsibilities?)

--

Other Comments	
-------------------	--

21. Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

YES NO

If YES, specify regulations

--

Other Comments	
-------------------	--

22. Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

YES NO

If YES, specify requirements

--

Other Comments	
-------------------	--

23. Does state policy mandate that dual credit courses appear in the offering institution's catalog?

YES NO

If YES, specify requirements

--

Other Comments	
-------------------	--

24. Does state policy include requirements for classroom visitation by college faculty?

YES NO

If YES, specify requirements (what happens during visits, how often, etc?)

--

Other Comments	
-------------------	--

25. Does state policy include other requirements for high school and college faculty to meet or interact?

YES NO

If YES, specify requirements (what happens during visits, how often, etc?)

--

Other Comments	
-------------------	--

26. Does state policy regulate who at the postsecondary institutions has oversight for faculty credentials and faculty eligibility requirements (e.g., academic departments, dean or chief academic officer, human resources, etc.)?

YES NO

If YES, specify requirements

--

Other Comments	
-------------------	--

27. Does state policy require the monitoring of outcomes or impacts at any level?

YES NO

If YES, specify requirements (what outcomes or measures, at what levels, by whom?)

--

Other Comments	
-------------------	--

28. Does state policy require surveys of dual credit stakeholders (teachers, principals, college faculty/instructors, other)?

YES NO

If YES, specify requirements (which stakeholders, how frequently, reported to whom?)

--

Other Comments	
-------------------	--

29. Does state policy mandate any other forms of evaluation and/or review not yet mentioned?

YES NO

If YES, specify requirements

--

Other Comments	
-------------------	--

30. How does the state enforce policies regarding **quality assurance** in dual credit courses?

--

Finance and Resources

31. Does state policy provide ANY direct funding to the high school or college for dual credit?

YES NO

If YES, specify provisions and parameters

--

Other Comments	
-------------------	--

32. Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

YES NO

If YES, specify requirements. (student/parent pays, high school pays, college pays, state pays-as in a direct grant, college/high school decides who pays)

--

Other Comments	
-------------------	--

33. Does state policy regulate who pays for books related to dual credit courses?

YES NO

If YES, specify regulations or requirements.

--

Other Comments	
-------------------	--

34. If state policy requires students/parents to pay, does state policy provide forms of financial support to students/parents?

YES NO

If YES, what forms of support are provided?

--

Other Comments	
-------------------	--

35. Does state policy allow (or disallow) high schools to collect the full amount or a portion of “Average Daily Attendance” (ADA) funding for dual credit students?

FULL AMOUNT PORTION, Specify:

NONE Not Applicable (No ADA funding credit in state)

Specify requirements?

--

Other Comments	
-------------------	--

36. Does state policy allow (or disallow) colleges to collect Full-Time Equivalent (FTE) funding credit for dual credit students?

FULL AMOUNT PORTION, Specify:

NONE Not Applicable (No FTE funding credit in state)

Specify requirements?

--

Other Comments	
-------------------	--

37. Does state policy regulate faculty salary or compensation for teaching dual credit classes?

YES NO

If YES, what are the regulations?

Other Comments	
-------------------	--

38. Does state policy provide additional state financial incentives for institutional participation in dual credit not yet mentioned?

YES NO

If YES, what are the incentives?

Other Comments	
-------------------	--

39. How does the state enforce policies **finances and resources** for dual credit courses?

Other/Final Questions

40. Are there other salient state policy dimensions that have not been covered? What are they?

41. What have been the most recent dual credit policy changes and why were they enacted?

42. What are currently the most pressing dual credit policy and practice issues?

ALABAMA

Dual enrollment is the common term for college-level courses taught on the high school campus. The primary statewide policies for Alabama apply to the community college sector, although state contacts indicated that four-year colleges—both public and private—do offer dual credit but each college has their own policy. In addition to a general dual enrollment policy, Alabama has an Early College Enrollment Program that provides a policy framework for offering college credits toward a technical or health certificate and/or degree aligned with local workforce needs.

ALASKA

Alaska does not have a statewide policy for dual credit, despite that college-level courses are being provided in the high schools. However, each of the University of Alaska campuses have dual credit policies specific to their campuses.

ARIZONA

Dual enrollment is the common term for college-level courses taught on the high school campus. Community colleges are the dominant provider of dual credit in Arizona, and although there is not a statewide coordinating board, there is state legislation that governs the provision of dual credit in community colleges.

ARKANSAS

Concurrent enrollment is the common term used by high school students who take college courses for high school and college credit. The Arkansas Department of Higher Education and the Arkansas Department of Education are jointly responsive for concurrent enrollment in Arkansas. State legislation governs concurrent enrollment activity, and the Arkansas Department of Higher Education has additional board policies that govern concurrent enrollment.

CALIFORNIA

Concurrent enrollment is the common term used for the delivery of college level courses while in high school. A series of legislative actions have formed the policy framework for concurrent enrollment in California. These policies apply to the community college system, which is the predominant provider of concurrent enrollment in the state. However, the California State University system does offer college level courses in high schools, which are often delivered through extended studies or extensions.

COLORADO

Concurrent enrollment, as it is referred to in Colorado, is governed by statute, and both the Colorado Commission on Higher Education and Colorado Department of Education have oversight responsibilities. The community colleges provide most of the concurrent enrollment, but four-year institutions can also provide concurrent enrollment. In addition to concurrent

enrollment, state policy created the ASCENT program, a program for students who stay in high school beyond the 12th grade and simultaneously earn college credit.

CONNECTICUT

Recently reorganized as a state higher education system, the four public state systems, 12 public community colleges, and the public online system share a single Board of Regents in Connecticut. The only state-wide policy on dual credit is one carried over from the previous Board of Trustees of the Community and Technical Colleges that still applies to community colleges. In addition to this policy, the University of Connecticut has established policies for campuses operating the Early College Experience program that constitutes about half of the state's dual credit enrollments.

DELAWARE

Delaware has administrative code that provides the policy framework for dual credit and dual enrollment. Policy requires all institutions operating dual credit and dual enrollment to have articulation agreements that define agreement parameters, and policy requires institutional policies be filed with the Department of Education.

FLORIDA

Policies for dual enrollment in Florida are written into state statute and apply to all public institutions, although there is additional policies for the Florida College System (applies to Florida's community colleges). State statute gives authority to the Florida Department of Education and the Florida College System institutions' Board of Trustees.

GEORGIA

Dual credit, joint enrollment, and the Accell program are all forms of dual credit with different definitions in Georgia, and all of which may be offered on a high school or college campus. Authority and oversight for dual credit is shared among the Georgia Department of Education, the Board of Regents of the University of Georgia, and the Board of Technical and Adult Education. State policy for dual credit is in state code and all postsecondary institutional types are allowed to provide dual credit.

HAWAII

The Running Start program is the predominant dual credit model in Hawaii and almost all dual credit courses are offered on the college campus, although a few are on the high school campus. State statute established the Running Start program and provides the policy framework for the provision of dual credit in Hawaii. Policy allows both public two-year and four-year colleges to offer dual credit.

IDAHO

Dual credit in Idaho is embedded in state statutes under the Postsecondary Enrollment Options, which also includes Tech Prep. The Department of Education, Idaho State Board of Education, and the Superintendent of Public Instruction all have authority for dual credit.

ILLINOIS

Dual credit and dual enrollment policies were established in state law via the Dual Credit Quality Act, but the Illinois Community College Board has established additional administrative rules. State policy allows all postsecondary institutional types to provide dual credit, but the community college system provides the preponderance of dual credit and dual enrollment in the state. State policy assigns oversight and authority of dual credit and dual enrollment to both the Illinois Community College Board and the Illinois Board of Higher Education.

INDIANA

Indiana's dual credit policy was established in state code under the Postsecondary Enrollment Options, and all high schools are required to offer dual credit. State policy allows all postsecondary institutional types to provide dual credit, but the Indiana Commission on Higher Education has recently developed a 'preferred provider' list. The Double Up program is a dual credit program only for Ivy Tech Community Colleges, but those courses are at the Ivy Tech campuses and not at the high school location. State policy assigns oversight authority to the Indiana Commission on Higher Education, the State Board of Education, and the Department of Education.

IOWA

Joint enrollment is an umbrella term for high school students enrolled in community colleges, and concurrent enrollment is the common term used for academic and career and technical dual credit courses. Concurrent enrollment is established in state policy by the Senior Year Plus program, and the Iowa Department of Education has oversight responsibility for the program.

KANSAS

Concurrent enrollment, as it is called in Kansas, is in state statute and policy assign authority for concurrent enrollment to the Kansas Board of Regents. Policy allows all public institutions to provide concurrent enrollment.

KENTUCKY

Policy for dual credit and dual enrollment in Kentucky is both in state statutes and in guidelines set forth by the Kentucky Council on Postsecondary Education. Policy applies to public postsecondary institutions, and oversight and authority is provided by the Kentucky Council on Postsecondary Education, the Kentucky Board of Education, and Education Professional Standards Board.

LOUISIANA

The Louisiana State Board of Regents has a history of encouraging participation in Dual Enrollment through its Early Start program. Early Start empowered community colleges and universities to oversee all forms of dual enrollment. However, the program is currently unfunded by the Louisiana state legislature and consequently dual enrollment is limited.

MAINE

Dual Enrollment in Maine is primarily a product of the Maine Aspirations program, an early college program promoted by the Maine Department of Education, and the Early College For ME program of the Maine Community College System. Maine Aspirations allows high school juniors and seniors to participate in dual enrollment with oversight from Maine colleges and universities. Early College For ME provides coordination of dual enrollment within the Community College System. In addition, a number of public and private institutions of higher education have developed dual enrollment relationships with high schools in the State which vary in structure and in the number of credits a student can attain in high school.

MARYLAND

Dual Credit in Maryland has few state regulations and primarily operates under the auspices of the college or university system with which a secondary school chooses to associate. Students are limited to no more than 30 hours of dual credit.

MASSACHUSETTS

There is a long history of Dual Enrollment in Massachusetts operating under the direction of colleges and universities. Massachusetts' state-funded dual enrollment was first established in 1993 (MGL, Chapter 15A, Section 39) and was a successful program managed by the Department of Elementary and Secondary Education (DESE) through 2001, after which time it was eliminated. The program was restored by the Legislature in 2008 to the Department of Higher Education and subsequently renamed the Commonwealth Dual Enrollment Program (CDEP). Since this period of time the program has remained funded and is regarded as highly successful, although unable to meet student demand due a yearly allocation of only \$750,000 across 28 public campuses. CDEP focuses on the enrollment of low income students, first generation college students and students interested in the STEM fields. In this way, the program encourages participation for students who have historically been underrepresented in dual enrollment and is aligned with the state's workforce development priorities.

MICHIGAN

While the Michigan legislature recently revised the Dual Enrollment code for the state, Dual Credit in Michigan is largely under the supervision of the colleges and universities.

MINNESOTA

Concurrent Enrollment in Minnesota is related to, but statutorily independent from, the state's Postsecondary Enrollment Options (PSEO) program. Concurrent enrollment is

implemented in accordance with the policies established by respective governing bodies of the public postsecondary systems. At issue in Minnesota are concerns with funding and costs, utilization of NACEP (or NACEP-like) standards, differential credentialing of concurrent enrollment instructors, and overall alignment of grades 11-12 and postsecondary education.

MISSISSIPPI

While Mississippi Code provides some general outline provisions for Dual Credit in the state, programs are designated by the Code to function primarily under the direction of agreements established by local school board, the Board of Trustees of State Institutions of Higher Learning and the State Board for Community and Junior Colleges.

MISSOURI

The Missouri Department of Higher Education has oversight for higher education institutions' implementation of dual credit programs in the high school. The Coordinating Board for Higher Education Dual Credit Policy requires higher education institutions offering dual credit programs to provide evidence of compliance with the policy and assigns accountability for the academic quality of the courses delivered to the chief academic officer of the college or university.

MONTANA

Dual Enrollment in Montana is primarily a high school based system regulated by policy from the Montana Board of Regents (BoR) and Montana Office of Public Instruction (OPI). Under that umbrella of state policy, Dual Enrollment in Montana is implemented by the community colleges as well as the Montana University System and programs are directed by state policy to follow guidelines of the National Alliance of Concurrent Enrollment Partnerships (NACEP). Dual Enrollment students are primarily at the junior/senior level. Unique to Montana in comparison to all other states is a BoR/OPI requirement that any Dual Enrollment instructor must be must have state certification to teach at the K-12 level.

NEBRASKA

Nebraska statutes suggest some guidelines for implementation of Dual Credit. High schools have taken on the charge to implement Dual Credit but efforts to maintain consistent program guidelines have proven difficult.

NEVADA

Little state policy regarding Dual Credit exists in Nevada and thus programs develop under the auspices of the college with which a high school associates itself.

NEW HAMPSHIRE

New Hampshire statutes grant authority regarding Dual Credit to the Community College System of New Hampshire. The vehicle for this legislative initiative is the Running Start program which enables select high school juniors and seniors to take courses in their high

school which may count toward college credit. Running Start emphasizes the connection between a designated college faculty partner and the high school based instructor of the course.

NEW JERSEY

New Jersey statutes encourage “the availability of college-level instruction for high school students through courses offered by institutions of higher education at their campuses and in high schools” but leave implementation of said programs largely up to the schools.

NEW MEXICO

New Mexico statutes maintain that school districts may establish agreements to offer Dual Credit courses with the community colleges in their “geographic area of responsibility” or any willing four-year institution. Because statutory guidelines for such agreements are limited, the program agreements can vary widely across the state. In addition, many students participate in Dual Credit through the Innovative Digital Education and Learning (IDEAL) online learning program sponsored by an agreement of New Mexico K-12 districts and high education institutions.

NEW YORK

While statutes are largely silent in regards to Concurrent Enrollment, programs have long existed under the umbrella of the State University of New York (SUNY) community college system. Many of the participating SUNY schools have joined together in the New York Concurrent Enrollment Partnership (NYCEP) to implement standards created by the National Alliance for Concurrent Enrollment Programs (NACEP).

NORTH CAROLINA

North Carolina has provided high school students with tuition free dual enrollment programs since 1983. In January of 2012 the legislature approved Career and College Promise and a new set of operating procedures to guide the state’s dual enrollment programs. Career and College Promise consists of three pathways: Cooperative and Innovative High Schools (Early and Middle College), College Transfer Pathways, and Career and Technical Education Pathways.

Each of the programs provides eligible high school students a tuition free, clear path toward a technical degree or transfer credit depending on the student’s interests and abilities.

NORTH DAKOTA

Shaped by North Dakota statute, North Dakota University System policy, and the Department of Public Instruction, Dual Credit in North Dakota is primarily a high school based system where the school district generally forms cooperative agreements with its associated community college or regional four-year institution. Details regarding tuition and other aspects vary by agreement.

OHIO

Ohio provides several dual enrollment options for high school students to earn both high school and college credit during high school, including Postsecondary Enrollment Options, Seniors to Sophomores, dual enrollment offerings on high school campuses, Early College High School, and College Tech Prep programs. Policies vary by program. While not being written into Ohio Administrative Code or Ohio Revised Code, the Ohio Department of Education and the Ohio Board of Regents have developed and shared recommendations for quality dual enrollment programs.

OKLAHOMA

Concurrent Enrollment is the term for high school enrollment in college-level courses. Oklahoma State Regents for Higher Education (OSRHE) establishes policies regarding concurrent enrollment admission and retention and requires public institutions to provide concurrent enrollment opportunities for qualified students. Oklahoma policy establishes a number of requirements for student eligibility and faculty credentials.

OREGON

Oregon requires school districts to ensure access to accelerated college credit programs including dual credit under the direction of the State Boards of Education and the State Board of Higher Education—Oregon Department of Education, Oregon Department of Community Colleges and Workforce Development, and Oregon University System. To provide dual credit programs, public high schools, community colleges, and state institutions of higher education in Oregon must implement statewide standards (e.g., student eligibility, faculty credential) developed by the State Boards of Education and the State Board of Higher Education.

PENNSYLVANIA

Pennsylvania had a fairly comprehensive set of policies under the “Opportunities for Educational Excellence” legislative program. Funding for the program was eliminated under the current governor rendering the program moot. The state is currently reformulating its policies in this area.

SOUTH CAROLINA

Two- and Four-year public institutions in South Carolina provide dual credit under the direction of the South Carolina Commission of Higher Education. The Commission of Higher Education sets statewide policy and guidelines for each dual enrollment course and requires institutions to develop an annual report demonstrating compliance with these policy and guidelines.

SOUTH DAKOTA

Although there is no official state policy in South Dakota, the South Dakota Board of Regents has established policies and guidelines governing the range of dual credit offerings that can be sponsored by the public universities under control and the transfer credit that can be

awarded by the public universities under their control to students completing dual credit offerings sponsored by all other colleges and universities.

TENNESSEE

Dual enrollment is the common term for college-level courses taught on the high school campus. Dual enrollment courses can be offered by public and private two- and four-year institutions with approval of the postsecondary institution's governing board. The LEA and the institution's governing board monitor student eligibility, faculty credential, and course quality. Tennessee requires high school students to obtain C or better to earn college credit.

TEXAS

Under the policy and guidelines of the Texas Higher Education Coordinating Board (THECB) and the Texas Education Agency, public two- and four-year institutions provide dual credit. In order to take dual credit courses, students must be ready for college-level work, as evidenced by their performance on a THECB-approved assessment. The eligibility standards are higher for academic dual credit than for technical dual credit. While not being subject to Coordinating Board dual credit rules, many private institutions in Texas also provide dual credit.

VERMONT

In Vermont, dual enrollment is the common term for the enrollment by high school students in accredited college courses for both secondary and postsecondary credits. While some colleges have direct partnerships with local high schools, state-subsidized dual enrollment courses are provided at the college campus rather than high school campus for the full college experience. An exception to this is the fast forward program. Vermont only has one community college in the state (community college Vermont) and the state appropriation for dual enrollment supports a voucher for individual students to enroll in a college class on campus at participating public and private colleges. For the state-funded dual enrollment program, which is administered by the chancellor of the Vermont state colleges, there are neither secondary partners nor express statewide policies.

VIRGINIA

The Virginia Plan for Dual Enrollment gives a statewide framework for dual enrollment arrangements between public school divisions and community colleges. These arrangements are made at the local level—between the representatives or boards of the participating public school division and the participating community college authorized to contract such arrangements. The State Council of Higher Education for Virginia (SCHEV) is a coordinating body, but does not have statutory or regulatory oversight. State legislation, House Bill 1184, requires local school boards and community colleges to develop agreements allowing high school students to complete a one year certificate or an associate's degree concurrent with high school graduation. While House Bill 1184 only applies to two-year public institutions, four-year institutions may also offer dual enrollment courses.

WASHINGTON

The Office of the Superintendent of Public Instruction (OSPI) and The State Board for Community and Technical Colleges (SBCTC) provide general oversight of dual credit programs in Washington in collaboration with baccalaureate institutions and the Washington Student Achievement Council. Washington provides many ways to take dual credit including College in the High School, Tech Prep, Cambridge, International Baccalaureate, and Running Start. The Revised Code of Washington (RCW) provides general policies for dual credit with variations for each dual credit program. The Office of the Superintendent of Public Instruction, in collaboration with other institutions and agencies,, reports annually to the education and higher education committees of the legislature regarding participation in dual credit programs.

WEST VIRGINIA

Dual credit in West Virginia is referred to as Early Enrollment Courses. As mandated by code, the Virginia Higher Education Policy Commission and the West Virginia Council for Community and Technical College Education have developed identical policies to guide the offering of early enrollment courses in West Virginia. All public institutions may offer early enrollment courses under the guidance of state policy. The statewide academic affairs office meets regularly with institutional academic officers to enforce policies regarding dual credit.

WISCONSIN

Wisconsin has three different governing entities: The Wisconsin Department of Public Instruction, the Wisconsin Technical College System-State Board, and the University Of Wisconsin System Board Of Regents. Several dual credit options are available for high school students in Wisconsin; among those, Transcribed Credit, Advanced Standing, and College Credit in High School programs, and other academic partnerships, are some of the college-level options offered to high school students at high school campus locations, by high school faculty. Program names and policies vary by program and governing entity.

WYOMING

Concurrent Enrollment is the term used in Wyoming for college courses taken by high school students that are taught by a qualified high school faculty member as part of that faculty member's teaching contact with the school district. Dual enrollment is the term used for college courses taken by high school students that are taught by a community college faculty member or a UW faculty member. Either must be transcribed by the school district to meet high school graduation requirements and by either UW or a community college as a college course. Public school districts are required to provide access to dual or concurrent enrollment by law. Wyoming statute requires school districts that provide access to concurrent enrollment and/or dual enrollment to have a written postsecondary options memo of understanding with either a public community college or the public four-year institution (University of Wyoming). There is no specific agency that has statutory or regulatory oversight. The Wyoming Community College Commission is required to make an annual postsecondary options program report to the Wyoming Legislature.

Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments:

<p>"Participating local boards of education and postsecondary institutions shall develop a Dual Enrollment Agreement that includes but is not limited to the following:</p> <p>A. Approval of the particular courses to be offered and the high school equivalency for each course shall be determined through the mutual agreement of the participating postsecondary institution(s) and the participating local board of education. Courses must be of Postsecondary level.</p> <p>B. Dual Credit/Dual Enrollment instructors shall be faculty of the College. A high school teacher employed to teach in dual credit/dual enrollment will be designated as an adjunct faculty member of the College and therefore must meet the credentialing requirements of the State Board of Education and other accrediting agencies. Faculty must be under the ultimate control and supervision of the college. The college must provide for faculty orientation, supervision, and evaluation. Documentation of appropriate instructor credentials which meet or exceed accrediting agencies must be on file at the college. College faculty credentials shall be provided to the local school board of education as needed to meet credential standards of accrediting agencies.</p> <p>C. The college shall be responsible for the compensation of faculty, in accordance with State Board of Education and college policy. Faculty may not receive dual compensation for instructional time.</p> <p>D. Six semester hours at the postsecondary level shall equal one credit at the high school level in the same or related subject. Partial credit agreements shall be developed between the College and the School Board. The State Board of Education Policy 705.01 defines a "credit hour" as not less than 50 minutes of instructor/student contact. A semester hour of credit is based upon the average number of hours of instruction taught weekly, the ratio of weekly contact hours to credit hour varies with the type of instruction being used. There are four general categories of instruction: theory, experimental laboratory, clinical practice/manipulative laboratory, and internship.</p> <p>E. College courses approved for dual credit shall be posted on both high school and college transcripts. Courses completed for dual credit shall be transcripted with the appropriate statement at the postsecondary level indicating dual enrollment credit. (August 2008)</p> <p>F. Payment of the current rate of tuition and fees per credit hour, textbooks and materials will be the responsibility of the student unless other resources are available. Full payment of tuition must be completed by the first day of class. School Boards will be notified of any unpaid tuition and fees prior to the start of classes.</p> <p>G. A plan for an annual evaluation of dual enrollment/dual credit shall be prepared and shall adhere to guidelines of the Department of Postsecondary Education. The college and the local School Board shall assume the responsibility for reporting required information in a timely manner.</p> <p>H. Students are responsible for knowing policies relative to dual enrollment/dual credit of colleges/universities to which they plan to transfer credit. The College reserves the right to refuse readmission to any student who is found to be in violation of college policies (academic standards of progress, Student Code of Conduct, etc.).</p> <p>I. Methods for addressing student related issues such as: admissions, procedures, advisement, monitoring and evaluation, privacy rights, ADA issues, and verification of student attendance must be addressed in the agreement.</p> <p>J. Transportation for any student receiving instruction at any facility other than a school campus of the local School Board shall be the</p>

responsibility of the parents/guardian of such students unless otherwise negotiated between the college and the local School Board.
 K. Each party agrees to provide a mechanism for communicating the educational and economic benefits as well as the requirements for participation and enrollment procedures to parents and students. This must include the student's release of educational records as defined by FERPA for and between the college and the local School Board.
 L. A copy of Policy 801.03 and its guidelines must be included in the Dual Enrollment/Dual Credit agreement (Appendix A)."

Grade Level: "All students enrolled for college credit shall be high school juniors or seniors."

Age: For any student under 18: "15-1821. Special admission of students under age eighteen; enrollment information; reports

A. Each community college district board shall adopt policies that require community colleges under its jurisdiction to admit students under age eighteen who have not yet attained a high school diploma or high school certificate of equivalency and who meet the established requirements of the courses for which they enroll. The Arizona board of regents shall adopt rules that require the universities under its jurisdiction to admit students under age eighteen who have not yet attained a high school diploma or high school certificate of equivalency and who meet the established requirements of the courses for which they enroll.

B. The policies and rules as provided in subsection A of this section shall include the following provisions:

1. A student under age eighteen shall not be denied admission because of age, lack of a high school diploma or high school certificate of equivalency, grade in school, lack of permission of school officials or lack of concurrent enrollment in a public or private school, if the student has achieved at least a specified score on a college entrance examination.
2. A community college or university that admits a student pursuant to paragraph 1 of this subsection may limit the number of semester credit hours in which the student may enroll to no less than six semester credit hours.
3. A student admitted to a community college or university pursuant to paragraph 1 of this subsection is not guaranteed admission to a specific degree program or to all courses offered by the community college or university.

C. Each community college district and the Arizona board of regents shall provide all high schools in this state with information that describes the policies and rules, as appropriate, the types of courses available and other information related to the enrollment of students under the age of eighteen. Each unified or high school district school shall make this information available to all students in at least grades nine through twelve.

D. On or before November 15 of each year, the Arizona board of regents shall submit a report to the president of the senate, the speaker of the house of representatives and the state board of education and shall provide a copy of this report to the secretary of state on students under eighteen years of age who had not yet attained a high school diploma or high school certificate of equivalency and who were enrolled in a university course or a program for university credit during the time period of September of the previous fiscal year through August of the current fiscal year. The annual report shall include at least the following:

1. The number of students who were enrolled.
2. A general narrative of the types of courses or programs in which the students were enrolled.
3. The rules adopted pursuant to subsection A of this section.

E. On or before September 30 of each year, each institution under the jurisdiction of the Arizona board of regents shall submit to the Arizona board of regents in the form specified by the Arizona board of regents the information that the Arizona board of regents needs to compile the report required in subsection D of this section."

Exam Scores: "All students in the course, including those not electing to enroll for college credit, shall satisfy the prerequisites for the course as published in the college catalog and shall comply with college policies regarding student placement in courses."

Pre-reqs: "All students in the course, including those not electing to enroll for college credit, shall satisfy the prerequisites for the course as published in the college catalog and shall comply with college policies regarding student placement in courses."

Mix NonDC: "All students in the course, including those not electing to enroll for college credit, shall satisfy the prerequisites for the course as published in the college catalog and shall comply with college policies regarding student placement in courses."

College Stds.: By DE definition, you have to be a high school student.

Registration Timing:

Waivers: "(b) A community college may waive the class status requirements specified in subdivision (a) of this paragraph for up to twenty-five per cent of the students enrolled by a college in courses, provided that the community college has an established written criteria for waiving the requirements for each course. These criteria shall include a demonstration, by an examination of the specific purposes and requirements of the course, that freshman and sophomore students who meet course prerequisites are prepared to benefit from the college level course. All exceptions and the justification for the exceptions shall be reported annually to the joint legislative budget committee on or before October 1."

Aside from state-policy required reporting, is there any ad hoc or recurring reporting on dual credit for the legislature?

Not Mentioned	Overall Report Required	For Special Programs	Both
	X		

Comments: http://www.adhe.edu/SiteCollectionDocuments/Comprehensive%20Report/24%20-%20Quick_Surveys-FINAL.pdf

Does state policy require students to obtain a minimum grade to receive college credit for the course?

Not Mentioned	College Criteria	Statewide Criteria
X		

Comments:

Does state policy regulate dual credit course quality or rigor? In other words, does state policy explicitly reference course designs, outcomes, assessments, learning outcomes, course expectations, or other dimensions related to course quality or rigor?

Not Mentioned	College Criteria	Statewide Criteria
	X	

Comments: HB 1730: "The course content and instruction must meet the same standards and adopt the same learning outcomes as those developed for a course taught on the campus of the institution of higher education, including without limitation: (A) The administration of any departmental exams applicable to the course; and (B) The use of substantially the same book and syllabus as is used at the college level;" "A course will be required to meet the same standards as college courses taught on the campus. The faculty will use the same syllabus, same textbook as approved by the college or university and adopt the same learning outcomes as those developed for the course on the campus."

Does state policy regulate the student registration or transcripting processes requirements (e.g., course transcription, articulation, or student rights and responsibilities)?

Not Mentioned	College Criteria	Statewide Criteria
		X

Comments: "The institution of higher education offering the course must:(B)(i) Provide the students enrolled in the course with: (a) Academic guidance counseling;"

Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: "A memorandum of understanding should exist to reflect the various expectations, obligations, and responsibilities of all parties. The college administration should execute the contract with the faculty member and/or the high school."

Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: HB 1730: "The institution of higher education offering the course must:(B)(i) Provide the students enrolled in the course with: (b) The opportunity to utilize the on-campus library or other academic resources of the institution of higher education."

Does state policy mandate that dual credit courses appear in the offering institution's catalog?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: "Concurrent credit courses must be college or university courses that are approved through the normal process of an institution and included in the catalog."

Does state policy include requirements for classroom visitation by college faculty?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: "Concurrent credit instructors will receive continuing collegial interaction with college faculty through annual professional development, required seminars and site visits. These interactions will address issues such as course content, course delivery, student learning assessment, in-class evaluation and professional development in the field of study."

Does state policy include other requirements for high school and college faculty to meet or interact?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy regulate who at the postsecondary institutions has oversight for faculty credentials and faculty eligibility requirements (e.g., academic departments, dean or chief academic officer, human resources, etc.)?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: From HB 1730: "The instructor's credentials shall be approved by the academic unit or chief academic officer of the institution of higher education offering the endorsed concurrent enrollment course;"

Does state policy require the monitoring of outcomes or impacts at any level?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy require surveys of dual credit stakeholders (teachers, principals, college faculty/instructors, other)?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments: Although NACEP requirements would eventually apply here.

Does state policy mandate any other forms of evaluation and/or review not yet mentioned?

Comments: For dual enrollment, either the high school or the college gets the money: "Notwithstanding any other provisions of law, for purposes of computing the average daily attendance of a pupil described in subdivision (a) or (b), the 180-minute minimum schoolday permitted by this section shall be computed and reported as attendance for three-quarters of the full 240-minute minimum schoolday prescribed by Section 46141. Commencing with the 1995-96 fiscal year, if a pupil described in subdivision (a) or (b) is in attendance for more than 180 minutes, the average daily attendance of the pupil shall be computed and reported by determining the percentage of the full 240-minute minimum schoolday prescribed by Section 46141 that the pupil was in attendance at the school. No more than one full day of attendance may be reported for any pupil for any schoolday pursuant to this subdivision."

Also see Senate Bill 1316. "For the purposes of receiving state apportionments, a community college district may include high school pupils who attend a community college within the district pursuant to Sections 48800 and 76001 in the district's report of full-time equivalent students (FTES) only if those pupils are enrolled in community college classes that meet all of the following criteria"

Not Mentioned	Allowed	Discouraged	Prohibited
			X

Does state policy dictate whether or not college students can enroll in dual credit classes in the high school?

Not Mentioned	Allowed	Discouraged	Prohibited
X			

Other Comments

Grade Level: ******"Juniors and seniors with a minimum of eighty percent scholastic average will be eligible for admission."

GPA: ******"Juniors and seniors with a minimum of eighty percent scholastic average will be eligible for admission."; "With the recommendation of the school principal, a flexible interpretation of the minimum scholastic average will be permissible."

Credits: ******"High school students admitted to the program will be eligible to enroll in a maximum of two Community College credit courses each semester on a space-available basis following the initial registration period for that semester. In the case of high school seniors in their last term, the two-course limit may be exceeded on the recommendation of the school principal."

Mix NonDC: "High schools may offer Advanced Placement (AP) courses and UConn ECE courses concurrently, provided that courses adhere to the UConn curriculum. Course content that is part of the UConn curriculum must be covered regardless of whether it is a topic covered on the AP exam."

Final Examinations: Most UConn courses require a final examination or writing project. The AP exam is not to be used as a UConn final examination under any circumstances. Students registered for UConn ECE are required to sit for their UConn final exams, regardless of their current course grade or high school policy. Students who choose not to take their UConn final exams will receive zero exam grades which will have a severe impact on overall course grades.

Retroactive Credit: Many high schools teaching AP and UConn ECE concurrently allow students to choose whether or not to register for UConn ECE. Students who do not register through UConn ECE by the student registration deadline are unable to receive retroactive credit for the course and may only gain college credit with an appropriate AP examination score. This policy applies to students who attend or transfer to UConn."

Registration Timing: ******"The college should utilize the preregistration process to assist participating high school students to make their preliminary selection of college courses when they are preparing their high school schedules for the forthcoming term."

"Registration information is available for students at their high schools each spring. It is important to complete the registration process prior to the end of the school year and to follow specific guidelines established by UConn Early College Experience. Students and parents are largely dependent upon the high school to pass on essential information about UConn ECE, particularly pertaining to registration and billing. Information is made available to the high schools at the annual Site Representative Conference, during site visits and on the UConn ECE website.

Student Add/ Drop Period
 UConn ECE students may add or drop a course from September 1 – 15th. If a student is interested in adding or dropping a course, an Add/Drop Form must be submitted to the high school by September 15th. High schools should mail all student Add/Drop Forms together by September 16th. The Add/Drop Form can be found on the UConn ECE website at www.ece.uconn.edu or in the high school guidance department. A \$25 non-refundable processing fee will be added to the student’s invoice. This fee is in addition to any original program fees.
 Courses dropped after September 15th are non-refundable. Students who did not complete an Add/ Drop Form by September 15th are responsible for all program fees associated with their registered

courses."

Other: **"Final selection will be based on the recommendation of the high school program coordinator and the principal. With the recommendation of the school principal, a flexible interpretation of the minimum scholastic average will be permissible."; "Rather, it is intended that the high school partnerships programs be more expansive in providing an early college experience to a more diverse group of high school students, consistent with the missions of the Community Colleges."

"Motivation to attend college is a key characteristic of potential UConn ECE students. Many students are ready as high school juniors or seniors to do college work in specific areas of study. UConn ECE recognizes that a high school's staff can best evaluate which students can benefit from the opportunity to become UConn ECE students."

Waivers: "With the recommendation of the school principal, a flexible interpretation of the minimum scholastic average will be permissible."

Who Can Teach Dual Credit Courses?

Does state policy regulate who can teach dual credit courses?

Mentioned:	Yes	Comments:
Domain:	Statewide	
Prescriptiveness:	Required	

"UConn ECE Instructor Certification Process The importance of instructor certification cannot be overemphasized. It is the basis of the credibility of UConn ECE, and represents a high level of professional trust and respect. UConn faculty coordinators in each discipline are given the authority to certify high school instructors, who in turn are responsible for awarding UConn credits to students. Although UConn faculty coordinators are required to provide oversight for the courses in their discipline, it is the professional integrity and expertise of UConn ECE instructors that truly guarantee the quality of the academic experience that students receive. The ability to offer a UConn ECE course is contingent upon having a certified instructor and meeting the discipline-specific requirements. A high school teacher who is interested in becoming a certified UConn Early College Experience instructor must apply for certification. A certification application consists of:

- An application form (found on the UConn ECE website)
- A detailed cover letter indicating relevant qualifications and background
- Résumé
- Two letters of recommendation (preferably from the applicant's Department Head & school Principal)
- Proposed course syllabus
- Official undergraduate & graduate transcripts
- Interview (required in some disciplines)

Certification Requirements
 Many disciplines require a Master's Degree in the content area in order to qualify for certification. Other disciplines may accept a Master's Degree in Education, with a Bachelor's Degree in the subject area and two content-based graduate courses in the appropriate discipline. It is rare that a first-year teacher can obtain certification. Specific academic requirements can be found at www.ece.uconn.edu.

12
 •••••

Discipline-specific requirements of courses may include:
 Examination of laboratory facilities in the sciences
 Class size policy
 Submission of specific curriculum materials requested
 Purchase of an approved textbook
 Appropriate class time scheduled to insure reasonable comparability to the scheduling of the course on campus
 Instructors may be granted a one-or two-year provisional certification if they have clearly demonstrated their ability to be certified and are missing only a small component of the credentials required for certification. Provisional instructors are granted the opportunity to offer the course while they work toward full certification. Instructors are informed of their provisional status and are given specific items to complete in order to be granted full certification.

Two graduate course scholarships are awarded each semester by UConn ECE to instructors who need to fulfill an academic requirement to

become certified. Contact the UConn ECE program office directly for further information on the graduate scholarship program requirements. UConn Early College Experience recommends that interested instructors begin the certification process one year prior to the expected course offering date. This allows instructors ample time to gather their certification application materials. High schools are then able to include the UConn course description in the school's course catalog and promote the course accordingly. The certification application deadline is March 31."

This allows instructors ample time to gather their certification application materials. High schools are then able to include the UConn course description in the school's course catalog and promote the course accordingly. The certification application deadline is March 31.

New Instructor Orientation

Newly certified instructors are required to attend a new instructor orientation on the UConn Storrs campus at the end of the spring semester. Orientation serves as a way to become more familiar with

the program and course details. This is a full day event that provides the opportunity to learn about the program in detail, instructor benefits and course responsibilities. The afternoon session provides the opportunity for new instructors to meet with their faculty coordinator for a discipline-specific orientation, unless a coordinator has planned a supplementary orientation event."

Prof. Devel.: "Maintaining Certification

Once an instructor becomes certified to teach a UConn ECE course, maintaining certification is simple. UConn ECE instructors must attend a discipline-specific professional development event sponsored by UConn ECE once every two years in order to maintain their certification. UConn ECE instructors do not need to reapply for certification each year.

Professional Development & Attendance Policy: UConn ECE offers a variety of discipline-specific workshops and educational conferences annually. Workshop attendance is essential in building a strong relationship between the University department and the UConn ECE instructor. In addition to instructors learning more about college teaching and new developments in their fields, colleagues from both environments find that the workshops provide a forum for professional sharing. Guest presenters may include UConn ECE instructors and University colleagues.

Many instructors find the workshops professionally rewarding and attend annually. Instructors are expected to monitor their own attendance. As a courtesy, the UConn ECE program office will send a reminder memo in advance to those who need to attend a workshop in order to maintain certification."

Waivers: "Instructors may be granted a one-or two-year provisional certification if they have clearly demonstrated their ability to be certified and are missing only a small component of the credentials required for certification. Provisional instructors are granted the opportunity to offer the course while they work toward full certification. Instructors are informed of their provisional status and are given specific items to complete in order to be granted full certification."

How state enforces policies regarding who can teach dual credit courses

No Mechanism Mentioned	General Mechanism	Specific Mechanism
		X

Comments: "Certification Expiration

Certification can expire if a UConn ECE instructor chooses not to attend a discipline-specific professional development event sponsored by UConn ECE once every two years. The UConn ECE program office will send out a letter notifying the instructor that his/her certification has expired. A copy of the letter is also sent to the high school principal and site representative.;;

Certification Expiration

Certification can expire if a UConn ECE instructor chooses not to attend a discipline-specific professional development event sponsored by UConn ECE once every two years. The UConn ECE program office will send out a letter notifying the instructor that his/her certification has expired. A copy of the letter is also sent to the high school principal and site representative.

Reinstating certification: Instructors who have let their certification expire may have their certification reinstated. Instructors wishing to have their certification reinstated will be asked to:

- Update their certification application materials
- Attend a discipline-specific workshop sponsored by UConn ECE
- Attend the New Instructor Orientation
- •

While most instructors wishing to have their certification reinstated are granted their request, UConn ECE cannot guarantee that an instructor will become automatically re- certified. Should a discipline's qualifications for certification change, and the instructor no longer meets the certification requirements, UConn ECE cannot "grandfather" certified instructors who have let their certification lapse.

Revoked Certification

Although rare, UConn ECE instructors can have their certification revoked for the following reasons:

A decision on the part of a provisionally certified instructor not to comply with the conditions of the provisional certification. Repeated and intentional lack of cooperation with the UConn department's guidelines for ECE courses.

Reasons to revoke a certification are managed by the UConn ECE program office, with the full knowledge of the instructor, high school principal, and UConn faculty coordinator. Extenuating circumstances are taken into consideration. Reason (2) requires that a specific communication process be followed:

A faculty coordinator concerned about an instructor is required to communicate in writing with the instructor prior to the concerns rising to the level of considering revoking certification. If the faculty coordinator and instructor are mutually unable to resolve the targeted concerns, the UConn ECE Director is notified and manages the process as it develops.

- The high school principal is notified and a meeting of appropriate parties is planned.
- If possible, a remedial plan is developed, including benchmarks that, if met, will forestall revoking certification.

The process seeks to balance the welfare of the students, the needs of the high school, the professional integrity of all personnel involved, and the academic integrity of the University department."

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency	Comments:
		X	The 'Department of Education' and 'Florida College System institution boards of trustees' are specifically mentioned in statute.

Terms and Definitions

Term	Definition
Dual Enrollment	"The dual enrollment program is the enrollment of an eligible secondary student or home education student in a postsecondary course creditable toward high school completion and a career certificate or an associate or baccalaureate degree. A student who is enrolled in postsecondary instruction that is not creditable toward a high school diploma may not be classified as a dual enrollment student."
Early Admission	"Early admission is a form of dual enrollment through which eligible secondary students enroll in a postsecondary institution on a full-time basis in courses that are creditable toward the high school diploma and the associate or baccalaureate degree."
Career Early Admission	"Career early admission is a form of career dual enrollment through which eligible secondary students enroll full time in a career center or a Florida College System institution in courses that are creditable toward the high school diploma and the certificate or associate degree. "
Term for H.S. Located DC	No Term

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year
X	X	X	X

Comments: "Each district school superintendent and Florida College System institution president shall develop a comprehensive dual enrollment articulation agreement for the respective school district and Florida College System institution. The superintendent and president shall establish an articulation committee for the purpose of developing the agreement. Each state university president may designate a university representative to participate in the development of a dual enrollment articulation agreement. A dual enrollment articulation agreement shall be completed and submitted annually by the Florida College System institution to the Department of Education on or before August 1." Privates have to be non-profit: "An independent college or university which is located and chartered in Florida, is not for profit, is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools or the Accrediting Council for Independent Colleges and Schools, and confers degrees as defined in s. 1005.02 shall be eligible for inclusion in the dual enrollment or early admission program."

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Required
-----------	----------

Comments: "Beginning with the 2011-2012 school year, each high school shall offer an International Baccalaureate Program, an Advanced International Certificate of Education Program, or a combination of at least four courses in dual enrollment or Advanced Placement, including one course each in English, mathematics, science, and social studies." Further: "District school boards may not refuse to enter into a dual enrollment articulation agreement with a local Florida College System institution if that Florida College System institution has the capacity to offer dual enrollment courses."

Does state policy set parameters on the types of courses that colleges can or cannot offer or provide?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: "Vocational-preparatory instruction, college-preparatory instruction, and other forms of precollegiate instruction, as well as physical education courses that focus on the physical execution of a skill rather than the intellectual attributes of the activity, are ineligible for inclusion in the dual enrollment program. Recreation and leisure studies courses shall be evaluated individually in the same manner as physical education courses for potential inclusion in the program."

Comments: 1003.4295(1) Each high school shall advise each student of programs through which a high school student can earn college credit, including Advanced Placement, International Baccalaureate, Advanced International Certificate of Education, dual enrollment, and early admission courses, career academy courses, and courses that lead to national industry certification, as well as the availability of course offerings through virtual instruction. Students shall also be advised of the early and accelerated graduation options under ss. 1003.4281 and 1003.429.

S. 1007.271(15) The Department of Education shall develop a statement on transfer guarantees to inform students and their parents, prior to enrollment in a dual enrollment course, of the potential for the dual enrollment course to articulate as an elective or a general education course into a postsecondary education certificate or degree program. The statement shall be provided to each district school superintendent, who shall include the statement in the information provided to all secondary students and their parents as required pursuant to this subsection. The statement may also include additional information, including, but not limited to, dual enrollment options, guarantees, privileges, and responsibilities.

S. 1007.271(21)(b) A description of the process by which students and their parents are informed about opportunities for student participation in the dual enrollment program.

Other Comments

GPA: "Student eligibility requirements for initial enrollment in college credit dual enrollment courses must include a 3.0 unweighted high school grade point average and the minimum score on a common placement test adopted by the State Board of Education which indicates that the student is ready for college-level coursework." AND "Student eligibility requirements for initial and continued enrollment in career certificate dual enrollment courses must include a 2.0 unweighted high school grade point average."

Exam Scores: "S. 1007.271(3) Student eligibility requirements for initial enrollment in college credit dual enrollment courses must include a 3.0 unweighted high school grade point average and the minimum score on a common placement test adopted by the State Board of Education which indicates that the student is ready for college-level coursework."

S. 1008.30(5)....A student may not be enrolled in a college credit mathematics or English course on a dual enrollment basis unless the student has demonstrated adequate precollegiate preparation on the section of the basic computation and communication skills assessment required pursuant to subsection (1) that is appropriate for successful student participation in the course."

Mix NonDC: "Dual enrollment courses taught on a high school campus may not be combined with any noncollege credit high school course."

College Stds.: "For the purpose of this section, an eligible secondary student is a student who is enrolled in a Florida public secondary school or in a Florida private secondary school which is in compliance with s. 1002.42(2) and provides a secondary curriculum pursuant to s. 1003.428, s. 1003.429, or s. 1003.43."

Other: Florida College System institution boards of trustees may establish additional initial student eligibility requirements, which shall be included in the dual enrollment articulation agreement, to ensure student readiness for postsecondary instruction. Additional requirements included in the agreement may not arbitrarily prohibit students who have demonstrated the ability to master advanced courses from participating in dual enrollment courses.

Waivers: "Exceptions to the required grade point averages may be granted on an individual student basis if the educational entities agree and the terms of the agreement are contained within the dual enrollment articulation agreement established pursuant to subsection (21)."

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency
		X

Comments: The Georgia Department of Education, Board of Regents of the University System of Georgia, and the Board of Technical and Adult Education; "To amend Chapter 2 of Title 20 of the Official Code of Georgia Annotated, relating to elementary and secondary education, so as to provide and expand career pathway options for high school students to ensure their career and college readiness; to provide for legislative findings; to provide for coordination between the State Board of Education, the Board of Regents of the University System of Georgia, and the Board of Technical and Adult Education;"

Terms and Definitions

Term	Definition
Dual Credit or dual enrollment	"Dual credit course' means any arrangement whereby an eligible student takes one or more courses, including virtual courses, at or through an eligible institution while still enrolled as a public high school student and receives credit both at the high school and at the eligible institution."
Joint Enrollment	"Joint enrollment is an arrangement whereby a high school student is enrolled in postsecondary coursework with an eligible postsecondary institution while continuing to pursue his or her high school diploma. Joint enrollment coursework earns post-secondary credit only. No high school credit can be given for joint classes." - Note this could be on high school or college campus.
Accel Program	"Accel is a program offered during the fall and spring terms of the school year for students that wish to take college-level (academic-only, degree-level) coursework for credit towards both high school and college graduation requirements. Eligible students must meet certain Accel criteria included in the Eligibility section of this document. The Accel Program has become state funded instead of lottery funded beginning fall 2011, but is still administered by the Georgia Student Finance Commission (GSFC)."
Term for H.S. Located DC	No specific term, but most courses are on college campuses

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year
X	X	X	X

Comments: "Eligible Institution. An eligible institution is a unit of the University System of Georgia (USG), of the Technical College System of Georgia (TCSG), a private independent nonprofit postsecondary institution that meets the requirements for tuition equalization grants, or a private proprietary postsecondary institution that meets the requirements for tuition equalization grants. Out of state colleges and universities are not eligible for attendance to earn dual enrollment credit."

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Required
-----------	----------

Comments: "(7) Every state education agency, postsecondary institution, and local school system should provide all high school students with opportunities for accelerated learning through dual credit coursework leading to at least six postsecondary credits and have as a collective goal to graduate every student with postsecondary credit;"

Does state policy set parameters on the types of courses that colleges can or cannot offer or provide?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: "Approved courses must count toward state and/or local high school graduation requirements." (Accel Requirements; "All dual enrollment credit students must select approved courses with state course numbers from the dual enrollment credit course lists that are appropriate for the dual enrollment credit program they are enrolled. GaDOE will regularly update these lists, with input from University System of Georgia, Technical College System of Georgia and Georgia Student Finance Commission. Dual enrollment credit students must select courses from these approved lists to receive high school credit and funding. Use of the correct course number is important for data collection, verification of enrollment and accuracy of dual enrollment credit payments."); "Remedial and developmental courses are not available for dual enrollment credit students."

Who Can Take Dual Credit Courses?

Does state policy regulate how students or parents learn about dual credit opportunities?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: "(2) Develop appropriate forms and counseling guidelines for dual credit courses and shall make such forms and guidelines available to local school systems and eligible institutions. No later than the first day of April each year, each local school system shall provide general information about dual credit courses, including such forms, to all its eighth through eleventh grade students. A local school system shall also provide counseling services in accordance with the counseling guidelines provided by the department to such students and their parents or guardians before the students enroll in a dual credit course. Prior to participating in a dual credit course, the student and the student's parent or guardian shall sign the form provided by the school system or by an eligible institution stating that they have received the counseling specified in this Code section and that they understand the responsibilities that shall be assumed in participating in the dual credit program;" "Advisement and counseling opportunities are critical to the success of dual enrollment credit students. Students must be advised prior to participation in dual enrollment credit, and carefully monitored as they are completing their coursework.

1. By April 1 of each school year and prior to enrolling students in an eligible institution, school systems shall provide general information about all dual enrollment credit programs to all eighth through eleventh grade students as part of the development of their program of study.
2. Advisement information shall be provided to any interested student and his/her parent(s) or guardian(s).
3. Prior to enrolling, the interested student and his/her parent(s)/guardian(s) are required to sign a form stating that they have received the advisement services specified and they understand the responsibilities and possible consequences of participation.
4. Advisement information shall also include:
 - a. The names of eligible institutions, approved courses, information about approved academic transferable credit, and local and state high school graduation requirements.
 - b. The name of a contact person at each eligible institution for information concerning the program.
 - c. Procedures for scheduling approved courses between the high school and the eligible institutions.
 - d. Financial information for tuition, books and materials.
 - e. The potential effect of the program on a student completing a course and completing required high school graduation requirements.
 - f. Consequences of course incompleteness, course failure and the possible delay of high school graduation.
 - g. Eligibility information for participating in extracurricular activities.

h. The academic and social responsibilities of the student and parent(s) or guardian(s), including continuing responsibilities to obey the rules of both the eligible institution and the high school.

5. Advisement and counseling should be ongoing for all dual enrollment credit students. Counselors should monitor dual enrolled students to ensure they maintain satisfactory academic progress toward the completion of all high school graduation requirements. Students and their parents should maintain contact with the high school counselor throughout the year. High school and college counselors should be contacted immediately if any changes occur with the student and his/her academic status."

Who Can Take Dual Credit Courses?

Does state policy regulate how students or parents learn about dual credit opportunities?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: 33-5104: "1) To the extent possible, the school district shall provide counseling services to pupils and their parents or guardians before the pupil enrolls in courses under the provisions of this chapter to ensure that the pupil and parents or guardian are fully aware of the risks and possible consequences of enrolling in postsecondary courses. The district shall provide information on the program including who may enroll, what institutions and sources are available under this program, the decision-making process for granting academic credits, financial arrangements for tuition, books and materials, eligibility criteria for transportation aid, available support services, the need to arrange an appropriate schedule, consequences of failing or not completing a course in which the pupil enrolls, the effect of enrolling in this program on the pupil's ability to complete the required high school graduation requirements, and the academic and social responsibilities that must be assumed by the pupil and the parents or guardian."
 This statute also requires that parent or guardian sign form saying they received counseling information.

33-5105: "By March 1 of each year, a school district shall provide general information about the program to all pupils in grades ten (10) and eleven (11)."
 ISBE III.Y: "High school students are provided with a student guide that outlines their responsibilities as well as guidelines for the transfer of credit. "
 "Students and their parents receive information about dual credit programs. Information is posted on the high school's website regarding enrollment, costs, contact information at the high school and the postsecondary institution, grading, expectations of student conduct, and other pertinent information to help the parents and students understand the nature of a dual credit course."

Term	Definition
Postsecondary Enrollment Program	No definition
Dual Credit	"Dual credit is the term given to courses in which high school students have the opportunity to earn both high school and college credits. Dual credit courses are taught by high school faculty or by adjunct college faculty or college faculty either at the high school, at the college or university, or sometimes through online courses or distance education. Dual credit is offered by both state and independent (private, regionally accredited) colleges and universities."
Term for H.S. Located DC	These are referred to as dual credit - but could also be on college campus.

Terms and Definitions

Term	Definition
Joint Enrollment	Refers to all high school students enrolled in community college credit coursework. Jointly enrolled students may be enrolled in PSEO courses, through contractual agreements between schools and colleges (e.g., concurrent enrollment), and/or courses taken independently by paying tuition.
Concurrent Enrollment	"The concurrent enrollment program, also known as district-to-community college sharing, promotes rigorous academic or career and technical pursuits by providing opportunities to high school students to enroll part-time in eligible nonsectarian courses at or through community colleges established under Iowa Code chapter 260C."
Dual Enrollment	While nationally this term refers to 'dual credit' activities, in Iowa statute defines it as students who are simultaneously enrolled in a public school district and in competent private instruction (homeschool).
Term for H.S. Located DC	Concurrent Enrollment

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year
X	X	X	X

Comments: No policy language provided "Eligible postsecondary institution" means an institution of higher learning under the control of the state board of regents, a community college established under Iowa Code chapter 260C, or an accredited private institution as defined in Iowa Code section 261.9.

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Not Specified	Comments: "The program shall be made available to all eligible resident students in grades 9 through 12." "The senior year plus programming provided by a school district pursuant to this division may be but is not required to be available to students on a year-round basis."
-----------	---------------	--

Does state policy set parameters on the types of courses that colleges can or cannot offer or provide?

Mentioned:	Yes	Comments: "The concurrent enrollment program, also known as district-to-community college sharing, promotes rigorous academic or career and technical pursuits by providing opportunities to high school students to enroll part-time in eligible nonsectarian courses at or through community colleges established under Iowa Code chapter 260C."; "Eligible postsecondary courses. These rules are intended to implement the policy of the state to promote rigorous academic pursuits. Therefore, postsecondary courses eligible for students to enroll in under this division shall be limited to: nonsectarian courses; courses that are not comparable to courses offered by the school district where the student attends which are defined in rules adopted by the board of directors of the public school district; credit-bearing courses that lead to an educational degree; courses in the discipline areas of mathematics, science, social sciences, humanities, and vocational-technical education; and also the courses in career option programs offered by area schools established under the authorization provided in Iowa Code chapter 260C. A school district or accredited nonpublic school district shall grant academic or vocational-technical credit to an eligible student enrolled in an eligible postsecondary course."

Other Comments

Exam Scores: "b. The student shall meet or exceed the minimum performance measures on any academic assessments that may be required by the eligible postsecondary institution."
 Pre-reqs: "c. The student shall have taken the appropriate course prerequisites, if any, prior to enrollment in the eligible postsecondary course, as determined by the eligible postsecondary institution delivering the course."
 Credits: "Full-time is defined (281—IAC 22.6) as enrollment in 24 or more postsecondary credit hours in any one postsecondary institution in one academic year (or the equivalent) excluding any summer term. Only courses for postsecondary credit delivered through Senior Year Plus programs count toward the limit. Contracted college credit courses for which the district does not receive supplementary weighted funding do not count toward the limit. "
 Mix NonDC: "Students shall not “audit” postsecondary courses. The student must take the course for credit and must meet all of the requirements of the course which are required of postsecondary students."
 College Stds.: "Open to all registered community college students, not just high school students. The class may be offered at a high school attendance center. (Iowa Code 257.11(3)(b)) (281—IAC97.2(5)) While the course must be offered to all students (not just concurrently enrolled students), sections of the course delivered at school district sites may be closed to regular college students, provided other sections are available for regular student enrollment. Colleges and districts are encouraged to develop consistent policies for determining regular student enrollment in concurrent enrollment sections offered at high school facilities. These policies may be included in the contractual agreement between the institutions."
 Other: "a.The student shall have attained the approval of the school board or its designee and the eligible postsecondary institution to register for the postsecondary course.
 b.The student shall have demonstrated proficiency in all of the content areas of reading, mathematics, and science as evidenced by achievement scores on the most recent administration of the Iowa tests of basic skills (ITBS) or the Iowa tests of educational development (ITED) for which scores are available for the student. If the student was absent for the most recent administration of either the ITBS or ITED, and such absence was not excused by the student’s school of enrollment, the student is deemed not to be proficient in any of the content areas. The school district may determine whether such student is eligible for qualification under an equivalent qualifying performance measure."

Waivers: "(1)If a student is not proficient in one or more of the content areas of reading, mathematics, and science, the school board may establish alternative but equivalent qualifying performance measures. The school board is not required to establish equivalent performance measures, but if it does so, such measures may include but are not limited to additional administrations of the state assessment, portfolios of student work, student performance rubric, or end-of-course assessments. A school board that establishes equivalent performance measures shall also establish criteria by which its district personnel shall determine comparable student proficiency."

Comments: "Postsecondary Course Audit Process"
As mandated by Iowa Code Section 261E, the Postsecondary Course Audit Committee is charged with annually auditing postsecondary courses offered to high school students in accordance with Senior Year Plus. The audit committee currently consists of representatives of the three Regent universities, the K-12 sector, and community colleges. The initial audit plan entails a thorough review of the quality of concurrent enrollment offerings while limiting duplication with existing accountability mechanisms. The plan for the 2009- 2010 academic year aligns the audit process with the NACEP accreditation process. For the first year, the scope of the audit is limited to concurrent enrollment courses though the scope may be broadened in future years to include other SYP offerings including PSEO and AP® courses. Audits are currently coupled with the community college state accreditation process."

Finance and Resources

Does state policy provide ANY direct funding to the high school or college for dual credit?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
X			

Comments:

Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments:

An eligible postsecondary institution that enrolls an eligible student under PSEO shall not charge the student for tuition, textbooks, materials, or fees directly related to the course in which the student is enrolled except that the student may be required to purchase equipment that becomes the property of the student. For the purposes of this requirement, equipment shall not include text- books.
The school district pays the eligible postsecondary institution for the cost of the course or \$250, whichever is lower. If the student successfully completes the course, the course and textbooks are provided free (except possible equipment pur- chases). If a student fails to complete the course and is not eligible for a waiver, the student or his or her parent or guardian may be required to pay the district's cost. For public two and four-year postsecondary institutions in Iowa, the district's payment is always \$250 unless the course is fewer than three credit hours because tuition rates exceed \$83 per credit hour.

Does state policy regulate who pays for books related to dual credit courses?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

If state policy requires students/parents to pay, does state policy provide forms of financial support to students/parents?

No	Yes	Not Applicable
		X

Comments:

Does state policy allow (or disallow) high schools or colleges to collect full or partial funding for dual credit students (e.g., per ADA- or FTE-based formula)

	None	Partial	Full	Not Applicable
High School			X	
College			X	

Comments:

"22.11(6) School districts that participate in district-to-community college sharing agreements or concurrent enrollment programs that meet the requirements of Iowa Code section 257.11(3) are eligible to receive supplementary weighted funding under that provision. Regardless of whether a district receives supplementary weighted funding, the district shall not charge tuition of any of its students who participate in a concurrent enrollment course." Funding is base-driven plus an inflation adjustment--enrollment is a minor factor. Yes CE students are counted but only matters if enrollment factors into funding .

Does state policy regulate faculty salary or compensation for teaching dual credit classes?

Grade Level: "Concurrent enrollment partnership pupil means a person who is enrolled in classes at a high school at which approved high school teachers teach college credit classes during the normal school day, who is in grades 10, 11, or 12, or who is gifted and is in grade 9 (see section b.(5) iii), and is acceptable or has been accepted for enrollment at an eligible postsecondary education institution."

Exam Scores: "Concurrently enrolled students must meet institutional enrollment requirements, follow institutional procedures regarding assessment/placement, and satisfy course prerequisites. High school students enrolled in courses administered through a CEP may be enrolled as non-degree or non-matriculated students of the sponsoring postsecondary institution. To meet the "academic challenge" purpose of this policy, CEP students must have an acceptable score or subscore on a standardized placement test in order to enroll in a CEP course. Institutions may establish higher standards."

Credits: "CEP classes are not intended to replace a substantial portion of the academic experience on a college/university campus. Up to 24 semester credit hours may be earned in concurrent enrollment partnership classes."

Mix NonDC: "A course may include students enrolled for postsecondary and/or secondary credit. The postsecondary institution is responsible for ensuring that academic standards (course requirements and grading criteria) are not compromised."

College Stds.: Student has to be enrolled in high school: "Concurrent enrollment partnership pupil means a person who is enrolled in classes at a high school at which approved high school teachers teach college credit classes during the normal school day, who is in grades 10, 11, or 12, or who is gifted and is in grade 9 (see section b.(5) iii), and is acceptable or has been accepted for enrollment at an eligible postsecondary education institution."

Other: "The student must be authorized by the school principal to apply for enrollment." : "Students who are enrolled in grade 9 and are classified by a school district as "gifted" according to the State Department of Education's definition, K.A.R.91-40-1(cc), as amended, may be admitted as concurrently enrolled students provided all other applicable requirements as outlined above are satisfied."

Who Can Teach Dual Credit Courses?

Does state policy regulate who can teach dual credit courses?

Mentioned:	Yes	Comments:
Domain:	Statewide	<p>III: "The Southern Association of Colleges and Schools - Commission on Colleges accredits each of the 16 KCTCS colleges and the eight public universities. Dual credit courses offered pursuant to this policy and the instructors of those courses will comply with all appropriate SACS-COC criteria, Kentucky Revised Statutes, requisite institutional policies and procedures, and other regulations governing the provision of college credit opportunities to secondary students. The dual credit courses must be taught by postsecondary faculty or secondary school teachers who are approved by the postsecondary institution as having appropriate credentials established by the SACS-COC Guidelines for Faculty Credentials and university policy (SACS 3.7.1). Secondary school faculty will demonstrate, through appropriate documentation, compliance with teaching credentials and qualifications. A. Official college transcripts. B. A current vita, resume, or application showing teaching and work experience. C. Official documentation of relevant work experience. D. Additional documentation sufficient for SACS-COC compliance. SACS-COC standards require that postsecondary institutions regularly evaluate the effectiveness of each faculty member regardless of contractual or tenured status. Dual credit teachers and faculty will be evaluated in a manner consistent with this evaluation process."</p>

Exam Scores: For state funding of dual enrollment (e.g., the BoR's previous Early Start DE funding program), student needed must have a PLAN or ACT composite of 18 (or SAT equivalent) and English sub-score of 18 (Math 19) to enroll in an college level English (or Math); Plan 14 or ACT 15 for developmental course; or Plan 14/ACT 15/WorkKeys Bronze for a Work Skills course. The Early Start program is currently unfunded but postsecondary campuses continue to work with local schools to offer dual enrollment opportunities.

Mix NonDC: Student Mix. Courses offered via dual enrollment may be comprised of all secondary students or a mix of both secondary and postsecondary students. Both the secondary and postsecondary institutions shall jointly agree upon the appropriate student mix. (AcAf Policy 2.19, 1a)

Waivers: For state funding of dual enrollment (e.g., the BoR's previous Early Start DE funding program), limited, documented exceptions for continued funding after a student withdraws from (fails to complete) a dual enrollment course could be granted by the college/university. Program is currently unfunded.

Early College Opportunities For Maine Students
Early College Programs In Maine

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency
	X	

Comments: The Maine Department of Education has policy oversight over all public schools so to some extent, dual enrollment practices are governed in part by that department's policies, but the DOE does not oversee any specific agency related to early college/dual enrollment courses as described in this survey. Maine currently has a task force in place that is looking at all aspects of dual enrollment in Maine, but this task force is not regulatory in nature. In addition the Maine DOE has an early college program/fund – titled Maine Aspirations – that allows all Maine high school juniors and seniors the opportunity to take early college courses at a university (up to 6 credits per year) for free (although fees and the cost of books are usually the responsibility of the student). The program pays half of the tuition; the university waives the other half. Students in the program must take the class on a campus or they may take the class online if distance to a campus is an issue. Students must have at least a 2.0 high school GPA or the recommendation of a guidance counselor to enroll.

Terms and Definitions

Term	Definition
Early College	This term is used in reference to a wide variety of dual enrollment class options available to high school students. Options including live courses taught on a university/college campus, courses taught online, and courses taught in a high school.
Maine Aspirations	allows all Maine high school juniors and seniors the opportunity to take early college courses at a university (up to 6 credits per year) for free (although fees and the cost of books are usually the responsibility of the student). The program pays half of the tuition; the university waives the other half. Students in the program must take the class on a campus or they may take the class online if distance to a campus is an issue. Students must have at least a 2.0 high school GPA or the recommendation of a guidance counselor to enroll.
Dual Enrollment	For the most part, early college and dual enrollment tend to be used synonymously.
Term for H.S. Located DC	Early College

Commonwealth Dual Enrollment Program

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency
	X	

Comments: Statutes are limited to the CDEP program

Terms and Definitions

Term	Definition
Commonwealth Dual Enrollment Program (CDEP)	provides opportunities for Massachusetts high school students to take college-level courses free of charge* and earn credit simultaneously toward high school completion and their future college degrees.
Term for H.S. Located DC	

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year
X		X	X

Comments: Regarding CDEP

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:

Not Specified

Comments:

Does state policy set parameters on the types of courses that colleges can or cannot offer or provide?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: No remedial courses can be offered as part of CDEP; CDEP must also fall under the MassTransfer Block.

Types of Parameters

	Subject Matter	Number of Courses	Statewide Transfer	Statewide General Educ.	Other
Mentioned:	No	No	Yes	No	No
Domain:			Statewide		
Prescriptiveness:			Required		

Comments:

Transfer: CDEP courses are limited to those that would qualify under the MassTransfer Block. These are generally first- and second-year college courses that institutions regard as highly transferable. This provision, however, does not guarantee transfer of credits. Students should be advised to inquire about the transfer policy of the institution in which they plan to enroll after high school graduation.

Other: CDEP requires that instructors be considered college faculty

How state enforces policies regarding who can or must provide dual credit courses?

No Mechanism Mentioned	General Mechanism	Specific Mechanism
X		

Comments: Tinkham: . Institutions which accept CDEP funds must report data and submit reports. Dual enrollment courses funded through other mean would not be subjected to this requirements.

Who Can Take Dual Credit Courses?

Does state policy regulate how students or parents learn about dual credit opportunities?

Mentioned:	No

X			

Does state policy dictate whether or not college students can enroll in dual credit classes in the high school?

Not Mentioned	Allowed	Discouraged	Prohibited
X			

Other Comments

Grade Level: Grade 9, 10, 11, 12: These apply to CDEP only but are often followed as a model by other programs.
 GPA: Minimum high school gpa of 3.0: These apply to CDEP only but are often followed as a model by other programs.
 Exam Scores: Students must take Accuplacer: These apply to CDEP only but are often followed as a model by other programs.
 Pre-reqs: • Meet all course prerequisites as required by the participating college or university campus. (Prerequisites are courses that a student must complete before taking a more advanced course in the subject area. For example, before you can take Calculus, you may have to take Algebra I, Algebra II, Geometry, and Trigonometry. A course prerequisite could also include taking a college-level placement exam.) These apply to CDEP only but are often followed as a model by other programs.
 Credits: Tinkham-Most students just take a few courses. Students may enroll in one or more courses per the discretion of the participating institution of higher education. Because colleges and universities are required to expand dual enrollment opportunities to as many students as possible per the available amount of state funding, students may be limited to the number of courses they can take.

Other Comments

Grade Level: The student shall not have been enrolled in high school for more than 4 school years including the school year in which the student seeks to enroll in an eligible course under this act.

Exam Scores: To be an eligible student, a student who has not taken the Michigan merit examination must have achieved a qualifying score in all subject areas on a readiness assessment and a student who has taken the Michigan merit examination must have achieved a qualifying score in all subject areas on the Michigan merit examination, and, subject to subsection ... However, if the student has not achieved a qualifying score in all subject areas on a readiness assessment or the Michigan merit examination, as applicable for the student, the student is an eligible student if the student achieves a qualifying score in mathematics and a qualifying score on a nationally or industry recognized job skills assessment test as determined by the superintendent of public instruction.

Credits: Course minima or maxima: (i) Not more than 10 courses overall. This limit and the limits under subparagraphs (ii) to (iv) do not apply to a course if the eligible student does not receive tuition and fee support under this act for that course. (ii) If the eligible student first enrolls in a course under this act when the eligible student is in grade 9, not more than 2 courses during each academic year in the eligible student's first, second, or third academic year of enrollment under this act in an eligible postsecondary institution and not more than 4 courses during the academic year in the eligible student's fourth academic year of enrollment under this act in an eligible postsecondary institution. (iii) If the eligible student first enrolls in a course under this act when the eligible student is in grade 10, not more than 2 courses during the academic year in the eligible student's first academic year of enrollment under this act in an eligible postsecondary institution, not more than 4 courses during the academic year in the eligible student's second academic year of enrollment under this act in an eligible postsecondary institution, and not more than 4 courses during the academic year in the eligible student's third academic year of enrollment under this act in an eligible postsecondary institution. (iv) Subject to the overall course limit under subparagraph (i), if the eligible student first enrolls in a course under this act when the eligible student is in grade 11 or 12, not more than 6 courses during either of those academic years of enrollment in an eligible postsecondary institution.

College Stds.: (2) The department, in consultation with the superintendent of public instruction, shall promulgate rules establishing criteria and procedures under which a student who has been enrolled in high school for more than 4 years but not more than 5 years may be considered to be an eligible student. The rules shall address special circumstances under which a student may qualify to be considered an eligible student under this subsection and may limit the number of courses in which a student who qualifies under this subsection may enroll. For the purposes of determining the number of years a pupil has been enrolled in high school, a pupil who is enrolled in high school for less than 90 days of a school year due to illness or other circumstances beyond the control of the pupil or the pupil's parent or guardian is not considered to be enrolled for that school year.

Minnesota Statutes 124D.09 Postsecondary Enrollment Options Act
Concurrent Enrollment
Post-Secondary Enrollment Options
High School Programs

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency
		X

Comments: Minnesota statute 124D.09 Subd 10 states that courses may be provided according to an agreement between a public school board and the governing body of an eligible public postsecondary system or eligible private postsecondary institution.

Terms and Definitions

Term	Definition
Post-Secondary Enrollment Options (PSEO)	The Post-Secondary Enrollment Options Program is the program established by Minnesota State Statutes 124D.09 to "promote rigorous educational pursuits and provide a wider variety of options for students." Through PSEO, high school students may earn both secondary and postsecondary credit for college or university courses completed on a college or university campus, at a high school, or at another location. (Source: MNSCU Board Policy 3.5 http://www.mnscu.edu/board/policy/305.html)
Concurrent Enrollment	A PSEO concurrent enrollment course is a college or university course made available through the PSEO program, offered through a secondary school, and taught by a secondary teacher (Source: MNSCU Board Policy 3.5 http://www.mnscu.edu/board/policy/305.html) the term College in the Schools is often and widely used by many people as a generic term for concurrent enrollment, although College in the Schools is actually the name of the concurrent enrollment programs at the University of Minnesota-Twin Cities and the University of Minnesota - Duluth.
High School Programs	Not an official term; used to describe dual enrollment courses offered by institutions not participating in the state's PSEO program. One example is Globe University's High School Advantage Program where juniors can take up to 3 college courses tuition-free and seniors can take up to 4 college courses tuition-free.
Term for H.S. Located DC	Concurrent Enrollment

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year
X	X	X	X

Comments: Minnesota Statute 124D.091 stipulates that high schools may be reimbursed, up to \$150 per student if the high schools are partnering with a qualified concurrent enrollment program (See statute for qualifications.) However, the legislature has never allocated sufficient funds to reimburse high schools at the level allowed by statute; instead, reimbursements have been significantly prorated and thus significantly lower. 124D.09: Subd. 3 (a) "Eligible institution" means a Minnesota public postsecondary institution, a private, nonprofit two-year trade and technical school granting associate degrees, an opportunities industrialization center accredited by the North Central Association of Colleges and Schools, or a private, residential, two-year or four-year, liberal arts, degree-granting college or university located in Minnesota.

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Encouraged

How state enforces policies regarding who can or must provide dual credit courses?

No Mechanism Mentioned	General Mechanism	Specific Mechanism
	X	

Comments: 124D.09: Subd. 3 (a) "Eligible institution" means a Minnesota public postsecondary institution, a private, nonprofit two-year trade and technical school granting associate degrees, an opportunities industrialization center accredited by the North Central Association of Colleges and Schools, or a private, residential, two-year or four-year, liberal arts, degree-granting college or university located in Minnesota.

Who Can Take Dual Credit Courses?

Does state policy regulate how students or parents learn about dual credit opportunities?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: For DUAL ENROLLMENT: High schools must notify students of the opportunities for postsecondary enrollment and cannot prevent the student from applying for postsecondary enrollment. MS 124D.09 Subd. 7 FOR DUAL ENROLLMENT PURPOSES:
 124D.09: Subd. 6.Counseling.
 To the extent possible, the school or school district must provide counseling services to pupils and their parents or guardian before the pupils enroll in courses under this section to ensure that the pupils and their parents or guardian are fully aware of the risks and possible consequences of enrolling in postsecondary courses. The school or school district must provide information on the program including who may enroll, what institutions and courses are eligible for participation, the decision-making process for granting academic credits, financial arrangements for tuition, books and materials, eligibility criteria for transportation aid, available support services, the need to arrange an appropriate schedule, consequences of failing or not completing a course in which the pupil enrolls, the effect of enrolling in this program on the pupil's ability to complete the required high school graduation requirements, and the academic and social responsibilities that must be assumed by the pupils and their parents or guardian. The person providing counseling shall encourage pupils and their parents or guardian to also use available counseling services at the postsecondary institutions before the quarter or semester of enrollment to ensure that anticipated plans are appropriate.
 Prior to enrolling in a course, the pupil and the pupil's parents or guardian must sign a form that must be provided by the school or school district and may be obtained from a postsecondary institution stating that they have received the information specified in this subdivision and that they understand the responsibilities that must be assumed in enrolling in this program. The department must, upon request, provide technical assistance to a school or school district in developing appropriate forms and counseling guidelines.
 124D.09: Subd. 7.Dissemination of information; notification of intent to enroll.
 By March 1 of each year, a district must provide general information about the program to all pupils in grades 8, 9, 10, and 11.
 135A.101 Subd. 1 Requirements for participation.
 To participate in the postsecondary enrollment options program, a college or university must abide by the provisions in this section. The institution may provide information about its programs to a secondary school or to a pupil or parent.

Other Comments

Exam Scores: MnSCU institutions require standardized exam scores for at least some courses. (See MnSCU System policies <http://www.mnscu.edu/board/procedure/305p1.html> .)

The U of M concurrent enrollment programs (all campuses) do not require standardized exam scores of any kind as part of the student eligibility requirements for concurrent enrollment.

Credits: Other Comments State policy does not limit the number of credits a student can earn through concurrent enrollment; it does, however, limit the number of years students can take concurrent enrollment courses. (see next page)

124D.09: Subd. 8. Limit on participation.
 A pupil who first enrolls in grade 9 may not enroll in postsecondary courses under this section for secondary credit for more than the equivalent of four academic years. A pupil who first enrolls in grade 10 may not enroll in postsecondary courses under this section for secondary credit for more than the equivalent of three academic years. A pupil who first enrolls in grade 11 may not enroll in postsecondary courses under this section for secondary credit for more than the equivalent of two academic years. A pupil who first enrolls in grade 12 may not enroll in postsecondary courses under this section for secondary credit for more than the equivalent of one academic year. If a pupil in grade 9, 10, 11, or 12 first enrolls in a postsecondary course for secondary credit during the school year, the time of participation shall be reduced proportionately. If a pupil is in a learning year or other year-round program and begins each grade in the summer session, summer sessions shall not be counted against the time of participation. A pupil who has graduated from high school cannot participate in a program under this section. A pupil who has completed course requirements for graduation but who has not received a diploma may participate in the program under this section.

MnSCU policy limits student enrollment to 18 credits maximum per term.

Registration Timing: At time of enrollment per MS 124D.09 Subd. 12.

Who Can Teach Dual Credit Courses?

Does state policy regulate who can teach dual credit courses?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: The state does not have requirements or restrictions on who can teach a dual credit course. Institutional/system policies and union contracts regulate teaching of dual credits courses, particularly at MnSCU institutions.

NACEP Standard F1 requires college/university departments to approve concurrent enrollment instructors. The standard also stipulates that instructors must meet the requirements for teaching the college/university course set by the college/university academic department.

Because the State of Minnesota has stipulated that high schools, to be eligible for state reimbursement for costs incurred while offering concurrent enrollment courses, must partner with concurrent enrollment programs that are NACEP-accredited or can provide clear evidence that they meet NACEP-based standards, one can say the state encourages programs to provide qualified teachers to teach dual credit courses. (See MS 124D.091.)

(Statute 124D.091 reads as follows: “A district that offers a concurrent enrollment course according to an agreement under section 124D.09, subdivision 10, is eligible to receive aid for the costs of providing postsecondary courses at the high school. Beginning in fiscal year 2011, districts only are eligible for aid if the college or university concurrent enrollment courses offered by the district are accredited by the National Alliance of Concurrent Enrollment Partnership, in the process of being accredited, or are shown by clear evidence to be of comparable standard to accredited courses, or are technical courses within a recognized career and technical education program of study approved by the commissioner of education and the chancellor of the Minnesota State Colleges and Universities.”

Minnesota monitors compliance with the statute by requiring non-NACEP accredited programs to sign a letter of assurance.

High School Credential Required?
Not Mentioned

Other Comments

Teacher Elig.: The state does not have requirements or restrictions on who can teach a dual credit course. Institutional/system policies and union contracts regulate teaching of dual credits courses, particularly at MnSCU institutions.

NACEP Standard F1 requires college/university departments to approve concurrent enrollment instructors. The standard also stipulates that instructors must meet the requirements for teaching the college/university course set by the college/university academic department.

Because the State of Minnesota has stipulated that high schools, to be eligible for state reimbursement for costs incurred while offering concurrent enrollment courses, must partner with concurrent enrollment programs that are NACEP-accredited or can provide clear evidence that they meet NACEP-based standards, one can say the state encourages programs to provide qualified teachers to teach dual credit courses. (See MS 124D.091.)

(Statute 124D.091 reads as follows: “A district that offers a concurrent enrollment course according to an agreement under section 124D.09, subdivision 10, is eligible to receive aid for the costs of providing postsecondary courses at the high school. Beginning in fiscal year 2011, districts only are eligible for aid if the college or university concurrent enrollment courses offered by the district are accredited by the National Alliance of Concurrent Enrollment Partnership, in the process of being accredited, or are shown by clear evidence to be of comparable standard to accredited courses, or are technical courses within a recognized career and technical education program of study approved by the commissioner of education and the chancellor of the Minnesota State Colleges and Universities.”

Minnesota monitors compliance with the statute by requiring non-NACEP accredited programs to sign a letter of assurance.

Prior Training: The state does not require programs to provide new teachers with training prior to starting to teach a dual credit course.

NACEP Standard F2 requires colleges and universities to provide teachers new to concurrent enrollment with discipline-specific training and orientation before they teach postsecondary courses.

Because the State of Minnesota has stipulated that high schools, to be eligible for state reimbursement for costs incurred while offering concurrent enrollment courses, must partner with concurrent enrollment programs that are NACEP-accredited or can provide clear evidence that they meet NACEP-based standards, one can say the state encourages programs to provide training to new teachers

prior to teaching dual credit courses. (See MS 124D.091.)

(Statute 124D.091 reads as follows: "A district that offers a concurrent enrollment course according to an agreement under section 124D.09, subdivision 10, is eligible to receive aid for the costs of providing postsecondary courses at the high school. Beginning in fiscal year 2011, districts only are eligible for aid if the college or university concurrent enrollment courses offered by the district are accredited by the National Alliance of Concurrent Enrollment Partnership, in the process of being accredited, or are shown by clear evidence to be of comparable standard to accredited courses, or are technical courses within a recognized career and technical education program of study approved by the commissioner of education and the chancellor of the Minnesota State Colleges and Universities."

Minnesota monitors compliance with the statute by requiring non-NACEP accredited programs to sign a letter of assurance.

Prof. Devel.: The state does not require programs to provide active concurrent enrollment teachers with professional development.

NACEP Standard F3 requires concurrent enrollment programs to provide teachers with "annual discipline-specific professional development activities and ongoing collegial interaction to address course content, course delivery, assessment, evaluation, and/or research and development in the field. The CEP ensures CEP instructor participation."

Because the State of Minnesota has stipulated that high schools, to be eligible for state reimbursement for costs incurred while offering concurrent enrollment courses, must partner with concurrent enrollment programs that are NACEP-accredited or can provide clear evidence that they meet NACEP-based standards, one can say the state encourages programs to provide concurrent enrollment teachers with professional development. (See MS 124D.091.)

See the relevant section of Statute 124D.091 in our response to question 12.f. above.

Quality Assurance

Does state policy require any form of accreditation such as that offered by the National Alliance of Concurrent Enrollment Partnerships (NACEP)?

Not Mentioned	NACEP or State Alt. Encouraged	NACEP or State Alt. Required
	X	

Comments: The state does NOT require NACEP accreditation.

Minnesota encourages concurrent enrollment programs to become NACEP accredited, to offer clear evidence that they meet quality standards comparable to NACEP standards, or are technical courses within a recognized career and technical education program of study. Minnesota accomplishes this by requiring high schools to partner with NACEP-accredited programs or programs that meet conditions specified in MS 124D.091 ONLY if they wish to receive state reimbursement for costs incurred in offering concurrent enrollment courses.

Does state policy provide incentives for accreditation?

No	Yes
	X

Comments: Indirectly, Minnesota accomplishes this by requiring high schools to partner with NACEP-accredited programs, or programs that meet conditions specified in MS 124D.091 if they wish to receive state reimbursement for costs incurred in offering concurrent enrollment courses.

Does state policy require annual (or other regular) reports on dual credit activities?

Not Mentioned	Overall Report Required	For Special Programs	Both
		X	

Comments: The Minnesota Department of Education is required to report annually on postsecondary enrollment options activity beginning in spring 2013 to the Minnesota. Minnesota Laws 2012 Minnesota Statutes 2010, section 120B.13, subdivision 4, is amended to read:
Subd. 4. Rigorous course taking information; AP, IB, and PSEO. The commissioner shall submit the following information on rigorous course taking to the education committees of the legislature each year by February 1: (1) the number of pupils enrolled in postsecondary enrollment options under section 124D.09, including concurrent enrollment, advanced placement, and international baccalaureate courses in

each school district; (2) the number of teachers in each district attending training programs offered by the college board or, International Baccalaureate North America, Inc., or Minnesota concurrent enrollment programs; (3) the number of teachers in each district participating in support programs; (4) recent trends in the field of postsecondary enrollment options under section 124D.09, including concurrent enrollment, advanced placement, and international baccalaureate programs; (5) expenditures for each category in this section and under sections 124D.09 and 124D.091; and (6) other recommendations for the state program on the postsecondary enrollment options under section 124D.09, including concurrent enrollment. EFFECTIVE DATE. This section is effective for the 2012-2013 school year and later.

Aside from state-policy required reporting, is there any ad hoc or recurring reporting on dual credit for the legislature?

Not Mentioned	Overall Report Required	For Special Programs	Both
X			

Comments: Annual statistics were produced by MNCEP until 2006-2007. <http://www.mncep.org/impact.html> MnCEP has stopped conducting annual surveys since MDE must now track enrollments in order to make reimbursement payments to high schools. PSEO study conducted by Dr. Joe Nathan at the Center for School Change in 2011. <http://centerforschoolchange.org/2012/01/dual-credit-report/> Summary data on high school students enrolled in postsecondary education is produced annually by the Minnesota Office of Higher Education. <http://www.ohe.state.mn.us/mPg.cfm?pageID=741>

MnSCU Office of Internal Auditing "Post-Secondary Enrollment Options Program". The report is a review of MnSCU participation in the Post-Secondary Enrollment Options program. <http://www.internalauditing.mnscu.edu/reports/2001-pseo.pdf>

The 2011 Post-Secondary Planning Report is produced jointly by the Minnesota State Colleges and Universities and the University of Minnesota. The report reflects the long-term, ongoing, and effective working relationship between the two systems to develop and coordinate joint post-secondary programs in the Twin Cities and throughout Minnesota. <http://www.mnscu.edu/media/publications/pdf/2011postsecondaryjointplan.pdf>

Does state policy require students to obtain a minimum grade to receive college credit for the course?

Not Mentioned	College Criteria	Statewide Criteria
X		

Comments:

Does state policy regulate dual credit course quality or rigor? In other words, does state policy explicitly reference course designs, outcomes, assessments, learning outcomes, course expectations, or other dimensions related to course quality or rigor?

Not Mentioned	College Criteria	Statewide Criteria
		X

Comments: The state does not specify course designs, outcomes, or assessments.

NACEP Standards A1, A2, and A3 requires concurrent enrollment programs to provide evidence that concurrent enrollment students are held to the same standards of achievement, held to the same grading standards, and are assessed using the same methods as students in on-campus sections of the same course.

Because the State of Minnesota has stipulated that high schools, to be eligible for state reimbursement for costs incurred while offering concurrent enrollment courses, must partner with concurrent enrollment programs that are NACEP-accredited or can provide clear evidence that they meet NACEP-based standards, one can say the state encourages programs to offer courses that are of the same rigor as the courses offered on-campus of the sponsoring postsecondary institution. (See MS 124D.091.)

See the relevant section of Statute 124D.091 in our response to question 12.f. above.

Minnesota monitors compliance with the statute by requiring non-NACEP accredited programs to sign a letter of assurance.

Does state policy regulate the student registration or transcripting processes?

Not Mentioned	College Criteria	Statewide Criteria
		X

Comments: FOR DUAL ENROLLMENT: Students must notify the school district by March 30 of intent to enroll per M.S. 124D.09 Subd. 7. While this deadline applies to dual credit students as well as all dual enrollment students, students register through the school district for dual credit classes thus notifying the school district by registering. In addition, system or postsecondary institutional policies may require notification of enrollment (or enrollment count) by the district based on a specified date thus further regulating when a student must register for courses.
 M.S. 124D.09 Subd. 7. Dissemination of information; notification of intent to enroll.
 By March 1 of each year, a district must provide general information about the program to all pupils in grades 8, 9, 10, and 11. To assist the district in planning, a pupil shall inform the district by March 30 of each year of the pupil's intent to enroll in postsecondary courses during the following school year. A pupil is not bound by notifying or not notifying the district by March 30.

Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: State policy regulates that an agreement exist and but only encourages (not regulates) specific activities. Postsecondary system or institutional policies may require specific activities.

Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments:

Does state policy mandate that dual credit courses appear in the offering institution's catalog?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy include requirements for classroom visitation by college faculty?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: Minnesota state policy does not require classroom visitations by college faculty.

 However, NACEP standard C3 requires that "Faculty site visits ensure that college/university courses offered through the CEP are the same as the courses offered on campus."

 Although Minnesota 124D.091 encourages, via funding policies, concurrent enrollment programs to be NACEP-accredited or to meet NACEP-based standards, the requirement of faculty site visits is omitted in Minnesota's Concurrent Enrollment Aid Application form that is signed by administrators of programs not yet accredited by NACEP. Minnesota policy does not address this NACEP standard.

Does state policy include other requirements for high school and college faculty to meet or interact?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: Postsecondary system or institutional policies may do so.
 Faculty-teacher interaction varies from program to program. MnSCU requires faculty mentoring of concurrent enrollment teachers but does not specify meeting content or timeframe. U of M concurrent enrollment program practices vary as well, but include interaction facilitated by face-to-face workshops, list serves, Moodles sites, and classroom observations.
 NACEP standards F2 and F3 requires that the sponsoring college/university provide instructors with annual discipline-specific professional development activities and ongoing collegial interaction to address course content, course delivery, assessment, evaluation, and/or research in the development in the field and that the concurrent enrollment program ensures that teachers participate.
 Minnesota 124D.091 encourages, via funding policies, concurrent enrollment programs to be NACEP-accredited or to meet NACEP-based standards.

Does state policy regulate who at the postsecondary institutions has oversight for faculty credentials and faculty eligibility requirements (e.g., academic departments, dean or chief academic officer, human resources, etc.)?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: Minnesota state policy does not stipulate who will provide oversight for faculty credentials and eligibility requirements.

However, NACEP standards requires oversight of concurrent enrollment teacher credentials and eligibility by the college/university department (through the teacher approval process). Concurrent enrollment program administrators must document criteria and processes for appointing, approving, or denying instructors to earn NACEP accreditation.

Minnesota 124D.091 encourages, via funding policies, concurrent enrollment programs to be NACEP-accredited or to meet NACEP-based standards.

Additionally, MnSCU system/institutional policies also address this (see Board procedure 3.5.1).

Does state policy require the monitoring of outcomes or impacts at any level?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: State law requires only numbers of participants and expenditures for concurrent enrollment to be reported.

Minnesota Statute 120B.13 now requires the Minnesota Department of Education to report annually to the legislature a minimal level of information about student, teacher, and school participation in Advanced Placement, International Baccalaureate and in both forms of PSEO (one form being concurrent enrollment).

1. the number of pupils enrolled in postsecondary enrollment options under section 124D.09, including concurrent enrollment, advanced placement, and international baccalaureate courses in each school district;
2. the number of teachers in each district attending training programs offered by the college board, International Baccalaureate North America, Inc., or Minnesota concurrent enrollment programs;
3. the number of teachers in each district participating in support programs;
4. recent trends in the field of postsecondary enrollment options under section 124D.09, including concurrent enrollment, advanced placement, and international baccalaureate programs;
5. expenditures for each category in this section and under sections 124D.09 and 124D.091; and
6. other recommendations for the state program or the postsecondary enrollment options under section 124D.09, including concurrent enrollment.

Four NACEP evaluation standards pertaining to monitoring outcomes and impacts require that programs:

1. conduct end-of-term student university/college course evaluations for each course section offered through the CEP (concurrent enrollment program);
2. conduct an annual survey of CEP alumni who are one year out of high school;
3. conduct a survey of CEP alumni who are four years out of high school at least once every three years; and
4. conduct surveys of participating high school instructors, principals, and guidance counselors at least once every three years.

Although Minnesota 124D.091 encourages concurrent enrollment programs to be NACEP-accredited or to meet NACEP-based standards, the requirement of monitoring outcomes or impacts is omitted in Minnesota's Concurrent Enrollment Aid Application form that is signed by administrators of programs not yet accredited by NACEP. So, Minnesota not only does not require monitoring of outcomes and impacts, but it ignores this aspect of NACEP standards

Does state policy require surveys of dual credit stakeholders (teachers, principals, college faculty/instructors, other)?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Encouraged

Comments: NACEP standard E4 requires concurrent enrollment programs to survey teachers, principals, and counselors once every 3 years.

Although Minnesota 124D.091 encourages concurrent enrollment programs to be NACEP-accredited or to meet NACEP-based standards, the requirement of surveying teachers, principals, and counselors is omitted in Minnesota's Concurrent Enrollment Aid Application form that is signed by administrators of programs not yet accredited by NACEP. So, Minnesota not only does not require surveying dual credit stakeholders, but it ignores this aspect of NACEP standards.

Does state policy mandate any other forms of evaluation and/or review not yet mentioned?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Finance and Resources

Does state policy provide ANY direct funding to the high school or college for dual credit?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: Minnesota Statute 124D.091 stipulates that high schools may be reimbursed, up to \$150 per student if the high schools are partnering with a qualified concurrent enrollment program (See statute for qualifications.) However, the legislature has never allocated sufficient funds to reimburse high schools at the level allowed by statute; instead, reimbursements have been significantly prorated and thus significantly lower.

Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: Minnesota Statute 124D.09 assumes that the students/parents will not pay. It stipulates that an agreement between the school board and postsecondary institution must include payment amounts and arrangements; the statute also stipulates that the postsecondary institution can charge an amount no more than what it costs to provide the course.

Does state policy regulate who pays for books related to dual credit courses?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

The statute reads as follows:
 Minnesota Statute 124D.09 Subd. 16. Financial arrangements for courses provided according to agreements.
 (a) The agreement between a board and the governing body of a public postsecondary system or private postsecondary institution shall set forth the payment amounts and arrangements, if any, from the board to the postsecondary institution. No payments shall be made by the department according to subdivision 13 or 15. For the purpose of computing state aids for a district, a pupil enrolled according to subdivision 10 shall be counted in the average daily membership of the district as though the pupil were enrolled in a secondary course that is not offered in connection with an agreement. Nothing in this subdivision shall be construed to prohibit a public postsecondary system or private postsecondary institution from receiving additional state funding that may be available under any other law.
 (b) If a course is provided under subdivision 10, offered at a secondary school, and taught by a secondary teacher, the postsecondary system or institution must not require a payment from the school board that exceeds the cost to the postsecondary institution that is directly attributable to providing that course.

Furthermore, Minnesota statute prohibits charging fees.
 Minnesota Statute 123.B.37 PROHIBITED FEES.
 Subdivision 1. Boards shall not charge certain fees.
 (a) A board is not authorized to charge fees in the following areas:
 (1) textbooks, workbooks, art materials, laboratory supplies, towels;
 (2) supplies necessary for participation in any instructional course except as authorized in sections 123B.36 and 123B.38;
 (3) field trips that are required as a part of a basic education program or course;
 (4) graduation caps, gowns, any specific form of dress necessary for any educational program, and diplomas;

(5) instructional costs for necessary school personnel employed in any course or educational program required for graduation;
 (6) library books required to be utilized for any educational course or program;
 (7) admission fees, dues, or fees for any activity the pupil is required to attend;
 (8) any admission or examination cost for any required educational course or program;
 (9) locker rentals;
 (10) transportation to and from school of pupils living two miles or more from school.
 (b) Notwithstanding paragraph (a), clauses (1) and (6), a board may charge fees for textbooks, workbooks, and library books, lost or destroyed by students. The board must annually notify parents or guardians and students about its policy to charge a fee under this paragraph.
 Subd. 2. Boards shall not withhold grades or diplomas for nonpayment of student fees. No pupil's rights or privileges, including the receipt of grades or diplomas may be denied or abridged for nonpayment of fees; but this provision does not prohibit a district from maintaining any action provided by law for the collection of fees authorized by sections 123B.36 and 123B.38.
 Furthermore, Minnesota statute prohibits charging for textbooks. See Minnesota Statute 123.B.37 PROHIBITED FEES. Subdivision 1(a)(1). Reference in question 32.

If state policy requires students/parents to pay, does state policy provide forms of financial support to students/parents?

No	Yes	Not Applicable
	X	

Comments: Subd. 16. Financial arrangements for courses provided according to agreements.

(a) The agreement between a board and the governing body of a public postsecondary system or private postsecondary institution shall set forth the payment amounts and arrangements, if any, from the board to the postsecondary institution. No payments shall be made by the department according to subdivision 13 or 15. For the purpose of computing state aids for a district, a pupil enrolled according to subdivision 10 shall be counted in the average daily membership of the district as though the pupil were enrolled in a secondary course that is not offered in connection with an agreement. Nothing in this subdivision shall be construed to prohibit a public postsecondary system or private postsecondary institution from receiving additional state funding that may be available under any other law.
 (b) If a course is provided under subdivision 10, offered at a secondary school, and taught by a secondary teacher, the postsecondary system or institution must not require a payment from the school board that exceeds the cost to the postsecondary institution that is directly attributable to providing that course.

Does state policy allow (or disallow) high schools or colleges to collect funding credit dual credit students (e.g., per ADA- or FTE-based formula)

	None	Partial	Full	Not Applicable
High School			X	
College				X

Comments: High schools receive the full "Average Daily Membership" (ADM) for concurrent enrollment students. High schools pay a fee to the college/university administering the concurrent enrollment program. High schools are eligible to receive a state reimbursement of the fee paid to the college/university of up to \$150/registration in a concurrent enrollment course, but the reimbursement is available only if the concurrent enrollment course is offered by a college/university concurrent enrollment program that meets NACEP or comparable standards. The appropriation is capped and pro-rated based on total concurrent enrollment course enrollments across the state. State appropriations to the public postsecondary systems are not calculated using a Full-Time Equivalent basis. However, allocations of state appropriations to individual MnSCU institutions by the MnSCU system office are done on an FTE basis. Dual credit students are included in FTE calculations for funding purposes. Appropriations allocations at other institutions or systems may or may not use a FTE basis.

Does state policy regulate faculty salary or compensation for teaching dual credit classes?

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year

Comments:

Miss. Code Ann. § 37-15-38. (2) A local school board, the Board of Trustees of State Institutions of Higher Learning and the State Board for Community and Junior Colleges shall establish a dual enrollment system under which students in the school district who meet the prescribed criteria of this section may be enrolled in a postsecondary institution in Mississippi while they are still in school.

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Encouraged
-----------	------------

Comments:

Miss. Code Ann. § 37-15-38 (4) Admission criteria for dual enrollment in community and junior college or university programs. The boards of trustees of the community and junior college districts and the Board of Trustees of State Institutions of Higher Learning may recommend to the State Board of Education admission criteria for dual enrollment programs under which high school students may enroll at a community or junior college or university while they are still attending high school and enrolled in high school courses. Students may be admitted to enroll in community or junior college courses under the dual enrollment programs if they meet that individual institution's stated dual enrollment admission requirements.

Does state policy set parameters on the types of courses that colleges can or cannot offer or provide?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments:

Miss. Code Ann. § 37-15-38 (10) Process for determining articulation of curriculum between high school, university, and community and junior college courses. Postsecondary curricula for eligible courses currently offered through Mississippi Curriculum Frameworks must meet the prescribed competencies requirements. Eligible courses not offered in Mississippi Curriculum Frameworks must meet the standards established at the postsecondary level. Postsecondary level developmental courses may not be considered as meeting the requirements of the dual credit program. Dual credit memorandum of understandings must be established between each postsecondary institution and the school district implementing a dual credit program.

Miss. Code Ann. § 37-15-38 (11) Ineligible courses for dual credit programs. Any course that is required for subject area testing as a requirement for graduation from a public school in Mississippi is not eligible for dual credit.

Miss. Code Ann. § 37-15-38 (12) Eligible courses for dual credit programs. Courses eligible for dual credit include, but are not necessarily limited to, foreign languages, advanced math courses, advanced science courses, performing arts, advanced business and technology, and career and technical courses. All courses being considered for dual credit must receive unconditional approval from the superintendent of the local school district and the chief instructional officer at the participating community or junior college or university in order for college credit to be awarded. A university or community or junior college shall make the final decision on what courses are eligible for semester hour credits. The local school superintendent shall make the final decision on the transfer of college or university courses credited to the student's high school transcript.

Miss. Code Ann. § 37-15-38 (13) High school Carnegie unit equivalency. One (1) three-hour university or community or junior college course is equal to one-half (1/2) high school Carnegie unit. A full Carnegie unit may be awarded for a three-hour university or college course upon approval of the local superintendent. Partial credit agreements for postsecondary courses that are less than three (3) hours may be developed between a local school district and the participating postsecondary institution.

Miss. Code Ann. § 37-15-38 (14) Course alignment. Once alignment is achieved between university courses, community and junior college courses and the State Board of Education approved high school courses, the universities, community and junior colleges and high schools shall periodically review their respective policies and assess the place of dual credit courses within the context of their traditional offerings.

Comments:

Number: Dual Credit Policy (Transferability of Credit section):
 "Dual credit programs are not designed to replace a substantial segment of the academic experience on a college campus, but rather the programs are created to provide high-achieving high school students with opportunities for acceleration...The number of credit hours successfully completed by a high school student in dual credit programs will be related to her or his ability level. Since dual credit programs are predicated on the portability of transcribed college credit, the following guideline should anchor the decisions made by the high school student and the receiving institution: students receiving dual credit from institutions in compliance with these policy guidelines can expect to transfer credit up to the equivalent of five courses. [Clarifying comment: Five courses shall be assured in transfer to all public institutions and independent/proprietary signatory institutions. 'Equivalence of five courses' means five individual courses, regardless of the credit-hour value of those

courses.]”“Students who wish to transfer more than five dual credit courses should consult the institution of higher education to which they intend to transfer in order to determine if the institution has a policy regarding the acceptance of dual credit courses used for the completion of a college degree.”

Transfer: Students with dual credit transcripted courses who complete Associate of Arts (AA) degrees will be received in transfer the same as all AA degree transfer students.] The receiving institution should not, however, impose any limits that preclude high school juniors and seniors from earning additional credit through regular summer and/or evening enrollment in college courses taught by college faculty as allowed by dual enrollment, early admissions, or other college programs such as articulation agreements, advanced placement, or other accepted means of testing or granting credit. Credit earned by students in dual credit courses that meet the above guidelines shall fall under the same CBHE guidelines as that for credit in college courses subject to transfer between public and independent institutions in the state of Missouri. College credit earned through dual credit courses offered in high schools shall be applicable toward associate and/or baccalaureate degree requirements and shall be eligible for transfer. All student rights and responsibilities as outlined in the CBHE’s Credit Transfer Guidelines shall apply. Institutions must publicize their policies related to the acceptance of dual credit beyond the equivalent of five courses. (MDHE Policy)

Gened: Missouri’s policy entitled, Credit Transfer Guidelines for Student Transfer and Articulation Among MO Colleges and Universities (Section II.E), indicates that “The statewide general education policy requires institutions to design and offer a general education program that includes a minimum of 42 semester-hours of credit distributed across the academic skills and knowledge areas of the previous sections [of the policy]. These credit hours should be distributed in such a way that students who complete the 42 semester-hour block of general education credit from any institution of higher education in the state will have had the opportunity to achieve the high expectations embodied in the state-level goals and suggested competencies set forth in the previous section.”

As Missouri defines dual credit as specifically relating to general education courses offered in the high school, these courses also fall under general education policy guidelines Section III.D.7 Credit by Examination, Dual Credit, Experiential Learning, and Pass/Fail Credit

“...Advanced placement, credit by examination, dual credit, and credit for experiential learning will be transcripted and clearly defined. ..The receiving institution shall transfer and treat credit earned through...dual credit...in the same manner as it would for native students, except that the integrity of the associate degree or the 42-hour general education block will not be invalidated.”

Other: There is no restriction on what can or cannot be offered. The only restriction is in how the state defines dual credit and the types of courses that Missouri considers as following under policy guidance.

How state enforces policies regarding who can or must provide dual credit courses?

No Mechanism Mentioned	General Mechanism	Specific Mechanism
	X	

Comments:

The Missouri Department of Elementary and Secondary Education provides approval for Missouri high schools to offer dual credit courses. Oversight for these courses occurs in conjunction with the Missouri Department of Higher Education.

Grade Level: According to Section 167.223, RSMo (1990), public high schools, in cooperation with Missouri public community colleges and public or private four-year colleges and universities, may offer postsecondary course options to high school juniors and seniors. Section 167.223, RSMo, was amended in 1998 to expand eligibility for dual credit enrollment to high school freshmen and sophomores.
MDHE Policy

GPA: For all institutions, however, students must have a minimum overall grade point average of 3.0 (on a 4.0 scale) or the equivalent. (MDHE Policy)

Exam Scores: High school juniors and seniors who meet the above requirements will be eligible for dual credit courses. Under special circumstances, freshmen and sophomores with superior academic talents may take dual credit courses. Freshmen and sophomores must demonstrate their competency by scoring at the 90th percentile or above on the ACT or SAT. Moreover, the recommending high school counselor and the college academic department official must concur that a younger student can benefit from dual credit in the specific course and learn at the collegiate level. (MDHE Policy)

High school students must also meet the same requirements for admission to individual courses (e.g., English or mathematics) as those required of on-campus students (e.g., ACT, ASSET, or other placement test scores). (MDHE Policy)

Pre-reqs: Specific placement tests may not be required for admission to some college courses; however, if the high school administers a competency assessment in an area related to the dual credit course, high school juniors and seniors must score at proficient or above on the MAP or achieve an equivalent score on a comparable assessment. Performance on the MAP or a related assessment test should be verified in the high school principal's or official designee's recommendation that the student participate in a dual credit course. (MDHE Policy)

Credits: The number of credit hours successfully completed by a high school student in dual credit programs will be related to her or his ability level. Since dual credit programs are predicated on the portability of transcribed college credit, the following guideline should anchor the decisions made by the high school student and the receiving institution: students receiving dual credit from institutions in compliance with these policy guidelines can expect to transfer credit up to the equivalent of five courses.

[Clarifying comment: Five courses shall be assured in transfer to all public institutions and independent/proprietary signatory institutions. "Equivalence of five courses" means five individual courses, regardless of the credit-hour value of those courses.] (MDHE Policy)

Mix NonDC: Because discrete classes that totally separate dual credit from non-dual credit students may be prohibitive to operate in some cases, those classes with a mixed population must show evidence of collegiate level expectations for all students in the course. All high school students enrolled in a dual credit course must meet the same requirements for completion of the course, whether or not the student is simultaneously registered for college credit. (MDHE Policy)

College Stds.: State policy does not dictate whether college students can enroll in dual credit classes in the high school, however, policy defines dual credit as being offered in the high school to high school students (further defined as high school juniors and seniors and qualified freshmen and sophomore students). College students enrolling in dual credit courses in this case would fall outside the purview of Missouri policy.

Registration Timing: Students enrolled in dual credit classes must adhere to the dates comparable to those specified on the college campus for registration, drop, withdrawal, or refund.

[Clarifying comment: The intent of the policy is to prevent retroactive registration, a practice that permits students to choose whether to register for courses for college credit late in the semester. The policy is not intended to create logistical problems. On-campus and dual credit academic calendars should be comparable; program directors may exercise reasonable discretion with respect to registrations, payments, drops, withdrawals, and refunds.]

Waivers: Students enrolled in dual credit classes must adhere to the dates comparable to those specified on the college campus for registration, drop, withdrawal, or refund.

[Clarifying comment: The intent of the policy is to prevent retroactive registration, a practice that permits students to choose whether to register for courses for college credit late in the semester. The policy is not intended to create logistical problems. On-campus and dual credit academic calendars should be comparable; program directors may exercise reasonable discretion with respect to registrations, payments, drops, withdrawals, and refunds.]

Teacher Elig.: As for any instructor of college-level courses, high school instructors of dual credit courses shall meet the requirements for faculty teaching in institutions of higher education, as stipulated for accreditation by the Higher Learning Commission. High school instructors teaching general education courses shall have a master's degree that includes substantial study (a minimum of 18 semester hours) appropriate to the academic field in which they are teaching. (MHDE Policy)

HS Credential: State policy does not require that dual credit faculty have appropriate high school teaching credentials, however, by definition, dual credit in Missouri is offered in the high school and delivered by high school faculty to high school students.

Selection: Dual credit instructors must be evaluated according to the college's evaluation policies for other part-time/adjunct faculty, with the recommendation for continuation being the responsibility of the campus academic department. Thus, the institution of higher education must provide on-site supervision and evaluation of the dual credit faculty. This process is best served when the instructional site is within a reasonable commuting distance from the institution of higher education. (MDHE Policy)

Prior Training: New dual credit instructors will participate in orientation activities provided by the college and/or academic department (MDHE Policy)

Prof. Devel.: Continuing dual credit instructors must participate in both the professional development and evaluation activities as those expected of adjunct faculty on the college campus (MDHE Policy)

Waivers: However, institutions are permitted to use professional judgment in allowing faculty that do not meet all requirements for higher education instruction to teach dual credit courses provided that ninety percent of any institution's dual credit faculty meet the standard faculty eligibility requirements set forth above.

How state enforces policies regarding who can teach dual credit courses

No Mechanism Mentioned	General Mechanism	Specific Mechanism
	X	

Comments: Higher education institutions are surveyed regarding their dual credit programs and asked regarding their compliance with dual credit policy.

Quality Assurance

Does state policy require any form of accreditation such as that offered by the National Alliance of Concurrent Enrollment Partnerships (NACEP)?

Not Mentioned	NACEP or State Alt. Encouraged	NACEP or State Alt. Required
X		

Comments:

Does state policy provide incentives for accreditation?

No	Yes
X	

Comments:

Does state policy require annual (or other regular) reports on dual credit activities?

Not Mentioned	Overall Report Required	For Special Programs	Both
	X		

Comments: Each institution will provide evidence demonstrating that the policy guidelines for the delivery of dual credit programs offered in high schools have been implemented. The chief academic officer of each institution offering dual credit courses must provide evidence concerning the implementation of the dual

credit policy guidelines stated above in the sections on Student Eligibility, Program Structure and Administration, Faculty Qualifications and Support, Assessment of Student Performance, and Transferability of Credit. The institution may provide additional information in support of the quality and comparability of the dual credit courses to the same course offerings on the college campus, especially as those data support institutional exceptions to any of the policy guidelines. The CBHE will provide an updated list of dual credit programs that are in compliance with the above policy that will be shared annually with the Department of Elementary and Secondary Education and other interested constituents. In addition, all institutions offering dual credit courses are required to report annually to the CBHE such things as the number of sections offered; the number of students enrolled (duplicated headcount) per high school; the total by class (year in high school); the number of high schools served by dual credit and the number of sections in each; the student credit-hour production (total for all dual credit and total per high school); the number of sections offered in mathematics, science, social sciences, and humanities; and summary data on the performance of dual credit students. A format for the annual reports will be developed. Dual credit data will be submitted to the CBHE when the institution submits its annual Performance Indicators Report. These policy guidelines shall be reviewed by COTA after three years based on annual reports submitted by institutions and reports on the academic progress of students who transfer dual credit. (MDHE Policy)

Comments:

Dual credit courses offered in high schools must duplicate the identical course offerings delivered on campus to matriculated students. Courses must be approved for dual credit status, and the credit awarded must be deemed acceptable in transfer by the faculty of the appropriate academic department (unit) of the college. Elements of the dual credit course to be approved by the on-campus college faculty in the appropriate academic discipline include the syllabus, textbook(s), teaching methodology, and student assessment strategies. Course content and course requirements must be comparable to those utilized in the equivalent on-campus courses with the same titles. (MDHE Policy) Locally developed assessments must be administered to both on-campus and dual credit students in order to provide the on-campus college faculty in the appropriate academic discipline with data appropriate to demonstrate comparability. Nonetheless, any specialized assessment of dual credit courses must emulate the on-campus institutional assessment plan required by the Higher Learning Commission, including the identification of the general education learning objectives and outcomes. Since the dual credit courses duplicate course offerings delivered on the college campus to matriculated students, both formative and summative assessment strategies and tools must be approved by the on-campus college faculty in the appropriate academic discipline. Annual reports of student performance must be submitted to the chief academic officer for both review and consideration with respect to the continuation of the dual credit instructor. (MDHE Policy)

Does state policy regulate the student registration or transcripting processes?

Not Mentioned	College Criteria	Statewide Criteria
	X	

Comments: Students enrolled in dual credit classes must adhere to the dates comparable to those specified on the college campus for registration, drop, withdrawal, or refund. Students in dual credit courses must have geographic access to student and academic support similar to that accorded students on the college campus, including access to library resources of similar scope and magnitude as those available to students enrolled in courses with the same titles on the college campus. Library materials must be available either on site at the high school or through electronic means. Dual credit students must have reasonable access to the course instructor outside regular classroom hours either in person, via phone, and/or through other electronic means. Credit earned by students in dual credit courses that meet the above guidelines shall fall under the same CBHE guidelines as that for credit in college courses subject to transfer between public and independent institutions in the state of Missouri. College credit earned through dual credit courses offered in high schools shall be applicable toward associate and/or baccalaureate degree requirements and shall be eligible for transfer. All student rights and responsibilities as outlined in the CBHE's Credit Transfer Guidelines shall apply. Institutions must publicize their policies related to the acceptance of dual credit beyond the equivalent of five courses.

Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Required

Comments: Students in dual credit courses must have geographic access to student and academic support similar to that accorded students on the college campus, including access to library resources of similar scope and magnitude as those available to students enrolled in courses with the same titles on the college campus. Library materials must be available either on site at the high school or through electronic means. Dual credit students must have reasonable access to the course instructor outside regular classroom hours either in person, via phone, and/or through other electronic means.(MDHE Policy)

Does state policy mandate that dual credit courses appear in the offering institution's catalog?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Required

Comments: While policy does not mandate that dual credit courses appear in the offering institution's catalog, dual credit courses offered in high schools must duplicate the identical course offerings delivered on campus to matriculated students. Courses must be approved for dual credit status, and the credit awarded must be deemed acceptable in transfer by the faculty of the appropriate academic department (unit) of the college.

Does state policy include requirements for classroom visitation by college faculty?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Encouraged

Comments: the large majority of dual credit courses are taught by high school faculty with supervision by on-campus college faculty (MDHE Policy) Thus, the institution of higher education must provide on-site supervision and evaluation of the dual credit faculty. This process is best served when the instructional site is within a reasonable commuting distance from the institution of higher education. (MDHE Policy)

Does state policy include other requirements for high school and college faculty to meet or interact?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Required

Comments: The chief academic officer of the postsecondary institution will also be responsible for involving full time faculty in the discipline in the selection and evaluation of all dual credit faculty. (MDHE Policy) The on-campus college faculty must also ensure comparable standards of evaluation. (MDHE Policy)

Does state policy regulate who at the postsecondary institutions has oversight for faculty credentials and faculty eligibility requirements (e.g., academic departments, dean or chief academic officer, human resources, etc.)?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Required

Comments: MDHE policy has several references to requirements of the Chief Academic Officer of the college.

Does state policy require the monitoring of outcomes or impacts at any level?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Required

Comments: The responsibility for the development of assessment and evaluation measures to assure quality and comparability of dual credit courses resides with the on-campus college faculty in the appropriate academic discipline. In general, comparability between the dual credit course taught in the high school and the corresponding course taught on the college campus should be demonstrated by using the same methods of assessment or identical testing procedures and by employing the same means of evaluation, which will be supervised by the appropriate faculty on the college campus. (MDHE policy)

Does state policy require surveys of dual credit stakeholders (teachers, principals, college faculty/instructors, other)?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy mandate any other forms of evaluation and/or review not yet mentioned?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

How state enforces policies regarding quality assurance

No Mechanism Mentioned	General Mechanism	Specific Mechanism
	X	

Comments: Each institution will provide evidence demonstrating that the policy guidelines for the delivery of dual credit programs offered in high schools have been implemented. The chief academic officer of each institution offering dual credit courses must provide evidence concerning the implementation of the dual credit policy guidelines stated above in the sections on Student Eligibility, Program Structure and Administration, Faculty Qualifications and Support, Assessment of Student Performance, and Transferability of Credit. The institution may provide additional information in support of the quality and comparability of the dual credit courses to the same course offerings on the college campus, especially as those data support institutional exceptions to any of the policy guidelines. The CBHE will provide an updated list of dual credit programs that are in compliance with the above policy that will be shared annually with the Department of Elementary and Secondary Education and other interested constituents.

In addition, all institutions offering dual credit courses are required to report annually to the CBHE such things as the number of sections offered; the number of students enrolled (duplicated headcount) per high school; the total by class (year in high school); the number of high schools served by dual credit and the number of sections in each; the student credit-hour production (total for all dual credit and total per high school); the number of sections offered in mathematics, science, social sciences, and humanities; and summary data on the performance of dual credit students. A format for the annual reports will be developed. Dual credit data will be submitted to the CBHE when the institution submits its annual Performance Indicators Report. These policy guidelines shall be reviewed by COTA after three years based on annual reports submitted by institutions and reports on the academic progress of students who transfer dual credit. (MDHE Policy).

The chief academic officer of the college or university, being responsible for the academic quality of courses delivered on the college campus, is also accountable for the implementation of this policy and for assuring the integrity and quality of all dual credit courses.

Finance and Resources

Does state policy provide ANY direct funding to the high school or college for dual credit?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments:

Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: 167.223, #4. Community colleges and four-year colleges and universities may charge reasonable fees for pupils enrolled in courses under a postsecondary course option. Such fees may be paid by the district of residence or by the pupil, as determined by the agreement between the district of residence and the college or university.

Does state policy regulate who pays for books related to dual credit courses?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
X			

If state policy requires students/parents to pay, does state policy provide forms of financial support to students/parents?

No	Yes	Not Applicable
X		

Comments:

Does state policy allow (or disallow) high schools or colleges to collect funding credit dual credit students (e.g., per ADA- or FTE-based formula)

	None	Partial	Full	Not Applicable
High School			X

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency	Comments:
	X		Montana Board of Regents – Synonymously used throughout this document as “State Policy”

Terms and Definitions

Term	Definition
Dual Enrollment	“broad term for various types of opportunities for high school students to take college coursework while they are enrolled in high school”
Dual-credit course	“awards both high school credit and college credit for a college course taken by the high school student”
College-credit only course	“awards college credit, but not high school credit, for a college course taken by the high school student”
Concurrent enrollment	The college course is taught, usually at the high school, to a class of high school students by an appropriately qualified college faculty member, or, more commonly, by an appropriately qualified high school teacher serving as an adjunct faculty member for the college offering the course” (p. 1).
Term for H.S. Located DC	Concurrent enrollment

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year	Comments:
X		X	X	“Montana’s two-year mission campuses-the community colleges, the colleges of technology, Montana State University-Northern and the University of Montana-Western-will be the campuses authorized by the Board of Regents of Higher Education to provide dual enrollment opportunities in Montana” (p. 2).

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Comments:
Encouraged	The growth of dual credit availability is one of the BoR Strategic Plan goals.

Does state policy set parameters on the types of courses that colleges can or cannot offer or provide?

Mentioned:	Yes	Comments:
Domain:	Statewide	“Courses eligible for dual enrollment will be 100- or 200- level college courses included in the college’s catalog...” (Guidelines p. 2).
Prescriptiveness:	Required	

Types of Parameters

	Subject Matter	Number of Courses	Statewide Transfer	Statewide General Educ.	Other
Mentioned:	No	No	Yes	No	Yes
Domain:			Statewide		Statewide
Prescriptiveness:			Required		Required

Comments:

Transfer: Dual credit courses that are part of the MUS Transferability Initiative for common numbering will transfer as such to any of the MUS or CC campuses.
 Gened: See BoR Policy 310.10 and <http://mus.edu/transfer/MUScore.asp> for more.
 Other: "...having the same course prefix, number, title, credits, and outcomes as those established system-wide by the Montana University System Faculty Learning Outcomes Councils (FLOC)" (Guidelines p. 2). (Also see #7-c)

How state enforces policies regarding who can or must provide dual credit courses?

No Mechanism Mentioned	General Mechanism	Specific Mechanism
	X	

Comments: Through BoR Policy, and a congenial relationship with OPI (Office of Public Instruction) which strictly regulates the credit to high school students.

Who Can Take Dual Credit Courses?

Does state policy regulate how students or parents learn about dual credit opportunities?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments: Widely advertised through the delivering campuses and by many of the high schools, but not driven by policy.

Does state policy dictate whether dual credit classes can or cannot be mixed where some students are enrolled for college credit and others are enrolled only for high school credit?

Not Mentioned	Allowed	Discouraged	Prohibited
X			

Does state policy dictate whether or not college students can enroll in dual credit classes in the high school?

Not Mentioned	Allowed	Discouraged	Prohibited
X			

Other Comments

Grade Level: But generally only to Jr & Sr level students
 GPA: NOTE: "Students must have completed the required high school classes at that grade level and be on track for high school graduation within a four-year construct" (p. 5). The enrolling high school must authorize the enrollment for dual credit in order to ensure that the student is prepared and capable of a successful completion.
 Exam Scores: The Policy does require the use of standardized exam scores for placement for students enrolled in mathematics and composition courses. (Also see #10-e), but does not standardize dual credit exam scores.
 Pre-reqs: "Without exception, all dual enrollment students must meet the same prerequisites as on-campus student for courses that require specific placement tests, scores, or prerequisite courses. Students seeking places in mathematics and composition courses, including those students seeking college credit in excepted "honors" and "differentiated courses" classes must meet the requirements of Board of Regents Policies 3.01" (Guidelines p. 5).
 Registration Timing: Students are subject to the enrollment and other academic deadlines of the teaching campus, as set forth in the bulletin or catalog.
 Waivers: "...the high school's designated official may request an exception..." (Guidelines p. 5), offered to allow flexibility in student age.

How state enforces policies regarding who can take dual credit courses

No Mechanism Mentioned	General Mechanism	Specific Mechanism
		X

Comments: The enrolling school district must approve the student for dual credit, and the enrolling campus will not complete the student enrollment without such authorization.

Who Can Teach Dual Credit Courses?

High School Credential Required?
Specific Credential Required

Other Comments

Degree: Master's in subject area as required by Board of Regents Policy 730 (Guidelines p. 4) *

HS Credential: K-12 Licensure "...or the course will not be eligible for high school credit" (Guidelines p. 4)

Subject Exp.: Campus academic policy may also apply, but see BoR Policy 730.

Selection: "...must be approved by the college...(as recommended by the faculty in the academic program being delivered)" (Guidelines p. 4)

Prior Training: "...college will provide discipline-specific training and orientation..." (Guidelines p. 4). Additionally, online faculty agree to abide by the MUS Online Quality Principles and associated campus professional training and development, located at <http://mus.edu/online> under Quality Principles.

Prof. Devel.: "...the college will provide annual discipline-specific professional development activities and ongoing collegial interaction..." (Guidelines p. 4). Additionally, if online, the course must have been delivered at least once by the faculty.

Other: Campus and faculty adherence to the Quality Principles adopted for online delivery by the MUS eLearning Advisory Committee.

Waivers: "These processes may be modified for concurrent enrollment faculty in collaboration with the school district, but the processes will meet or exceed the faculty standards for accreditation with NACEP" (Guidelines p. 4).

How state enforces policies regarding who can teach dual credit courses

No Mechanism Mentioned	General Mechanism	Specific Mechanism
		X

Comments: "The college will establish and reinforce expectations for supervision, professional development, and evaluation of concurrent enrollment faculty" (Guidelines p. 4).

Quality Assurance

Does state policy require any form of accreditation such as that offered by the National Alliance of Concurrent Enrollment Partnerships (NACEP)?

Not Mentioned	NACEP or State Alt. Encouraged	NACEP or State Alt. Required
		X

Comments: "To ensure college-level outcomes, all concurrent enrollment courses will meet the standards for accreditation by the National Alliance of Concurrent Enrollment Partnerships" (Guidelines p. 1).

Does state policy provide incentives for accreditation?

No	Yes
X	

Comments: The indirect incentive is the continuing State funding support....

Does state policy require annual (or other regular) reports on dual credit activities?

Not Mentioned	Overall Report Required	For Special Programs	Both
	X		

Comments: "...an annual OPI/OCHE report to the Board of Education on the dual enrollment offerings in the state, information on courses offered and students served under the exceptions for honors courses and differentiated instruction courses, the numbers of exceptions to student eligibility requirements requested and approved, the numbers of students successfully completing dual enrollment courses, comparisons of common assessment of learning outcomes, and successful transfer/expedited progress toward degree in Montana colleges and universities..." (Guidelines p. 7).

Aside from state-policy required reporting, is there any ad hoc or recurring reporting on dual credit for the legislature?

Not Mentioned	Overall Report Required	For Special Programs	Both
	X		

Comments: Periodic reports are prepared and delivered by the Director of eLearning, the Deputy Commissioner for Two Year Programs, and the Associate Commissioner responsible for the Data Warehouse.

Does state policy require students to obtain a minimum grade to receive college credit for the course?

Not Mentioned	College Criteria	Statewide Criteria
X		

Comments: Typically a "C-" or better is required by the campuses in order to post college credit, but it does vary campus by campus.

Does state policy regulate dual credit course quality or rigor? In other words, does state policy explicitly reference course designs, outcomes, assessments, learning outcomes, course expectations, or other dimensions related to course quality or rigor?

Not Mentioned	College Criteria	Statewide Criteria
		X

Comments: "...program evaluation at the institutional level meeting or exceeding the evaluation standards for accreditation by NACEP (Appendix A or <http://nacep.org/standards>), with institutional evaluations subsequently compiled at the state level (Appendix 1 or <http://nacep.org/standards>), with institutional evaluations subsequently compiled at the state level" (Guidelines p. 6-7) Additionally, all college courses will have Learning Outcomes associated, for accreditation review, and assessments are being developed to measure those outcomes.

Does state policy regulate the student registration or transcripting processes requirements (e.g., course transcription, articulation, or student rights and responsibilities)?

Not Mentioned	College Criteria	Statewide Criteria
		X

Comments: "Counseling and advising of prospective students by appropriate college officials, high school counselors, teachers, and parents will be an integral part of all dual enrollment programs. Advising materials must state that as a college course, the dual enrollment course becomes part of the permanent college transcript that must be provided by the student to any college he or she eventually attends" (Guidelines p. 5)

Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Required

Comments: The school districts and the enrolling campuses engage in various levels of formal "Memorandums of Agreement" to help govern all dual-credit associated activity.

Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: "Student services in both the high school and the college settings will ensure that dual enrollment students have access to academic resources (e.g., library materials) and student services (e.g., orientation, advising, procedural information) that are important to the class and available to adult students taking the same course" (Guidelines p. 5) Additionally, campuses have accepted the Online Principles of Quality that mandate equitable levels of student support services, whether delivered face to face or online. (See www.mus.edu/online/coreprinciples.)

Does state policy mandate that dual credit courses appear in the offering institution's catalog?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments: All college courses appear in the college course listing, including those offered for dual credit. (Faculty who teach the dual credit courses are actually teaching a college level course that may or may not have high school students enrolled.)

Does state policy include requirements for classroom visitation by college faculty?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: "College faculty in the discipline and/or the appropriate academic administrator will verify through site visits and other measures that the curriculum of concurrent enrollment courses reflects the pedagogical, theoretical and philosophical orientation of the sponsoring college" (Guidelines p. 3).

Does state policy include other requirements for high school and college faculty to meet or interact?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Required

Comments: "The college will provide annual discipline-specific professional development activities and ongoing collegial interaction to address course content, course delivery, assessment, evaluation, and/or research from the field" (Guidelines p. 4).

Does state policy regulate who at the postsecondary institutions has oversight for faculty credentials and faculty eligibility requirements (e.g., academic departments, dean or chief academic officer, human resources, etc.)?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments: Campus policy identifies the Chief Academic Officer and the associated duties and responsibilities. The CAO often delegates the responsibilities to align with the organizational and reporting structures for faculty.

Does state policy require the monitoring of outcomes or impacts at any level?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments: Faculty evaluate assessment via their established exam and grading processes.

Does state policy require surveys of dual credit stakeholders (teachers, principals, college faculty/instructors, other)?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy mandate any other forms of evaluation and/or review not yet mentioned?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Required

Comments: Each campus is mandated to maintain a schedule of faculty review by students, under BoR Policy 705.3

How state enforces policies regarding quality assurance

No Mechanism Mentioned	General Mechanism	Specific Mechanism
X		

Comments: Reliance upon campus practices of mentoring, review, student evaluations, and other formal feedback on the faculty and the courses, as governed by the campus academic administration and faculty.

Finance and Resources

Does state policy provide ANY direct funding to the high school or college for dual credit?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: Per OPI, dual credit is the same as any other high school credit in the student transcript. Thus, the student credit hours for dual credit are also part of the high school student credit hours. The school funding is based in part upon the total student credit hours delivered.

Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: As noted on the dual credit application form, the tuition must generally be paid in full prior to the initiation of the course, though the responsible party is identified only if the student is age 18 or older and accepts that responsibility by virtue of applying.

Does state policy regulate who pays for books related to dual credit courses?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
X			

If state policy requires students/parents to pay, does state policy provide forms of financial support to students/parents?

No	Yes	Not Applicable
X		

Comments:

Does state policy allow (or disallow) high schools or colleges to collect full or partial funding for dual credit students (e.g., per ADA- or FTE-based formula)?

	None	Partial	Full	Not Applicable
High School			X	
College			X	

Comments: Per OPI, dual credit is the same as any other high school credit in the student transcript. Thus, the student credit hours for dual credit are also part of the high school student credit hours. The school funding is based in part upon the total student credit hours delivered.

Does state policy regulate faculty salary or compensation for teaching dual credit classes?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments: Campus policy on teaching loads would generally govern faculty salary payments, based upon in-load and extra-load considerations, rather than upon a course being dual credit.

Does state policy provide additional state financial incentives for institutional participation in dual credit not yet mentioned?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

How state enforces policies regarding finance and resources

No Mechanism Mentioned	General Mechanism	Specific Mechanism
	X	

Comments: Individual campus audits by the Legislative Audit Division, as well as periodic reviews by the campuses and occasionally by OCHE.

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency
	X	

Comments: Statutory authority is given to the Community College System of New Hampshire to grant college credit for CCSNH college courses.

Terms and Definitions

Term	Definition
Running Start Program	The Running Start program is a concurrent enrollment program that provides high school students with the opportunity to earn college credit while also completing the requirements for high school graduation. The Running Start program is a partnership between the community colleges of New Hampshire and high schools that enables high school students to take college courses and earn college credits at their high school, during the regular school day.
Term for H.S. Located DC	Running Start

Domain:	Statewide
Prescriptiveness:	Required

Comments:

Types of Parameters

	Subject Matter	Number of Courses	Statewide Transfer	Statewide General Educ.	Other
Mentioned:	Yes	No	No	No	No
Domain:	Statewide				
Prescriptiveness:	Required				

Comments:

Subject: Courses taught via the Running Start program are credit-bearing courses. Remedial or other non-credit bearing courses are not permissible in the Running Start program.
Transfer: While no college/university can guarantee the transfer of credit, a survey conducted of alumni students shows that a majority of postsecondary institutions in the U.S. grant either elective or required credit for courses. It is important for students to contact the universities/colleges that they would like to attend, to verify how each school handles transfer credits. Policies vary by institution and state. Policies may also vary by academic department within a postsecondary institution.

	X		

Does state policy dictate whether or not college students can enroll in dual credit classes in the high school?

Not Mentioned	Allowed	Discouraged	Prohibited
X			

Other Comments

Grade Level: Course offerings are restricted to juniors and seniors. Exceptions to this policy require prior approval from the appropriate college faculty department head. Further restrictions may apply as determined by the college. For information regarding eligibility requirements of a specific course, contact the high school guidance counselor.

Mix NonDC: There will be a minimum of four (4) students registered in a class for it to run for college credit. Exceptions can be made at the discretion of the college in conjunction with the high school. In a case where there are mixed students in a class, the course will run as a college course.

Registration Timing: To register for college credit, students must complete a registration form, have it signed by a parent or guardian, and submit it with payment by the specified deadline. Students cannot retroactively enroll in a college course.

Other Comments

Teacher Elig.: High school faculty teach the courses. These teachers meet or exceed the hiring qualifications for CCSNH faculty, and are partnered with a CCSNH faculty member. Exceptions may be made by the college if an individual can show equivalent academic and/or work or teaching experience. Additionally, exceptions may be made by the college for a temporary appointment based on unusual circumstances as defined by the college.

Selection: High school faculty credentials must be reviewed and approved by the CCSNH college.

Waivers: If a CCSNH college reviews the credentials of a high school faculty member who has applied to be a Running Start teacher, and concludes that the faculty member does not meet CCSNH credentialing standards, the Principal of the high school or the Director of the Career & Technical Education Center (CTE) may make a formal, written appeal to the CCSNH college's VPAA for reconsideration. The VPAA will, in turn, bring the matter to the System VPAA Council which will review the credentials of the high school teacher and any other documentation provided by the high school/CTE center in its appeal. However, final decision-making authority will remain with the VPAA who brought the matter forward

Comments: 18A:61C-3. Rules, regulations

3. The Department of Education and the Commission on Higher Education each shall adopt, pursuant to the "Administrative Procedure Act," P.L.1968, c.410 (C.52:14B-1 et seq.), rules and regulations necessary to implement the provisions of this act.

Terms and Definitions

Term	Definition
18A:61C-1. College-level instruction for high school students	<p>1. The Commissioner of Education, the Commission on Higher Education, in consultation with the Presidents' Council, shall establish a program to promote increased cooperation between the State's high schools and institutions of higher education. The objective of this program shall be to increase the access of our State's able high school students to the educational resources available in our institutions of higher education. This program shall supplement the efforts of local school districts to provide appropriate education to their students and shall not relieve a district of any obligation established by statute or regulation.</p> <p>The program shall increase the availability of college-level instruction for high school students through courses offered by institutions of higher education at their campuses and in high schools. The program shall seek the involvement of all institutions of higher education, two-year and four-year, public and nonpublic, and all school districts, including those which are not located in close proximity to an appropriate institution of higher education.</p> <p>L.1986,c.194,s.1; amended 1994,c.48,s.75.</p>
12th Grade Initiative	This term applies to courses offered at both the high school and community colleges.

Comments:

Does state policy allow (or disallow) high schools or colleges to collect full or partial funding for dual credit students (e.g., per ADA- or FTE-based formula)?

	None	Partial	Full	Not Applicable
High School			X	
College			X	

Comments: Yes. It is possible that the college and the high school both get funding for the same student. However, most community colleges have arrangements with the high schools in their counties regarding this issue, and those arrangements dictate which provider (college or high school) can claim the student as attending (high school) or as part of the FTE (college). Yes. It is possible that the college and the high school both get funding for the same student. However, most community colleges have arrangements with the high schools in their counties regarding this issue, and those arrangements dictate which

provider (college or high school) can claim the student as attending (high school) or as part of the FTE (college).

Dual Credit Student Fag
Higher Education Department And Public Education Department Alignment Task Force "Aligning New Mexico'S High School Competencies With College Placement Requirements"

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency	Comments:
		X	New Mexico Public Education Department and the Dual credit council. (NMAC 6.30.7)

Terms and Definitions

Term	Definition
Dual Credit	<p>"Dual Credit courses are college courses taken for both high school and college credit while you are in high school. The courses need to be approved by both your high school and the college where you want to take courses, so check with your high school counselor first.</p> <p>Courses must be able to apply toward a postsecondary degree or certificate program. Remedial and developmental courses at the college may not be taken for Dual Credit, since they do not count toward a degree or certificate program" (NMPED)</p>
Concurrent Enrollment	<p>"How is Dual Credit different from concurrent enrollment?</p> <p>There are a few differences. Public* and BIE-funded school students do not pay tuition or for textbooks for Dual Credit courses. Dual Credit courses guarantee you both high school and college credit for successful completion. Concurrent enrollment may result in a student earning college credit while in high school, but not necessarily result in a student earning high school credits. In some cases, your high school may give you high school credit for concurrent enrollment college classes that you pay for on your own. Check with your high school counselor" (NMPED)</p>
IDEAL-NM	IDEAL-NM stands for Innovative Digital Education and Learning in New Mexico. IDEAL-NM provides eLearning services to New Mexico P-12 schools, colleges and universities and government agencies
Term for H.S. Located DC	Dual Credit

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year
X	X	X	X

Comments: To what extent can districts sign Dual Credit agreements with multiple postsecondary institutions? Districts may sign agreements with the community college assigned to their Geographic Area of Responsibility (GAR) and any four-year institution for face-to-face classes. Community colleges offering Dual Credit to districts within the service area have the first right of refusal for Dual Credit courses. If the district wishes to provide Dual Credit courses through distance learning the district may sign agreements with any institution of higher education eligible to participate in the Dual Credit program, regardless of the location of that institution. See the Geographic Areas of Responsibility administrative rule, 5.2.4 NMAC.

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Encouraged
-----------	------------

Comments: By 2008-2009, each district shall offer a program of courses for dual credit, in cooperation with an institution of higher education, and a program of distance learning courses. "District" means public school districts, charter schools and state-supported institutions. By 2009-2010, students entering grade 9 must earn at least one credit as an: honors, advanced placement, dual credit, or distance learning course during their high school years in order to graduate. See SB561: High School Redesign (2007) (Dual Credit Committee FAQ) Are all high school students eligible for Dual Credit?
As noted in 6.30.7.8 New Mexico Administrative Code (NMAC), "...the state will provide equal opportunities to all public high school students who wish to participate in the Dual Credit program". It is up to the district and college/university administrators to determine the academic standing of eligible Dual Credit students based on their IEP or Next Step Plan, readiness and academic/career goals. Some courses may require attainment of a minimum score on the college's placement test. Of course, eligibility is also subject to fiscal limitations, as well as any limitations or restrictions set out in the Dual Credit rule (6.30.7 NMAC) and statute (21-1-1.2 NMSA 1978).

Does state policy set parameters on the types of courses that colleges can or cannot offer or provide?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: NMAC 6.30.7.11 ELIGIBLE COURSES.
A. Types of courses.
(1) College courses that are academic or career technical and that simultaneously earn credit toward high school graduation and a postsecondary degree or certificate shall be eligible for dual credit. Remedial, developmental and physical education activity courses are not eligible for dual credit.
(2) Courses taken for audit are not eligible for dual credit.
(3) Dual credit courses may be taken as elective or core course (except physical education activity course) high school credits.

Other Comments

Grade Level: According to the North Dakota Century Code regarding dual-credit courses, high school sophomores, juniors and seniors are eligible to receive high school and post secondary credit for the successful completion of an academic course offered by any postsecondary institution in a program accredited by a national or regional accrediting organization recognized by the United States department of education. NDUS policy 402.3.2 Delivery of Dual-Credit College Courses

Exam Scores: Dual credit students must provide proof of passing scores on national standardized examinations (ACT, SAT, Plan, Compass, or Accuplacer) for placement into College Algebra and College Composition I. Several standardized examinations and minimum scores fulfill this requirement. See attached NDUS Procedure 402.1.2 Admission Policies- Student Placement into College Courses.

Pre-reqs: See use of national standardize scores, as pre-requisites, for placement into College Algebra and College Composition detailed above.

Mix NonDC: This topic may need to be further addressed in the state of ND. ND often uses the term "blended" courses to describe a classroom where some students are enrolled for college credit and others are only enrolled for high school credit. Small rural schools indicate that without blending, they would not have sufficient enrollment to offer dual credit courses./And from response to #19: All students enrolled in a course that is available as a dual-credit college course taught within a high school will be expected to meet the academic requirements of the course irrespective of whether the

student enrolls for college credit or not.

NDUS policy 402.3.2 Delivery of Dual-Credit College Courses

Registration Timing: Submission of the dual credit application for approval to the Department of Public Instruction must occur prior to the start of each semester. Late applications will be accepted to reflect enrollment changes at the start of a high school semester in a dual credit class taught in the high school.

Enrollment applications for dual credit must be submitted to the NDUS college/university offering the course within the first ten days of the beginning of the semester in which the dual credit course is offered. The NDUS Common Calendar should be used to reference semester starting dates. NDUS policy 402.3.2 Delivery of Dual-Credit College Courses

Other: Before enrolling in a course for credit, the student must obtain written permission from the student's school district superintendent and the university for which college credit will be granted.

ND Century Code 15.1-25-02

Parental permission is also required for students under the age of 18.

How state enforces policies regarding who can take dual credit courses

Other Comments

Teacher Elig.: As is the case with all adjunct instructors, the instructor offering the course must be approved by the academic administrators using the same criteria and procedure that they would employ on campus. Approved high school instructors teaching dual-credit courses within the high school are considered to be adjunct instructors of the sponsoring NDUS college or university.

NDUS policy 402.3.2 Delivery of Dual-Credit College Courses

Degree: Preference for teachers holding an MA degree in the content area will be only one criterion considered in the employment of adjunct instructors to teach dual-credit college courses.

NDUS policy 402.3.2 Delivery of Dual-Credit College Courses

HS Credential: In accordance with the provisions of the North Dakota Century Code, dual-credit courses are considered as post-secondary courses and are exempt from any statutory or regulatory provisions otherwise applicable to high school courses and to the persons by whom high school courses are taught. Therefore, college faculty may teach college courses in a high school for which high school credit is granted (per the district superintendent's approval) without having state secondary certification.

NDUS policy 402.3.2 Delivery of Dual-Credit College Courses

Subject Exp.: The instructor offering the course must be approved by the academic administrators using the same criteria and procedure that they would employ on campus. Approved high school instructors teaching dual credit courses within the high school are considered to be adjunct instructors of the sponsoring NDUS college or university.

NDUS Procedure 402.3.2 Delivery of Dual Credit College Courses

Selection: Instructors who teach dual credit courses for a NDUS sponsoring institution must follow the standard procedure regarding the employment of adjunct instructors by that institution including

filing required documents, e.g., official transcripts, employment forms, etc. NDUS Procedure 402.3.2 does indicate that "the instructor offering the course must be approved by the academic administrators using the same criteria and procedure that they would employ on campus. (Last sentence from question #26 comment box)
 Prof. Devel.: Institutions shall provide high school instructors with an orientation in course curriculum, assessment methods, and administrative requirement before high school instructors are permitted teach dual credit courses AND Dual credit instructors must be given the opportunity to participate in all activities available to other adjunct faculty... Not Mentioned	NACEP or State Alt. Encouraged	NACEP or State Alt. Required
X		

Comments:

Does state policy provide incentives for accreditation?

No	Yes
X	

Comments:

Does state policy require annual (or other regular) reports on dual credit activities?

Not Mentioned	Overall Report Required	For Special Programs	Both
	X		

Comments: Both the North Dakota University System and the North Department of Public Instruction maintains a log of dual credit applications and reports the number of high school students enrolled in college coursework fall semester.
 See page 17 of the Fall 2011 NDUS Enrollment Report: <http://www.ndus.edu/uploads/reports/95/fall-2011-enrollment-report--5-12.pdf>

Aside from state-policy required reporting, is there any ad hoc or recurring reporting on dual credit for the legislature?

Not Mentioned	Overall Report Required	For Special Programs	Both
	X		

Comments: The North Dakota Department of Public Instruction also tracks dual credit enrollment, participating high schools, and subject areas for which high school students enroll each semester.

Does state policy require students to obtain a minimum grade to receive college credit for the course?

Not Mentioned	College Criteria	Statewide Criteria
X		

Comments:

Does state policy regulate dual credit course quality or rigor? In other words, does state policy explicitly reference course designs, outcomes, assessments, learning outcomes, course expectations, or other dimensions related to course quality or rigor?

Not Mentioned	College Criteria	Statewide Criteria
	X	

Comments: To ensure that college course standards are adhered to, the NDUS college/ university course syllabus will be provided to the instructor and be used as the criteria and model for all such dual-credit college courses taught in the high school.

 In most cases, this will mean the use of the same (or equivalent) text materials and similar evaluation criteria to include institutional exams if need be.

 The dual-credit course must meet the minimum number of clock-hours required for granting college credit in accordance with Carnegie standards. In most cases, high school periods meeting for 50 minutes, five days per week during a 16 week semester will exceed these requirements.

All students enrolled in a course that is available as a dual-credit college course taught within a high school will be expected to meet the academic requirements of the course irrespective of whether the student enrolls for college credit or not.

Does state policy regulate the student registration or transcripting processes requirements (e.g., course transcription, articulation, or student rights and responsibilities)?

Not Mentioned	College Criteria	Statewide Criteria
		X

Comments: Registration and approval for the dual credit class must occur at the start of each semester.

Enrollment applications for dual credit must be submitted to the NDUS college/university offering the course within the first ten days of the beginning of the semester in which the dual credit course is offered. The NDUS Common Calendar should be used to reference semester starting dates.

NDUS policy 402.3.2 Delivery of Dual-Credit College Courses

Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: North Dakota University System 402.3.2 Delivery of Dual-Credit College Courses

Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: High school students enrolled in dual-credit college courses and seeking NDUS college credit regardless of class location will be permitted to use the resources of the sponsoring college/university, i.e., computer labs, library, etc., as any part-time student would.

NDUS policy 402.3.2 Delivery of Dual-Credit College Courses

Does state policy mandate that dual credit courses appear in the offering institution's catalog?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: Dual credit courses taught in high schools carry the same college credit as the similar course taught on the campus of the NDUS sponsoring institution and will not have a special designation on the transcript as a dual credit course.

Code3313.6013

(B) Each city, local, exempted village, and joint vocational school district and each chartered nonpublic high school shall provide students enrolled in grades nine through twelve with the opportunity to participate in a dual enrollment program. For this purpose, each school district and chartered nonpublic high school shall offer at least one dual enrollment program in accordance with division (B)(1) or (2) of this section, as applicable.

(1) A city, local, or exempted village school district meets the requirements of this division through its mandatory participation in the post-secondary enrollment options program established under Chapter 3365. of the Revised Code. However, a city, local, or exempted village school district may offer any other dual enrollment program, in addition to the post-secondary enrollment options program, and each joint vocational school district shall offer at least one other dual enrollment program, to students in good standing, as defined by the partnership for continued learning under section 3301.42 of the Revised Code as it existed prior to the effective date of this amendment or as subsequently defined by the department of education.

(2) A chartered nonpublic high school that elects to participate in the post-secondary enrollment options program established under Chapter 3365. of the Revised Code meets the requirements of this division. Each chartered nonpublic high school that elects not to participate in the post-secondary enrollment options program instead shall offer at least one other dual enrollment program to students in good standing, as defined by the partnership for continued learning under section 3301.42 of the Revised Code as it existed prior to the effective date of this amendment or as subsequently defined by the department of education.

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency	Comments:
	X		Oklahoma state regents for higher education (OSRHE)

Terms and Definitions

Term	Definition
Concurrent Enrollment	"Concurrent enrollment" is the term used to describe high school student enrollment in college-level courses. Concurrent enrollment allows eligible high school students the opportunity to enroll in college-level courses concurrently with their high school curriculum and allows the student to achieve college credit through a collegiate experience.
Term for H.S. Located DC	There is no statewide differentiation

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year
X		X	X

Comments: OSRHE policy establishes the admission and retention standards for concurrent enrollment. Oklahoma §70-628.13 states that no institution of the Oklahoma State System of Higher Education shall deny enrollment in any course to any otherwise qualified high school student, or student of at least thirteen (13) years of age who is receiving high school level instruction at home, who meets the requirements of concurrent enrollment, nor shall any independent school district prohibit any student who meets the requirements of concurrent enrollment from participating. The OSRHE are the coordinating board for all state system public institutions.

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Required
-----------	----------

Comments: Oklahoma §70-628.13 states that no institution of the Oklahoma State System of Higher Education shall deny enrollment in any course to any otherwise qualified high school student, or student of at least thirteen (13) years of age who is receiving high school level instruction at home, who meets the requirements of concurrent enrollment, nor shall any independent school district prohibit any student who meets the requirements of concurrent enrollment from participating. Oklahoma §70-628.13 states State Board of Education shall take all necessary actions to ensure the availability of concurrent enrollment opportunities for students.

Does state policy set parameters on the types of courses that colleges can or cannot offer or provide?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments:

Types of Parameters

	Subject Matter	Number of Courses	Statewide Transfer	Statewide General Educ.	Other
Mentioned:	Yes	Yes	Yes	Yes	No
Domain:	Statewide	Statewide	Statewide	Statewide	
Prescriptiveness:	Required	Required	Required	Required	

Comments:

Subject: High school students participating in concurrent enrollment may not enroll in remedial/developmental courses and must have at least an ACT subject score of 19 to enroll in corresponding coursework [e.g., to enroll in college-level mathematics a student must have at least a mathematics ACT score of 19].
 Number: min=1
 Transfer: The OSRHE has a Course Equivalency Project (CEP) which is a postsecondary education resource service that provides course equivalency information to facilitate student transfer within the Oklahoma System of Higher Education. Its database contains faculty-generated course equivalency information for hundreds of courses offered at public institutions in Oklahoma and the courses are organized by discipline.

How state enforces policies regarding who can or must provide dual credit courses?

No Mechanism Mentioned	General Mechanism	Specific Mechanism
		X

Comments: Oklahoma §70-628.13 states that no institution of the Oklahoma State System of Higher Education shall deny enrollment in any course to any otherwise qualified high school student, or student of at least thirteen (13) years of age who is receiving high school level instruction at home, who meets the requirements of concurrent enrollment, nor shall any independent school district prohibit any student who meets the requirements of concurrent enrollment from participating.

Who Can Take Dual Credit Courses?

Does state policy regulate how students or parents learn about dual credit opportunities?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: Oklahoma §70-628.13 states the State Board of Education in cooperation with the OSRHE shall prepare promotional materials explaining the requirements, features, and opportunities of concurrent enrollment and shall ensure that the independent school districts distribute the materials to each student prior to enrollment for each year of high school.

Types of Regulations

	Grade Level	Age	GPA	Std Exams	Pre-Reqs	No. of Courses	Timing of Reg	Other	Waivers

Does state policy dictate whether dual credit classes can or cannot be mixed where some students are enrolled for college credit and others are enrolled only for high school credit?

Not Mentioned	Allowed	Discouraged	Prohibited
X			

Does state policy dictate whether or not college students can enroll in dual credit classes in the high school?

Not Mentioned	Allowed	Discouraged	Prohibited
			X

Other Comments

Grade Level: The student must be at least a high school junior.
 Age: Student must be at least 16 years of age or older if receiving high-school-level instruction at home or from an unaccredited high school.
 GPA: Students in their senior year of high school must have at least a 3.0 GPA and students in their junior year of high school must have at least a 3.50 GPA.
 Exam Scores: OSRHE policy does require that students have at minimum a 19 ACT subject score to enroll in the corresponding college-level course [e.g., 19 ACT mathematics score to enroll in college level mathematics, 19 ACT English score to enroll in English composition courses]. Required minimum scores by the state vary depending on postsecondary institutions.
 Pre-reqs: OSRHE policy does not mandate or require course pre-requisites, but institutions may have course pre-requisite requirements.
 Credits: Credit minima or maxima:
 A high school student may enroll in a combined number of high school and college courses per semester not to exceed a full-time college workload of 19 semester-credit-hours. A student may enroll in a maximum of nine semester credit-hours during a summer session or term at a college or university of the state system without the necessity of being concurrently enrolled in high school classes during the summer term.
 For purposes of calculating workload, one-half high school unit is equivalent to three semester-credit-hours of college work.
 College Stds.: The collegiate experience associated with concurrent enrollment is present in four environments [policy section 3.9.6.1.5]:
 a. High school students enrolled on a college or university campus in a course with collegiate students enrolled.
 b. High school students enrolled at an off-campus site in a course that originates on campus with collegiate students enrolled.

c. High school students enrolled in a course with collegiate students enrolled at an established off campus site with a regular program of study (defined as at least one certificate, associate in arts, associate in science, associate in applied science or baccalaureate degree).
 High school students enrolled at other off campus sites (including in the home and including the use of synchronous or asynchronous instruction) and taught by regular faculty whose primary educational employment is as a faculty member at the institution delivering the course.

How state enforces policies regarding who can take dual credit courses

No Mechanism Mentioned	General Mechanism	Specific Mechanism
		X

Comments: Students must meet admission and retention standards to participate in concurrent enrollment.

Who Can Teach Dual Credit Courses?

Does state policy regulate who can teach dual credit courses?

Mentioned:	Yes

Degree: The degree-level requirement for dual credit faculty is the same requirement for all faculty.
 Subject Exp.: High school teachers teaching college-level courses on the high school campus must be eligible to be regular faculty. Regular faculty is defined as a person qualified for appointment to the full-time faculty of the institution proposing to award credit. All appointments must be recommended by the academic unit awarding the credit and approved through the established procedures for academic appointments.
 A majority of the faculty in undergraduate degree programs should hold degrees at least one level above that of the programs in which they teach. It is also expected that an institution will employ faculty members whose highest degrees are from regionally accredited institutions. In exceptions to this standard, institutions must show evidence that their faculty members have appropriate academic preparation.

Degree: Masters degree for instructors of Lower Division Collegiate courses; and Appropriate education and experience for instructors of professional technical courses.

Selection: Faculty qualification must be in line with the State of Oregon and regional accreditation requirements. For community colleges the following is state rule:
Oregon Administrative Rule 589-008-0100
(1) Each community college Board of Education shall establish a personnel policy statement, including a policy on instructor selection and development that must include, but need not be limited to, the following:
(b) Institutional standards for instructor qualifications (standards for teachers of lower division collegiate courses must include a masters degree in a subject area closely related to that in which the instructor will be teaching; however in subject areas in which individuals have demonstrated their competencies and served in professional fields and in cases in which documentation to support the individual's proficiency and high level of competency can be assembled, the master's degree requirement may be waived at the discretion of the college president);

Prior Training: "The post secondary institution provides high school instructors with training and orientation in course curriculum, assessment criteria, course philosophy, and dual credit administrative requirements before certifying the instructors to teach the college/university courses." (Dual Credit Program Standard Faculty 2)
Prof. Devel.: "Instructors teaching dual credit sections are part of a continuing collegial interaction, through professional development, seminars, site visits, and ongoing communication with the post-secondary institutions' faculty and dual credit administration. This interaction addresses issues such as course content, course delivery, assessment, evaluation, and professional development in the field of study." (Dual Credit Program Standard Faculty 3)

Comments: "College or university courses administered through a dual credit program are recorded on the official academic record for students at the sponsoring college or university." (Dual Credit Program Standard Curriculum 2)

Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: Although practice is not mandated, the provision of access to the resources is required through the program approval standards.

Does state policy mandate that dual credit courses appear in the offering institution's catalog?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: College or university courses administered through a dual credit program are catalogued courses and approved through the regular course approval process of the sponsoring college or university. These courses have the same departmental designation, number, title, and credits as their college counterparts, and they adhere to the same course descriptions." (Dual Credit Program Standard Curriculum 1)

Does state policy include requirements for classroom visitation by college faculty?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: "Instructors teaching dual credit sections are part of a continuing collegial interaction, through professional development, seminars, site visits, and ongoing communication with the post-secondary institutions' faculty and dual credit administration. This interaction addresses issues such as course content, course delivery, assessment, evaluation, and professional development in the field of study." (Dual Credit Program Standard Faculty 3)

Does state policy include other requirements for high school and college faculty to meet or interact?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy regulate who at the postsecondary institutions has oversight for faculty credentials and faculty eligibility requirements (e.g., academic departments, dean or chief academic officer, human resources, etc.)?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: Although it is not a specific policy, the program approval standards do reference academic departments and the statement of assurance must be from a chief academic officer.

Does state policy require the monitoring of outcomes or impacts at any level?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments: Beginning with the 2014-15 school year the following will be required by law:
Each school district, community college and state institution of higher education within the Oregon University System that provides a dual credit program shall submit an annual report to the Joint Boards of Education on the academic performance of students enrolled in a dual credit program. The Joint Boards of Education shall establish the required contents of the report, which must provide sufficient information to allow the Joint Boards of Education to determine the quality of the dual credit program.

Does state policy require surveys of dual credit stakeholders (teachers, principals, college faculty/instructors, other)?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy mandate any other forms of evaluation and/or review not yet mentioned?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: The combination of Documentation/Evidence and Program Highlights provide information to create an overview of the proposed program. Items highlighted as "Essential" are considered necessary by the Education Specialists and the Dual Credit Oversight Committee who affirm that the Dual Credit program standards have been met.

1. Dual credit program manual, guidebook, handbook, etc. — Essential
2. Dual credit program student handbook, guidebook, etc. — Essential
3. Three examples of course outlines and course descriptions (both secondary and postsecondary as a point of comparison) — Essential
4. Three examples of course syllabi — Essential
5. Example of orientation, faculty-to-faculty meetings/trainings agenda, and documentation of approval to teach
6. Additional documents that may be of use as determined by the college program"

How state enforces policies regarding quality assurance

No Mechanism Mentioned	General Mechanism	Specific Mechanism
	X	

Comments: In Oregon the specific monitoring of course quality is determined by the faculty at each institution through collegial interaction, professional development, and technical assistance. This component is required in the program approval process.

Finance and Resources

Does state policy provide ANY direct funding to the high school or college for dual credit?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: Institutions are eligible for state reimbursement for students enrolled in courses.

Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: Depending on the pricing policies of the postsecondary partner, students may be assessed an application fee and they pay either nothing or deeply discounted tuition per credit hour. The Oregon Department of Education administers a grant program assisting students in paying for books, materials and other costs, other than test fees, related to accelerated college credit programs.

Does state policy regulate who pays for books related to dual credit courses?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs

Grade Level: "According to SD Codified Laws 13-28-37, "Any student in grades ten, eleven, or twelve may apply to an institution of higher education or a postsecondary vocational education institution as a special student in a course or courses offered at the institution of higher education or postsecondary vocational education institution." However, the board of regents' internal policies require students to be juniors or seniors to take dual credit courses.

GPA: While there is no statewide policy, the board of regents' internal policies require GPA of 2.0 or satisfactory academic standing.

Exam Scores: While there is no statewide policy, the board of regents' internal policies require the followings: "(1) meet undergraduate admissions requirements (ACT or coursework); (2) if a high school senior, rank in the upper one-half of their class or score at or above the 50th percentile on a nationally standardized, norm-referenced test, such as the ACT or SAT; or (3) if a high school junior, rank in the upper one-third of their class or score at or above the 70th percentile on a nationally standardized, norm-referenced test, such as the ACT or SAT."

Pre-reqs: While there is no statewide policy, the board of regents' internal policies require course prerequisites: "Students enrolled in dual credit courses must meet all pre-requisites. For example, students wishing to enroll in entry level math or English courses are held to the same placement requirements as all other students."

Mix NonDC: All students in a dual enrollment course should be enrolled for college credit. However, since meeting this standard is a problem for the state's smaller school districts, at a minimum more than 50% of the students in a high school-based dual enrollment course must be enrolled for college credit.

Other: The student shall obtain the school district's approval of the postsecondary course or courses prior to enrolling and the students must be admitted to the institution.

How state enforces policies regarding who can take dual credit courses

No Mechanism Mentioned	General Mechanism	Specific Mechanism
	X	

Comments:

There are no enforcement activities at the state level. Within the Regental system of public universities, occasional reports are made available to the Board and Board staff routinely audit institutional performance.

Dual Credit And Dual Enrollment

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency	Comments:
		X	The state board of education and the governing board of the postsecondary institution

Terms and Definitions

Term	Definition
Dual Enrollment	A postsecondary course, taught either at the postsecondary institution or at the high school, by the postsecondary faculty (may be credentialed adjunct faculty), which upon successful completion of the course allows students to earn postsecondary and secondary credit concurrently. The student must meet dual enrollment eligibility under Tennessee Board of Regents (TBR) and University of Tennessee (UT) policies.
Dual credit	A postsecondary course or a high school course aligned to a postsecondary course that is taught at the high school by high school faculty for high school credit. Students are able to receive postsecondary credit by successfully completing the course, plus passing the assessment developed and/or recognized by the granting postsecondary institution. The credit earned is held in escrow; the postsecondary institution grants the credit upon enrollment by the student.
Term for H.S. Located DC	Dual Enrollment

Finance and Resources

Does state policy provide ANY direct funding to the high school or college for dual credit?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: TN's outcomes-based funding formula includes dual enrollment/dual credit activity as an outcome for community colleges (see tn.gov/thec; "Presentation on Outcomes Model" and "2012-13 Outcomes Formula Model" Excel file). Also, students who trigger the funding formula's student progression outcomes (e.g. 12, 24 and 36 credit hours at a community college) would be included in the institutional outcomes total.

Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: Student tuition and fee charges for a dual credit course would be the same as any other course, with charges varying by institution. Students (and/or their families) are responsible for these costs.

Does state policy regulate who pays for books related to dual credit courses?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
X			

If state policy requires students/parents to pay, does state policy provide forms of financial support to students/parents?

No	Yes	Not Applicable
	X	

Comments: Eligible students can receive \$300 per dual enrollment course, up to a cumulative four courses in junior and senior years of high school; however, this assistance does not cover the full expense tied to tuition and/or book/lab fees.

Does state policy allow (or disallow) high schools or colleges to collect full or partial funding for dual credit students (e.g., per ADA- or FTE-based formula)

	None	Partial	Full	Not Applicable
High School			X	
College				X

Comments: Student FTE does not impact state appropriations to higher education institutions in Tennessee. See tn.gov/thec; "Presentation on Outcomes Model" and "2012-13 Outcomes Formula Model" Excel file.

Does state policy regulate faculty salary or compensation for teaching dual credit classes?

Mentioned:	No
Domain:	
Prescriptiveness:

Prescriptiveness:	Required		Encouraged	Encouraged	

Comments:

Subject: Courses offered for dual credit by public two-year associate degree granting institutions must be identified as college-level academic courses in the current edition of the Lower Division Academic Course Guide Manual adopted by the Board or as college-level workforce education courses in the current edition of the Workforce Education Course Manual adopted by the Board. Public colleges may not offer remedial and developmental courses for dual credit. State funding is not available for physical education courses offered for dual credit. See all the rules in Chapter 4, Subchapter D, Section 4.85

Transfer: Texas does not have a specific policy about dual credit courses connecting to statewide transfer articulation, but it does have a state policy related to transfer of "core" academic courses to public four-year institutions. Since the majority academic dual credit courses are "core courses," the policy clearly impacts dual credit course articulation. See CB Rules Chapter 4, Subchapter B.

Gened: See CB Rules Chapter 4, Subchapter B sections related to core courses (these rules do not specify dual credit courses; however, many dual credit courses taken at Texas public colleges are core courses so the rules apply)

Grade Level: Junior

Exam Scores: In order to take dual credit courses, students must be ready for college-level work, as evidenced by their performance on a THECB-approved assessment, such as the Texas Assessment of Knowledge and Skills (TAKS), the SAT, the ACT, or one of several tests allowed under the Texas Success Initiative (TSI) such as the Texas Higher Education Assessment (THEA) test (TAC, Title 19, Part I, Chapter 4, Rule 4.85(b)). Dual credit eligibility standards are higher for academic dual credit than for technical dual credit.

More specifically, the state specifies that students must meet testing standards on SAT/ACT/PSAT/PLAN/TAKS/ACCUPLACER/ COMPASS/ ASSET/ or THEA (The Texas Higher Education Assessment). This list will change beginning in fall 2013.

Credits: Credit minima or maxima: 2 courses a semester except as described below or for students in early college high schools.

Students can take more than 2 courses when they demonstrate the “outstanding academic performance and capability” that would enable them to handle a heavy college course load without detriment. (see THECB Rule 4.85)

Waivers: Younger students may enroll only if allowed by the terms of the MOU, and in such cases, they must demonstrate “outstanding academic performance and capability” and must be approved for enrollment by the chief academic officer of the college and the principal of the high school (TAC) 4.85(b)(6)). Policy for Early College High Schools students is outlined in Rule 4.161 B, which states “(b) An MC or an ECHS that has notified the Commissioner in accordance with §4.154 of this title (relating to Notification of Institutional Intent to Develop an Early College High School/Middle College Entity) may allow its eligible students to enroll in more than two dual credit courses per semester. An ECHS may allow its eligible students to enroll in dual credit coursework with freshman, sophomore, junior, or senior high school standing”

Not Mentioned	Allowed	Discouraged	Prohibited
	X		

Other Comments

Pre-reqs: The Community College of Vermont requires high school students to complete an Intro to College Studies course before allowing a high school student to enroll in a credited course. It has had a dramatic impact on readiness and minimized the risk of students withdrawing or failing.

College Stds.: Indirectly, yes it is limited for college students to take courses in high school, because there are only limited circumstances where a high school program could offer college credit. It is the practice of participating colleges to have students take classes on campus at the college, so they get the full college experience. The only exception that we are aware of is the Fast Forward Program which allows some students enrolled in Technical Centers to receive college credit for their course work.

Waivers: There are no eligibility requirements in state policy. Eligibility requirements are set by participating colleges.

Finance and Resources

Does state policy provide ANY direct funding to the high school or college for dual credit?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
			X

Comments: The state appropriates revenue to the Vermont State Colleges. The five colleges in the system and seven other partners agree to accept the per credit cost of a CCV course for high school enrollees. That is a policy set by the VSC.
In the VAST program, the state education fund pays 80% of the state per-student disbursement to local districts to the Vermont Technical College for high school students who enroll full time at Vermont Tech.

Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
X			

Comments: In the Fast Forward program, tech center students are charged a \$100 fee.

Does state policy regulate who pays for books related to dual credit courses?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
X			

If state policy requires students/parents to pay, does state policy provide forms of financial support to students/parents?

No	Yes	Not Applicable
X		

Comments: In the Fast Forward program, fee waivers are readily available.

Does state policy allow (or disallow) high schools or colleges to collect full or partial funding for dual credit students (e.g., per ADA- or FTE-based formula)

	None	Partial	Full	Not Applicable

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency
X		

Comments: The State Council of Higher Education for Virginia (SCHEV) is a coordinating body, but does not have statutory or regulatory oversight.

Terms and Definitions

Term	Definition
Dual Enrollment	From the VCCS/VDOE Plan for Dual Enrollment: Broadly speaking, dual enrollment allows high school students to meet the requirements for high school graduation while simultaneously earning college credit. The Virginia Plan for Dual Enrollment gives a statewide framework for dual enrollment arrangements between public schools and community colleges. These arrangements may be made at the local level, i.e., between the representatives or boards of the participating public school and the participating community college authorized to contract such arrangements. These arrangements may be formed in three distinct ways. First, high school students may be enrolled in the regularly scheduled college credit courses with other college students taught at the community college. Second, high school students may be enrolled in specially scheduled college credit courses exclusively for high school students taught at the high school. Third, high school students may be enrolled in specially scheduled college credit courses exclusively for high school students taught at the community college.
Term for H.S. Located DC	Dual Enrollment

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year
X		X	

Comments: House Bill 1184 was approved by the governor in April, 2012 and requires local school boards and community colleges to develop agreements allowing high school students to complete an associate's degree or a one-year Uniform Certificate of General Studies from a community college concurrent with a high school diploma. See full HB1184 details at: <http://leg1.state.va.us/cgi-bin/legp504.exe?121+sum+HB1184> The Virginia Community College System (VCCS) has an agreement with Virginia Department of Education (VDOE) that addresses dual enrollment between Virginia's community colleges and public secondary schools. However, there is no state policy prohibiting four-year institutions from offering dual enrollment and, in fact, there are four-year institutions in Virginia that are currently offering dual enrollment courses.

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Not Specified
-----------	---------------

Comments: House Bill 1184 was approved by the governor in April, 2012 and requires local school boards and community colleges to develop agreements allowing high school students to complete an associate's degree or a one-year Uniform Certificate of General Studies from a community college concurrent with a high school diploma. Comments: The state does not regulate who can take dual credit courses. However, within the Virginia Community College System, colleges and the system office are required to meet requirements and policies set by the State Board for Community Colleges and are subject to their internal audit process

Who Can Teach Dual Credit Courses?

Does state policy regulate who can teach dual credit courses?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments: The VCCS/VDOE Plan for Dual Enrollment addresses the selection of faculty. For the full plan, go to: <https://www.vccs.edu/Portals/0/ContentAreas/AcademicServices/signed%20VA%20plan%20for%20dual%20enrollment%202008.pdf>. In addition, VCCS colleges must abide by the VCCS Policy Manual, which articulates Qualifications of Faculty in the VCCS-29. To view the VCCS-29, go to: <http://www.vccs.edu/FacultyStaff/HumanResources/HRForms/VCCSHR PoliciesforFaculty.aspx> and select "Teaching Qualifications (VCCS-29)." Dual enrollment faculty must adhere to the same standards as other adjunct faculty.

Types of Regulations

	Same as College Credentials	Specific Degree Level	Subject Degree or Min. Courses	Faculty Selection Process	Prior Training	Professional Development	Other Requirements	Waivers	High School Credential Required?

Domain:	Statewide	Statewide	Statewide	Statewide					
Prescriptiveness:	Required	Required	Required	Required					

Other Comments

Subject Exp.: The VCCS Policy Manual (VCCS-29) states the minimum criteria depending upon the field of instruction. Dual enrollment faculty must adhere to the same standards as other adjunct faculty. If the faculty member is teaching associate degree courses designed for transfer to a baccalaureate degree, they must have, at a minimum, a master's degree or a master's degree with 18 graduate semester hours in the teaching field. However, not all dual enrollment faculty fall into this category.

How state enforces policies regarding who can teach dual credit courses

No Mechanism Mentioned	General Mechanism	Specific Mechanism
		X

Comments: VCCS colleges are bound to the VCCS/VDOE Plan for Dual Enrollment and the policies within the VCCS Policy Manual. All VCCS college faculty qualifications must be met in order to maintain good standing with SACS and the State Board for Community Colleges.

Quality Assurance

Does state policy require any form of accreditation such as that offered by the National Alliance of Concurrent Enrollment Partnerships (NACEP)?

Not Mentioned	NACEP or State Alt. Encouraged	NACEP or State Alt. Required

X			

Comments:

Aside from state-policy required reporting, is there any ad hoc or recurring reporting on dual credit for the legislature?

Not Mentioned	Overall Report Required	For Special Programs	Both
X			

Comments:

Does state policy require students to obtain a minimum grade to receive college credit for the course?

Not Mentioned	College Criteria	Statewide Criteria
X		

Comments:

Dual enrollment students are bound to the same policies as traditional VCCS college students. The VCCS Policy Manual indicates that grades of A, B, C, D, P, and S are passing grades.

Does state policy regulate dual credit course quality or rigor? In other words, does state policy explicitly reference course designs, outcomes, assessments, learning outcomes, course expectations, or other dimensions related to course quality or rigor?

Not Mentioned	College Criteria	Statewide Criteria
	X	

Comments:

The VCCS/VDOE Plan for Dual Enrollment states that the community college has the responsibility to ensure that all dual enrollment courses taught are equivalent to other instruction offered by the college, specifically in terms of course objectives, components of the syllabi, level and rigor of content, evaluation of students, textbooks, student outcomes and assessment and faculty evaluation.

Does state policy regulate the student registration or transcripting processes requirements (e.g., course transcription, articulation, or student rights and responsibilities)?

Not Mentioned	College Criteria	Statewide Criteria
X		

Comments:

Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments:

The new House Bill 1184 requires local school boards and community colleges to develop agreements allowing high school students to complete an associate's degree or a one-year Uniform Certificate of General Studies from a community college concurrent with a high school diploma. In addition, the VCCS/VDOE Plan for Dual Enrollment states that dual enrollment agreements are partnerships between secondary and postsecondary entities, both of whom play essential roles in the educational pipeline. As such, the community college and public school division will collaborate to identify need and select dual enrollment course offerings available to students. Further, the community college will identify a coordinator of dual enrollment to serve as a liaison to high school students and their parents and facilitate meetings between college and high school stakeholders to discuss logistics.

Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

Grade Level: Opportunities for early enrollment are for students of junior and senior status in the high schools. Any exception must be approved by the institution's chief academic officer.

Exam Scores: Students must meet all courses requirement and prerequisites. Series 21, Freshman Assessment and Placement Standards, provides that students must have a minimum score on various standardized exams in order to enroll in a college math or English course. This policy would impact high school students enrolled in early entrance courses.

Pre-reqs: Students must meet all course requirements and prerequisites.

Mix NonDC: Attendance in college courses offered in high schools will be limited to those students registered for college credit.

Other: High school students desiring to enroll in a college credit-bearing course must apply for early enrollment admission status and meet all early enrollment admission requirements for the institution which is offering the college credit course. In addition to meeting these requirements, all students who enroll must have the approval of the high school principal.

Waivers: Opportunities for early enrollment are for students of junior and senior status in the high schools. Any exception must be approved by the institution's chief academic officer.

Selection: Faculty teaching early enrollment courses must meet the minimum faculty credential requirements as specified by the college and as approved by the department and chief academic officer of the college or university that will grant the credit.
 Faculty for these courses will be evaluated by college personnel using the same processes as for other college faculty.
 The institution granting college credit shall assign adjunct/part-time faculty status to high school teachers who teach college courses in the high school. Employment of any early enrollment adjunct/part-time faculty must be consistent with any institutional, statewide and regional accreditation standards for employment of adjunct/part-time faculty.

No	1 Agency	>1 Agency	Comments:
		X	WI Dept. of Public Instruction, University of WI System, WI Technical College System

Terms and Definitions

Term	Definition
Dual Credit, Dual Enrollment, Dual Admission, Dual or Concurrent Enrollment, Advanced Placement, Youth Options	On-site college courses attended by students while still attending a high school
College Credit in High School program (CCHS)	The College Credit in High School program (CCHS) is offered at the University of Wisconsin Oshkosh, Green Bay, Whitewater, La Crosse, and Eau Claire with a similar program offered at the University of Wisconsin River Falls. These programs provide academically able high school students an opportunity to earn college credits while still in high school. Qualified students may enroll in select college courses taught by university approved high school instructors. CCHS gives students a chance to experience the academic rigor of university course work while remaining with high school peers. CCHS helps to set students apart from other college applicants and gives them a jump start on a college career. It provides for on-site and on-line delivery of courses. Students are dual enrolled and are eligible to receive dual credit.
Advanced Standing	Advanced Standing may also be referred to as "credit in escrow" because the application of the credit is delayed until students enroll in a technical college program.
Transcripted Credit	Transcripted Credit may also be referred to as: "dual credit courses" as high schools also give credit; "direct credit" because students are earning technical college credit directly from the technical college.
Youth Options	The Youth Options program allows public high school juniors and seniors to take courses through the WTCS, the UW System, and participating private, non-profit, and tribally-controlled colleges in Wisconsin. The majority of Youth Options courses are offered on college campuses.
Term for H.S. Located DC	Transcripted Credit, Advanced Standing, College credit in high school program

What Institutions Can or Must Provide Dual Credit Courses?

To which institution types does state policy apply?

Public	Private	Two-Year	Four Year	Comments:

Does state policy require, encourage or just permit high schools to have dual credit opportunities available for its students?

Response:	Required	Comments:
		State Statute 118.34 (http://docs.legis.wi.gov/statutes/statutes/118/34) requires schools to establish a Technical Preparation Program; the statute includes the language "designed to allow high school pupils to gain advanced standing in the technical college district's associate degree program upon graduation from high school." This is the extent to which state policy requires dual credit opportunities.

Col. criteria: For College credit in high schools: "High school faculty who teach UW courses at participating high schools must have at least a Master's degree in the discipline in which the course is offered and shall have the specific approval of the appropriate university academic department." Degree: For College credit in high schools: "High school faculty who teach UW courses at participating high schools must have at least a Master's degree in the discipline in which the course is offered and shall have the specific approval of the appropriate university academic department." For advanced standing and transcribed credit: The requirements exist for getting a state public school teaching license (minimum of a bachelor's degree and, depending on license, grade level, and when obtained, certain required coursework). For Advanced standing: "Course is taught by a high school teacher who holds a current DPI license in the related area of instruction." For Transcribed credit: "Course is taught by a WTCS technical college instructor or a high school instructor who holds a current DPI license in a related area and has been given approval by WTCS to teach the course.

HS Credential: For Advanced standing: "Course is taught by a high school teacher who holds a current DPI license in the related area of instruction."

For Transcribed credit: "Course is taught by a WTCS certified technical college instructor or a high school instructor who holds a current DPI license in a related area and has been granted WTCS articulation certification under Wisconsin Administrative Code TCS 3.03(9)(b) ."

Subject Exp.: For advanced standing and transcribed credit: The requirements exist for getting a state public school teaching license (minimum of a bachelor's degree and, depending on license, grade level, and when obtained, certain required coursework).

Selection: High school faculty who teach UW courses at participating high schools must have at least a Master's degree in the discipline in which the course is offered and shall have the specific approval of the appropriate university academic department. The UW academic department responsible for the course may make an exception if the high school faculty member's Master's degree is in another related discipline. High school faculty selected shall meet all institutional and appropriate university departmental standards to qualify as an adjunct instructor.

Prior Training: For college credit in high schools: "UW System institutions should encourage regular professional interaction between university faculty and high school faculty involved in offering college courses in the high school. Such interactions may include: (1) regular, on-site visits by university faculty to review student work and ensure comparability of course work and grading standards; (2) professional development seminars for university and high school faculty in the content area; (3) training and preparation of high school faculty prior to the initial offering of a college-level course; and (4) encouraging high school faculty to enhance their academic preparation by, for example, taking additional graduate course work and joining professional organizations."

Prof. Devel.: For college credit in high schools: "UW System institutions should encourage regular professional interaction between university faculty and high school faculty involved in offering college courses in the high school. Such interactions may include: (1) regular, on-site visits by university faculty to review student work and ensure comparability of course work and grading standards; (2) professional development seminars for university and high school faculty in the content area; (3) training and preparation of high school faculty prior to the initial offering of a college-level course; and (4) encouraging high school faculty to enhance their academic preparation by, for example, taking additional graduate course work and joining professional organizations."

Waivers: For college credit in high schools: "The UW academic department responsible for the course may make an exception if the high school faculty member's Master's degree is in another related discipline"

Regulatory Oversight

Does the state grant statutory or regulatory oversight to one or more specific state agencies?

No	1 Agency	>1 Agency	Comments:
X			

Terms and Definitions

Term	Definition
Concurrent Enrollment	College courses taught by high school faculty who have been approved as community college adjunct faculty and who are teaching said course as part of their duties as a district employee. As such, these college courses simultaneously satisfy high school graduation requirements. These courses have been approved by one of the community colleges as having equivalent course content, learning objectives and work assignments as an existing college course. Course content and learning objectives are equivalent to the related community college course as determined by community college full-time faculty.
Dual Enrollment	College courses taught by college instructors to allow high school students to earn both high school and college credit while students are still attending high school. Credit is given to a qualified high school student who completes college-level courses for which one of the community colleges hires and pays the instructor and in which the high school district agrees to allow high school graduation credit.
Term for H.S. Located DC	Concurrent Enrollment

Comments:

The responsibility for the quality of college courses offered through dual enrollment and concurrent enrollment in Wyoming shall be vested in the higher education institutions. For concurrent courses, the higher education system shall require: 1. Wyoming secondary and postsecondary institutions to collaboratively address standards and curriculum locally, sequence key courses, and ensure that appropriate teaching and learning are used. 2. Classes taught in high schools to use the equivalent syllabi, assignments, and end-of-course assessments as those used in courses taught on campus. 3. The college faculty responsible for concurrent courses to collaborate with high school concurrent course teachers and review student work on a regular basis. 4. Colleges to review course agreements annually to assure quality.

Does state policy regulate the student registration or transcripting processes requirements (e.g., course transcription, articulation, or student rights and responsibilities)?

Not Mentioned	College Criteria	Statewide Criteria
X		

Comments:

Does state policy regulate the partnership activities or agreements between secondary and postsecondary institutions related to dual credit?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments:

(D) Assembling required articulation agreements between high schools and post secondary institutions pursuant to W.S. 21-20-201.”
 Consensus Agreement
 Consensus discussions that incorporate post secondary and secondary institution partners shall be used to develop a standard Memorandum of Understanding (MOU) that will address common and non-negotiable elements. This standard MOU will be made available to all partners statewide. Partners will annually review the standard MOU. Additional elements will be allowed to address institution practices as long as they comply with applicable law and the consensus group’s recommendations.
 The MOU will include, at a minimum, the definition of dual or concurrent enrollment; the purpose of the agreement; a process to approve faculty when applicable; student eligibility requirements; standards for enrollment in technical and transfer courses; a process for collaboration between secondary and postsecondary institutions; tuition and fees, textbooks; college resources; and a process for renewal of the agreement.

Does state policy mandate dual credit student access to student support services, library resources, or academic supports?

Mentioned:	Yes
Domain:	Statewide
Prescriptiveness:	Required

Comments:

Students will have access to all the standard support services that any college student has available.

Does state policy mandate that dual credit courses appear in the offering institution’s catalog?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy include requirements for classroom visitation by college faculty?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy include other requirements for high school and college faculty to meet or interact?

Mentioned:	Yes
Domain:	Local
Prescriptiveness:	Encouraged

Comments: Wyoming secondary and postsecondary institutions to collaboratively address standards and curriculum locally, sequence key courses, and ensure that appropriate teaching and learning are used.
The college faculty responsible for concurrent courses to collaborate with high school concurrent course teachers and review student work on a regular basis.

Does state policy regulate who at the postsecondary institutions has oversight for faculty credentials and faculty eligibility requirements (e.g., academic departments, dean or chief academic officer, human resources, etc.)?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy require the monitoring of outcomes or impacts at any level?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy require surveys of dual credit stakeholders (teachers, principals, college faculty/instructors, other)?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy mandate any other forms of evaluation and/or review not yet mentioned?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

How state enforces policies regarding quality assurance

No Mechanism Mentioned	General Mechanism	Specific Mechanism
X		

Comments:

Finance and Resources

Does state policy provide ANY direct funding to the high school or college for dual credit?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
X			

Comments:

Does state policy stipulate the amount of and responsibility for paying dual credit tuition and fees?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

Comments: By WS 21-20-201, if there is a concurrent and dual enrollment agreement, students cannot be charged. As required by Wyoming Statute 21-20-201, (d), "The school district and the university or community college district entering into an agreement for purposes of this section shall, if there are any fees within the agreement, establish fees to be assessed the school district for student participation under the program, the payment schedule for the established fees and other necessary arrangements to facilitate fee payment and

Does state policy regulate who pays for books related to dual credit courses?

No	Yes, broadly or overall	Yes, for specific programs	Both broadly and for specific programs
	X		

collection."
 Therefore, the school district agrees to pay the tuition for all students enrolled in concurrent enrollment based on the final class roster issued on or about midterm of the current semester. After the college receives the sum for students' tuition from the school district, the college agrees to pay an identical amount to that school district for space, supplies, instruction, and other related costs.

The high school is responsible for ensuring that textbooks and materials are available for these students. As required by Wyoming Statute 21-20-201(d), "Any textbooks, materials or equipment purchased under the established fees shall be addressed within the agreement entered into between the university or college and the school district. The university or community college shall not directly assess and collect any fee from the participating student for textbooks, materials, student services or any other fees otherwise assessed and collected from students attending the institution."

If state policy requires students/parents to pay, does state policy provide forms of financial support to students/parents?

No	Yes	Not Applicable
X		

Comments:

Does state policy allow (or disallow) high schools or colleges to collect full or partial funding for dual credit students (e.g., per ADA- or FTE-based formula)

	None	Partial	Full	Not Applicable
High School			X	
College				X

Comments: Full amount based on ADM (Average Daily Membership): A student participating in the program shall be counted within the average daily membership of the resident school district as defined under W.S. 21-13-101(a)(i) for school district funding and concurrently by the participating higher education institution for its full-time equivalent enrollment count.
 A portion of state funding based on shared credit hours: Credit hours are allowed to be used in the allocation of variable cost section of the community college funding formula. Direct per credit funding does not occur.

Does state policy regulate faculty salary or compensation for teaching dual credit classes?

Mentioned:	No
Domain:	
Prescriptiveness:	

Comments:

Does state policy provide additional state financial incentives for institutional participation in dual credit not yet mentioned?

Mentioned:	No
Domain:	
Prescriptiveness:

Dual Credit in U.S. Higher Education

Annotated Bibliography

Adelman, C. (2006). *The toolbox revisited: Paths to degree completion from high school through college*. U.S. Department of Education.

Examines the aspects of formal schooling that contribute most to students completing a bachelor's degree by their mid-20s. Based on a nationally representative cohort of students who attended a four-year college at any point of their academic career (including those who started at two-year colleges).

Allen, D. (2010). *Dual enrollment: A comprehensive literature review & bibliography*. The City University of New York, CUNY.

Provides a comprehensive review of recent research (2000-2010) on a core set of questions about dual enrollment (i.e., definitions and implementations of dual enrollment, the short-term outcomes of dual enrollment, the relationship between dual enrollment participation and college preparedness, access and success, the effects of dual enrollment on high schools and colleges, the major programing and policy questions, future research and policies).

An, B. P. (2009). *The impact of dual enrollment on college performance and attainment*. (Doctoral dissertation, University of Wisconsin-Madison).

Examines the effect of dual enrollment on college performance and attainment and compares dual enrollment and AP. Propensity score matching and endogenous switching regression models were applied based on data from the National Longitudinal Study of 1988. The study found positive impacts of dual enrollment on college outcomes (e.g., college credits earned, decreased likelihood for remediation, increased likelihood of completion). The study also explores benefits of dual enrollment for low and highSES students.

Andrews, H.A. (2004). Dual credit research outcomes for students. *Community College Journal of Research and Practice*, 28, 415–422.

Dual credit and dual enrollment programs are prevalent and growing across states (44 states have such programs). They are effective in mitigating the “wasted senior year.” Evidence of program effectiveness is generally positive (although not studied on a course-to-course basis). Generally taken advantage of by better students, so it's hard to separate effectiveness of programs from the selection issue.

Andrews, H.A. (2001). *The dual-credit phenomenon! Challenging secondary school students across 50 states*. Stillwater, OK: New Forums Press.

Suggests dual enrollment as a remedy to senioritis—the phenomenon that high school students consider their senior year a waste of time. Benefits of dual enrollment include: acceleration of progress for students; reduced tuition costs for students and parents; relief of high school boredom; and facilitated student recruitment.

Andrews, H.A. (2000). Lessons learned from current state and national dual-credit programs. *New Directions for Community Colleges, 111*, 31–39.

Explores ways to improve dual enrollment practices and concludes that dual credit can help high school students stay challenged and get ahead in their college work. Provides reviews of several states' (e.g., FL, IL, MO, ND, VA) responses to the concerns for the academic rigor of dual enrollment programs and implications for college administrators.

Bailey, T.R., Hughes, K.L., & Karp, M.M. (2002). *What role can dual enrollment play in easing the transition from high school to postsecondary education?* Paper prepared for the U.S. Department of Education, Office of Vocational and Adult Education. New York: Community College Research Center and Institute on Education and the Economy, Teachers College, Columbia University.

Presents the potentials of dual enrollment to improve preparation for college. The potentials include: (1) motivating students to take a more rigorous high school curriculum; (2) shifting the focus of occupational education to postsecondary institutions, while keeping such coursework available for high school students; (3) providing an early warning mechanism to signal whether students are prepared for college; and (4) acclimating students to a college environment while they are still in high school.

Bailey, T., & Karp, M.M. (2003). *Promoting college access and success: A review of credit-based transition programs*. Washington, DC: U.S. Department of Education, Office of Vocational and Adult Education.

Reviews 45 published and unpublished reports, articles, and books on the most common credit based transition programs (e.g., dual credit, AP, IB, Tech Prep and middle college high schools). Offers a typology (singleton, comprehensive, and enhanced comprehensive). Research on impact found to be at early stage with most studies not controlling for background characteristics but finding general positive effects.

Borden, V. M. H. & Bottrill, K. (1994). Performance indicators: History, definitions, and methods. In V. M. H. Borden & T. W. Banta (Eds.) *Using performance indicators to guide strategic decision making*. New Directions for Institutional Research, 82. San Francisco: Jossey-Bass.

Describes the history of performance indicator development through the U.S. and Europe and provides an 'input-process-output' organizing framework for developing and evaluating performance indicator systems.

Boswell, K. (2001). Dual enrollment programs: Accessing the academic dream. *Update on Research and Leadership, 13*(1), 1–3.

Considers dual/concurrent enrollment as one of the policy initiatives that seek to streamline the educational pipeline and ensure that students are better prepared for postsecondary education. Provides brief overviews of state policy approaches to dual/concurrent enrollment in Minnesota,

Washington, and Utah. Elicits greater cooperation between secondary, two- and four-year postsecondary institutions as a means to ensure more seamless education system.

Bragg, D.D., Kim, E., Barnett, E.A. (2006). Creating access and success: Academic pathways reaching underserved students. *New Directions for Community Colleges*, 135, 5-19. San Francisco, CA: Jossey-Bass.

Discusses results of a fifty-state study conducted through the Academic Pathways to Access and Student Success initiative, and identifies curricular approaches that increase opportunities for underserved students to attend college.

Burns, H., & Lewis, B. (2000). Dual-enrolled students' perceptions of the effect of classroom environment on educational experience. *The Qualitative Report*, 4(1/2).

Investigates whether the *location* of dual enrollment courses (i.e., on the high school or college campus) affects the educational experience of dual enrollment students by examining the perceptions of dually-enrolled high school students. While all six participants expressed satisfaction from their dual enrollment experience, the three who took courses on the college campus appeared more satisfied. Students contended that dual enrollment was of greater value if the college course was taken on the college campus; however, all participants agreed that taking a course from either location was indeed a worthwhile endeavor. Students expressed a desire to continue in the dual enrollment program.

Clark, R. W. (2001). *Dual credit: A report of programs and policies that offer high school students college credits*. Seattle, WA: Institute for Educational Inquiry.

Provides an overview of dual credit programs including benefits and pitfalls based on interviews and survey conducted for college admissions officers, officials in 50 states, and schools and colleges. The study revealed that there are many dual-credit programs with a large and growing number of high school students. Benefits include saving money, increasing access to postsecondary education, helping students with the transition to postsecondary schooling, improving the high school curriculum, strengthening the coherence between high school and college curricula, improving the quality of technical training for workers, and helping colleges recruit students. Concerns about the dual enrollment courses on high school campus include the quality of course, the quality of experience, the underrepresentation of minorities and low-income students in such programs, and acceptance of dual credit.

Education Commission of the States. (2008). *Dual Enrollment*.

Provides information on the following policy components: the existence of statewide policy, definition of program, whether offering is mandatory, tuition, providers, locations, student eligibility, cap on number of credits students may earn, postsecondary and/or secondary credit earned, state funding, notification about the opportunity to students/parents, instructor and course quality, reporting, program evaluation, and other characteristics.

Education Commission of the States (2001). *Postsecondary options: Dual and concurrent enrollment*.

Denver, CO.: Education Commission of the States.

Summarizes the status of state policy across all 50 states, focusing on the definition, general approach, funding, credit provisions, incentives, and unique characteristics. Distinguishes between comprehensive approaches (21 states), wherein students pay minimal or no tuition and fees, both secondary and postsecondary credit is earned for postsecondary courses and few course restrictions exist; and limited approaches (26 states) wherein students pay tuition costs of postsecondary classes, there are more academic credit restrictions and there is stringent criteria on eligible courses.

Eimers, M., & Mullen, R. (2003, May). *Dual credit and Advanced Placement: Do they help prepare students for success in college?* Paper presented at the Annual American Institutes for Research (AIR) Fall Conference, Tampa, FL.

Examines the relationship between students who take dual credit and / or advanced placement (AP) in high school and their college academic performance and first-year retention using linear and logistic regressions. Controlling for academic ability, students entered college with AP received higher first-year GPA's than students entered college with dual credit only or with no college credits. For the second year, both students entered with AP or dual credits outperformed students who entered with no college credit.

Farrell, P. & Seifert, K. (2007). Lessons learned from a dual-enrollment partnership. *New Directions for Community Colleges* (139), 69-77.

Addresses lessons learned by an Arizona community college that participated in a dual-enrollment program with several local high schools. The lessons learned include to set academic and faculty standards; to coordinate the collaboration, to understand and implement the policies; to consider college preparation; and to determine evaluation methods.

Golann, J. W., & Hughes, K. L. (2008). *Dual enrollment policies and practices: Earning college credit in California high schools*. San Francisco, CA: The James Irvine Foundation.

Informs educators, policymakers, administrators and researchers about current policies and practices that shape dual enrollment in California by clarifying current policy and sharing examples of successful programs. The core components of high-quality career-focused dual enrollment programs were: (1) expanding career-focused dual enrollment participation to low-income students who are struggling academically or who are within populations historically underrepresented in higher education; (2) ensuring rigor, authenticity and transferability of college courses; (3) integrating rigorous academics with career and technical subject matter; (4) creating strong collaborative relationships between secondary and postsecondary partners; (5) providing supports to help students be successful in their college courses and college transitions; (6) creating program sequences that span high school and college classes; and (7) collecting data on students' secondary and postsecondary outcomes and willingness to participate in an evaluation.

Hoffman, N. (2005). *Add and subtract: Dual enrollment as a state strategy to increase postsecondary success for underrepresented students*. Boston, MA: Jobs for the Future.

Provides an overview of dual enrollment and a rationale for its expansion, guidelines (including funding models) for states wishing to implement dual enrollment for a wider range of students and brief case studies of substantial dual enrollment programs that serve a wide range of students—Florida and Utah and College Now at the City University of New York—and offers lessons for an expanded mission for dual enrollment.

Hoffman, N., & Robins, A. (2005). *Head start on college: Dual enrollment strategies in New England 2004-2005*. Boston, MA: Jobs for the Future.

Explores the degree to which secondary and postsecondary institutions in the six New England states are implementing dual enrollment. This report focuses on secondary/postsecondary systems and programs serving the second population—those who may not consider themselves “college bound.” The major challenge facing expansion of dual enrollment in New England is the absence of legislation and institutional policies that would permit: (1) college courses to replace high school courses in order to accelerate students through postsecondary education and shorten time to the degree; and (2) high school or college funds to be used to pay for the participation of high school students in postsecondary courses and programs.

Hoffman, N., Vargas, J., & Santos, J. (2009). New directions for dual enrollment: Creating stronger pathways from high school through college. In A. C. Bueschel & A. Venezia (Eds.), Special issue: Policies and practices to improve student preparation and success. *New Directions for Community Colleges, 2009*(145), 43–58.

Describes three accelerated learning options: traditional dual enrollment, dual-enrollment pathways, and early college high schools. Presents cases of states and community colleges that have particularly interesting models for these options and reviews the evidence that such options can do what they claim: increase college success.

Hughes, K. L., Rodriguez, O., Edwards, L. & Belfield, C. (2012). *Broadening the benefits of dual enrollment: Reaching underachieving and underrepresented students with career-focused programs*. Community College Research Center, Teachers College, Columbia University, New York.

Provides an overall summary of a three-year study tracking the outcomes for thousands of California students who participated in career-focused dual enrollment programs. Describes the program and its generally positive outcomes but notes the variation in outcomes, which allowed the researchers to identify “key program considerations,” that is, features of program implementation that were associated with student success.

Hugo, E. B. (2001). Dual enrollment for underrepresented student populations. In P. F. Robertson, B. G. Chapman, & F. Gaskin (Eds.), Special issue: Systems for offering concurrent enrollment in high schools and community colleges *New Directions for Community Colleges, 2001*(113), 67–72.

Suggests the possibility of dual enrollment to assist more minority students in qualifying for competitive colleges and universities by reviewing the dual enrollment program at Santa Monica College. Dual enrollment facilitates the school-to-college transition and improves access to college for diverse populations and provides an opportunity for minority and first-generation students to learn about colleges and improve their study skills, and it gives them more information about the process of attending college.

Hunt, E., & Carroll, C. E. (2006). Florida's dual enrollment initiative: How state policy influences community colleges' service to underrepresented youth. In D. D. Bragg & E. A. Barnett (Eds.), Special issue: Academic pathways to and from the community college. *New Directions for Community Colleges, 2006(135)*, 39–47.

Presents an overview of Florida's Accelerated Mechanism Program, identifies challenges that resulted from shifting intentions behind dual enrollment policies, and shows how evolving state policy has influenced the strategies used by one college to successfully enroll underserved students and support their transition to college.

Karp, M. M., & Hughes, K. L. (2008). Dual enrollment can benefit a broad range of students. *Techniques: Connecting Education and Careers, 83(7)*, 14–17.

Provides evidence that career and technical education (CTE) students can benefit from participating in programs to prepare them for college as well as careers by analyzing two large-scale administrative datasets. Compares CTE students who took dual enrollment courses in high school with CTE students who did not in Florida, students who participated in the city's dual enrollment program, College Now, with those who did not in New York. The study found positive outcomes for dual enrollment participants in their high school graduation rates, college enrollment rates, college GPA, and credit accumulation.

Karp, M. M., Bailey, T. R., Hughes, K. L., & Fermin, B. J. (2005). *Update to state dual enrollment policies: Addressing access and quality*. Washington, DC: U.S. Department of Education.

Provides a comprehensive comparative summary of state policies and presents results in a grid. Policy components include: whether a state policy exists, if there is oversight, the target population, eligibility requirements (age and academics), location, student mix, instructor requirements, course content, tuition and funding. Indiana's row is relatively sparse, having a mandatory state policy, allowing only juniors and seniors of advanced academic standing, the state paying, and "partial" funding policies.

Karp, M. M., Bailey, T. R., Hughes, K. L., & Fermin, B. J. (2004). *State dual enrollment policies: Addressing access and quality*. Washington, DC: U.S. Department of Education.

Explores state sponsorship and regulation of dual enrollment programs by analyzing and summarizing dual enrollment legislation in all 50 states. This report identifies 10 features along which dual enrollment programs can vary: target population; admissions requirements; location; student mix; the background characteristics of the instructors; course content; method of credit-

earning; program intensity; funding; and state mandates. Given current interest in expanding dual enrollment access to students beyond the most academically advanced, this report asks the questions of how—and whether—state policies can encourage access to dual enrollment programs for a broader range of students, particularly middle- and low-achieving students.

Karp, M.M., Calcagno, J.C., Hughes, K.L., Jeong, D.W., & Bailey, T.R. (2007). *The postsecondary achievement of participants in dual enrollment: An analysis of student outcomes in two states*. Community College Research Center, Columbia University.

Seeks to answer several questions regarding the effectiveness of dual enrollment using rigorous quantitative methods. Examines the impact of dual enrollment participation for students in the State of Florida and in New York City and provides evidence showing that dual enrollment is a useful strategy for encouraging postsecondary success for all students, including those in CTE programs.

Kim, J. (2008). *The impact of dual and articulated credit on college readiness and total credit hours in four selected community colleges: Excerpts from a doctoral dissertation literature review*. Champaign, IL: Office of Community College Research and Leadership, University of Illinois at Urbana Champaign.

Reviews the literature on definitions, relationship between dual credit and tech prep, background of students who participate, and influence on student outcomes in college. Advantages claimed include: alignment of curriculum; saving time and money; mitigating wasted senior year; make more informed choices on college; increase in educational opportunities; expands available curriculum opportunities in rural and other underserved areas; enhance prospects for admission. Issues include: doesn't necessarily reduce cost and often not accepted by colleges; difficult to monitor quality and maintain secondary/postsecondary collaboration; selection criteria often results in serving those who least need the help; inconsistent funding practices. Participation and Impacts: more participation among non-minorities and females. H.S. performance higher among participants in part as related to selection/eligibility requirements; most programs not assessed as it is not a requirement of the program; impact on remediation needs mixed (two studies positive, one negative); impact on retention/credits earned in college also mixed among a wider variety of studies. Some appropriately controlled studies showed some positive effects and others did not. Impact on college performance also mixed. Bottom lines: there are clear differences between who participates and who does not participate; no definitive conclusions in impact if academic background appropriate controlled for. Studies that show positive impact studies tend to outnumber no impact and negative impact studies, but only slightly.

Kim, J., Barnett, & Bagg, D.D. (2003). *Dual Credit in Illinois: Results of expert panel deliberations and a Delphi study of definitions and priorities*. Champaign, IL: Office of Community College Research and Leadership, University of Illinois at Urbana Champaign.

Delphi study identifies priority issues: Secondary and postsecondary collaboration; quality/integrity of program; obtaining student outcome data; qualification of teachers; funding

sources; consistency of policies; processes for awarding credit; student selection; marketing to students and parents.

Kim, J., & Bragg, D. D. (2008). The impact of dual and articulated credit on college readiness and retention in four community colleges. *Career and Technical Education Research, 33*(2), 133-158.

Investigate the effect of dual credits on college readiness and total credit hours using Astin's Input-Environment-Outcome (I-E-O model). Input (I): gender, high school percentile rank, Tech Prep participation, and high school course-taking; Environment (E): academic, career and technical education (CTE), and total dual credit and articulated credit; and Output (o): college readiness and total credit hours. Logistics and Multiple regressions were applied based on Community College and Beyond (CC&B) data. Dual credit hours and articulated credit hours earned have a significant effect on total college-level credit hours earned.

Kleiner, B., Lewis, L., & Greene, B. (2005). *Dual enrollment of high school students at postsecondary institutions: 2002-03. NCES 2005-2008*. National Center for Education Statistics. Washington, DC.

Results of nationwide institutional survey provides comprehensive statistics on prevalence on accepting dual credits by institution type, as well as characteristics of dual enrollment programs, including: course location and types of instructors; curriculum and course taking patterns; credit award; academic eligibility requirements and funding.

Klopfenstein, K. (2003). Recommendations for maintaining the quality of Advanced Placement programs. *American Secondary Education, 32* (1), 39-48.

Recommends ways to maintain AP program quality in light of the following concerns: Placing AP teachers out-field without support for professional development, applying narrow enrollment criteria for entering students, using AP exam scores for program assessment, and communication failures between teachers, parents, and administrators can diminish the effectiveness of an AP Program.

Lerner, J. B., & Brand, B. (2006). *The college ladder: Linking secondary and postsecondary education for success for all students*. Washington, DC: American Youth Policy Forum.

Provides an extensive literature review of research, evaluations, and studies on Secondary-Post-Secondary Learning Options (SPLOs) to help national, state, and local policymakers and practitioners better understand what SPLOs are, the various ways they are structured, and their impact on student outcomes. SPLO Programs reviewed include Dual Enrollment, Tech Prep, Middle/Early College High Schools, Programs Serving Disadvantaged Youth, and College Access Programs. Dual Enrollment Programs reviewed include dual enrollment in the University of Missouri System, dual enrollment with Community Colleges in the State of Florida, Washington State Running Start, and Georgia Technical College Dual Enrollment.

Lowe, A. L. (2010). *Promoting quality: State strategies for overseeing dual enrollment programs*. National Alliance of Concurrent Enrollment Partnerships.

Presents six in-depth case studies in light of dual enrollment oversights and strategies among the following state-level entities: Florida Department of Education; Illinois Community College Board; Oregon Dual Credit Oversight Committee; South Dakota Board of Regents; Utah System of Higher Education and Utah Office of Education; and Virginia Community College System. Offers knowledge and understanding of state-level policies and practices that advance the goal of seamless education through secondary and post-secondary collaboration.

McCauley, D. (2007). *The impact of advanced placement and dual enrollment programs on college graduation*. Applied Research Project, Texas State University.

Examines whether Advanced Placement (AP) and dual enrollment courses for high school students influence the likelihood of enrolled students graduating from a four-year college or university within six years. Regression analysis was applied using the National Education Longitudinal Study: 1988-2000. The results showed that taking an AP or dual enrollment course was significantly related to six-year graduation rates.

Michelau, D. K. (2001). *Postsecondary enrollment options programs*. Washington, DC: Office of Educational Research and Improvement.

Analyzes policies on Postsecondary Enrollment Option (PSEO) programs in 32 states with laws or recently passing legislation to establish and govern PSEO programs. Benefits of PSEO: PSEO programs provide more course options and offer more challenging courses to students during their last 1 or 2 years of high school, and decrease cost of college by allowing high school students to get a head start on their coursework. Challenges: student readiness, funding, administrative difficulties, and attrition of the top students from high schools. Provides summary of state legislation by state.

Mokher, C. G., & McLendon, M. K. (2009). Uniting secondary and postsecondary education: An event history analysis of state adoption of dual enrollment policies. *American Journal of Education*, 115, 249-277.

Reports the findings from an event history analysis of the origins of state dual enrollment policies adopted between 1976 and 2005. Results showed that state political characteristics, organizational structures, and policy conditions are associated with the spread of dual enrollment policies. Also, some states appear to have a climate for reform activity, resulting in a tendency to engage in innovative education policy making.

Pennington, H. (2004). Fast track to college: Increasing postsecondary success for all students. *Renewing Our Schools, Securing Our Future a National Task Force on Public Education*, 30 (3), 23-35.

Suggests the development of three “fast track to college” alternatives to the traditional high school senior year to provide every student with a chance to attend college and complete some kind of postsecondary credential by the age of 26: An Academic Head Start on College; An Accelerated Career/Technical College; and A Gap Year, or College in the Community. Presents the roles of states and the federal government in supporting these alternatives.

Santiago, D. (2011). *Roadmap for ensuring America's future by increasing Latino college completion*. Washington, DC: Excelencia in Education.

Asserts the importance of increasing Latino college completion in reaching nation's degree attainment goals and provides what community leaders, college/institution leaders, state leaders, and federal leaders can do to increase degree attainment of Hispanic students throughout higher education.

Smith, D. (2007). Why expand dual-credit programs? *Community College Journal of Research and Practice*, 31, 371-387.

Examines the relationship between participation and location of dual-credit enrollment and the educational aspirations of high school students. A total of 304 students from 5 rural Kansas high schools were surveyed. Results indicated that participation in dual-credit programs was positively and significantly related to educational aspirations. The findings also indicated that concurrent enrollment location was a significant predictor of educational aspirations.

State Board for Community and Technical Colleges. (2008). *Running Start 2006-7 annual progress report*. Olympia, WA: State Board for Community and Technical Colleges..

Annual report of Washington State's Running Start program, which allows 11th and 12th grade students to take college courses at the state's 34 community and technical colleges as well as five four-year colleges. Describes how the program works and provides descriptive statistics regarding participation levels.

Thomas, N., Marken, S., Gray, L., and Lewis, L. (2013). Dual credit and exam-based courses in U.S. public high schools: 2010–11 (NCES 2013-001). U.S. Department of Education. Washington, DC: National Center for Education Statistics.

Follow up data on dual credit and exam-based courses, including Advanced Placement (AP) and International Baccalaureate (IB) courses, for public high school students. The report provides national estimates of the number of public high schools that offered dual credit and/or exam-based courses, as well as the number of enrollments in those courses. In addition, it examines the location and educational focus of these courses, dual credit course characteristics, and school requirements surrounding dual credit courses. This is a follow-up to Waits, Setzer, & Lewis (2005).

Torres, V., Zerquera, D., & Park, E. (2011). Dual enrollment and its role in the college completion agenda. Paper presented at 2011 Association for the Study of Higher Education (ASHE) Conference. Charlotte, NC.

Reframes the definition, role, and outcomes of dual enrollment in light of the current completion agenda. Using existing literature, presents the tensions around dual enrollment as an intervention to improve college degree completion and the research that has been conducted to date. Provides a set of different conceptual ideas that could be considered to improve research on dual enrollment.

Venezia, A., Kirst, M.W., & Antonio, A.L. (2003). *Betraying the college dream: How disconnected K-12 and postsecondary education systems undermine student aspirations*. Palo Alto, CA: Stanford Institute for Higher Education Research, Bridge Project.

Presents results from the Stanford's Bridge Project—a six-year national study that began in 1996 to answer questions around K-16 reforms by examining policies and practices in California, Illinois, Georgia, Maryland, Oregon, and Texas. Presents the reasons of the disconnect between K-12 and post-secondary education, and examines how this disconnection has inhibited the ability of schools and colleges to address the issues of inadequate preparation for college, high levels of remediation, and low rates of college completion. Concludes with a series of recommendations as to how students can be better supported in their efforts to succeed in college.

Waits, T., Setzer, J.C., & Lewis, L. (2005). *Dual credit and exam-based courses in U.S. public high schools: 2002–03* (NCES 2005–009). U.S. Department of Education. Washington, DC: National Center for Education Statistics.

Provides baseline data on dual credit and exam-based courses, including Advanced Placement (AP) and International Baccalaureate (IB) courses, for public high school students. The report provides national estimates of the number of public high schools that offered dual credit and/or exam-based courses, as well as the number of enrollments in those courses. In addition, it examines the location and educational focus of these courses, dual credit course characteristics, and school requirements surrounding dual credit courses.

Westerheijden, D. F. (2007). States and Europe and quality of higher education. *Quality Assurance in Higher Education*, 20, 73-95.

Investigates how quality assurance schemes affect the performance of higher education systems at various levels. Offers a “partial theory” of quality in higher education that focuses on the interests of the actors, and the neoclassical proposition that, “what gets measured, gets done.” Thus external actors shape institutional emphases by virtue of the accountability measures they promulgate, which also shape the defining features of quality.

Western Interstate Commission for Higher Education. (2006, June). *Accelerated learning options: Moving the needle on access and success. A study of state and institutional policies and practices*. Boulder, CO: Western Interstate Commission for Higher Education..

Informs about existing state and institutional policies and practices associated with four accelerated learning programs: Advanced Placement (AP), dual/concurrent enrollment, the International Baccalaureate (IB) Diploma Program, and Tech-Prep. Examines issues of effectiveness, quality, financing, and availability in order to determine if accelerated learning was a viable option to increase access to and success in postsecondary education among low-income and underrepresented students.

Windham, P. (1997). *High school and community college dual enrollment: Issues of rigor and transferability*. Tallahassee, FL: Florida State Board of Community Colleges.

Provides results of the study conducted by the state's Community College Board to determine the effectiveness of the dual enrollment program, in response to the report issued by the University Florida in December 1993—which revealed that the vast majority of students who had taken chemistry courses in dual enrollment programs at a community college and did not meet standard admissions requirements were required to retake their courses at the University. Based on the system-wide data collected from the university, the study found positive effects of dual enrollment programs.
